Air War Over Vietnam:

An Illustrated Guide to the Air War Over Vietnam Bernard C. Nalty, George M. Watson, Jacob Neufeld, 1981

Gradual Failure: The Air War Over North Vietnam, 1965-1966 Jacob Van Staaveren, 2011-07-18 The air war against North Vietnam was launched with the nickname Rolling Thunder This book covers the first phase from March 1965 to late 1966 It begins with the planning and execution of two initial limited air strikes nicknamed Flaming Dart I and II As the air campaign gradually expanded and the permissible targeting area moved northward many in Washington believed air power could never win the war in the north The United States Air Force reached its nadir during the opening two years of the Rolling Thunder air campaign in North Vietnam Never had the Air Force operated with so many restraints and to so little effect These pages are painful but necessary reading for all who care about the nation's military power The author served as a historian for over twenty years with the Air Force history program Originally published by the Air Force History and Museums Program

On Yankee Station John B. Nichols, 2013-03-11 Combining vivid personal narrative with historical and operational analyses this book takes a candid look at U S naval airpower in the Vietnam War Coauthors John Nichols a fighter pilot in the war and Barrett Tillman an award winning aviation historian make full use of their extensive knowledge of the subject to detail the ways in which airpower was employed in the years prior to the fall of Saigon Confronting the conventional belief that airpower failed in Vietnam they show that when applied correctly airpower was effective but because it was often misunderstood and misapplied the end results were catastrophic Their book offers a compelling view of what it was like to fly from Yankee Station between 1964 and 1973 and important lessons for future conflicts At the same time it adds important facts to the permanent war record Following an analysis of the state of carrier aviation in 1964 and a definition of the rules of engagement it describes the tactics used in strike warfare the airborne and surface threats electronic countermeasures and search and rescue It also examines the influence of political decisions on the conduct of the war and the changing nature of the Communist opposition Appendixes provide useful statistical data on carrier deployments combat sorties and aircraft losses

Rolling Thunder 1965-68 Richard P. Hallion, 2018-02-22 Operation Rolling Thunder was the campaign that was meant to keep South Vietnam secure and dissuade the North from arming and supplying the Viet Cong It pitted the world's strongest air forces against the MiGs and missiles of a small Soviet client state But the US airmen who flew Rolling Thunder missions were crippled by a badly thought out strategy rampant political interference in operational matters and aircraft optimised for Cold War nuclear strikes rather than conventional warfare Ironically Rolling Thunder was one of the most influential episodes of the Cold War its failure spurring the 1970s US renaissance in professionalism fighter design and combat pilot training Dr Richard P Hallion one of America's most eminent air power experts explains how Rolling Thunder was conceived and fought and why it became shorthand for

how not to fight an air campaign *Interservice Rivalry and Airpower in the Vietnam War* Ian Horwood, 2010 Explores the rivalry between the armed services of the U S relating to the employment of tactical airpower during the Vietnam War Not being an American Horwood is able to put a fresh perspective on this complex issue This study focuses on tactical airpower in S Vietnam between 1961 and 1968 Horwood avoids a lengthy discussion of the air war over N Vietnam focusing instead on the combat operations in the South He examines a number of issues which are relevant to the use of airpower in irregular warfare command and control of airpower the use of airpower at the tactical and the operational strategic level of war the role of helicopters and different service understandings of the proper role of airpower in a counterinsurgency **Air War Over Kosovo** Albert Atkins, 2000 The Air War over Kosovo opens with an exploration of the ethnic conflict in the Balkans From this foundation the book examines the weapons systems that were utilized The author scrutinize the missiles employed review the diverse bomber systems used and highlight the nuances of the air lift operations Additionally the author explores the tactics and strategies that the American military administration designed and implemented over the Balkans The author studied specific missions and scrutinize the memories and experiences of Lt General Michael Short General Charles Horner and General Wesley K Clark to proffer an overview of the scope of this air directed campaign *Air War Over North Vietnam* Stephen Emerson, 2018-02-28 In early 1965 the United States unleashed the largest sustained aerial bombing campaign since World War II against North Vietnam Through an ever escalating onslaught of destruction Operation Rolling Thunder intended to signal Americas unwavering commitment to its South Vietnamese ally in the face of continued North Vietnamese aggression break Hanoi political will to prosecute the war and bring about a negotiated settlement to the conflict It was not to be Against the backdrop of the Cold War and fears of widening the conflict into a global confrontation Washington policy makers micromanaged and mismanaged the air campaign and increasingly muddled strategic objectives and operational methods that ultimately sowed the seeds of failure despite the heroic sacrifices by U S Air Force and Navy pilots and crews Despite flying some 306 000 combat sorties and dropping 864 000 tons of ordnance on North Vietnam 42 per cent more than that used in the Pacific theater during World War II Operation Rolling Thunder failed to drive Hanoi decisively to the negotiating table and end the war That would take another four years and another air campaign But by building on the hard earned political and military lessons of the past the Nixon Administration and American military commanders would get another chance to prove themselves when they implemented operations Linebacker I and II in May and December 1972 And this time the results would be vastly different **Air Power And The Ground War In Vietnam, Ideas And Actions** Dr Donald J. Mrozek, 2015-11-06 Ultimately this study is about a smaller Vietnam War than that which is commonly recalled It focuses on expectations concerning the impact of air power on the ground war and on some of its actual effects but it avoids major treatment of some of the most dramatic air actions of the war such as the bombing of Hanoi To many who fought the war and believe it ought to have been conducted on a still larger scale or with fewer restraints this

study may seem almost perverse emphasizing as it does the utility of air power in conducting the conflict as a ground war and without total exploitation of our most awe inspiring technology Although the chapters in this study are intended to form a coherent and unified argument each also offers discrete messages The chapters are not meant to be definitive They do not exhaust available documentary material and they often rely heavily on published accounts Nor do they provide a complete chronological picture of the uses of air power even with respect to the ground war Nor is coverage of areas in which air power was employed South Vietnam Laos Cambodia and North Vietnam evenly distributed nor necessarily proportionate to the effort expended in each place during the war Lastly some may find one or another form of air power either slightly or insufficiently treated Such criticisms are beside the point for the objectives of this study are to explore a comparatively neglected theme the impact of air power on the ground and to encourage further utilization of lessons drawn from the Vietnam experience

Gradual Failure Office of Air Force History, United States Air Force, 2015-03-08 The United States Air Force reached its nadir during the opening two years of the Rolling Thunder air campaign in North Vietnam Never had the Air Force operated with so many restraints and to so little effect These pages are painful but necessary reading for all who care about the nation's military power Jacob Van Staaveren wrote this book in the 1970s near the end of his distinguished government service which began during the occupation of Japan the University of Washington Press published his book on that experience in 1995 He was an Air Force historian in Korea during the Korean War and he began to write about the Vietnam War while it was still being fought His volume on the air war in Laos was declassified and published in 1993 Now this volume on the air war in North Vietnam has also been declassified and is being published for the first time Although he retired to McMinnville Oregon a number of years ago we asked him to review the manuscript and make any changes that seemed warranted For the most part this is the book he wrote soon after the war

Wings over Vietnam John Davis, *Air Combat Facts* Sebastian Farnham, AI, 2025-02-20 Air Combat Facts charts the evolution of aerial warfare from the rudimentary dogfights of World War I to today's technologically advanced conflicts The book explores how technological advancements strategic adaptations and human factors have shaped air combat across major historical eras Readers gain insights into the core principles of air power examining the rapid development of aircraft design weaponry and electronic warfare For example early pilots relied on improvised tactics while modern pilots face the complexities of drone warfare and cyberwarfare The book progresses chronologically beginning with the early days of aviation and advancing through World War II's strategic bombing to the jet age of the Cold War It emphasizes that air combat's evolution isn't just about technology it also involves tactical adaptations and the psychological demands on combatants Air Combat Facts uniquely balances technological details with the enduring role of human skill and judgment offering a comprehensive understanding of air combat's historical context

The Joint Chiefs of Staff and the War in Vietnam, 1960-1968: 1967-1968 Graham A. Cosmas, 2009 Pt 1 This volume describes those JCS activities related to developments in Vietnam during the period 1960-1963 when the United States expanded its initial military commitment to Southeast Asia In 1960 the United States increased its military advisory strength in South Vietnam in response to increased Communist infiltration and to more sustained guerrilla attacks in the south and its contingency planning effort to deploy regular US forces to both Laos and South Vietnam to counter any threat by Communist Army units from the north or from China President Kennedy's called for a new emphasis upon guerrilla warfare at first received only lukewarm support from the Joint Chiefs of Staff After the failed Bay of Pigs episode very early in the Kennedy administration the President lost faith in the advice of the Joint Chiefs of Staff and appointed General Maxwell Taylor to serve as his intermediary with the Joint Chiefs until he assumed the Chairman responsibilities in October 1962 The Kennedy administration's policy was marked by clashes between factions in the Defense Department including the Joint Chiefs of Staff the State Department and the White House By 1963 these differences involved the support the US should provide for the Republic of Vietnam under its President Ngo Dinh Diem The history ends with the killing of Diem by a coup followed by the coincidental murder of President Kennedy a short time later
