Coping and Self-Concept in Adolescence H.A. Bosma,A.E. (Sandy) Jackson,2012-12-06 Self concept and coping behaviour are important aspects of development in adolescence Despite their developmental significance however the two areas have rarely been considered in relation to each other This book is the first in which the two areas are brought together it suggests that this interaction can open the way to new possibilities for further research and to new implications for applied work with adolescents Two separate chapters review research carried out in each of the areas These are followed by a series of more empirically focussed chapters in which issues such as changes in relationship patterns difficult school situations leaving school use of leisure anxiety and suicidal behaviour are examined in the context of self concept and coping The final chapter seeks to identify some of the central themes emerging from this work and discusses possible research and applied implications

Jung's Self Psychology Polly Y. Eisendrath,James James Albert Hall,1991-05-03 Jung was fascinated by the problem of unity in the personality If the personality is made up of multiple voices or affective imaginal states as he believed it was then how does an individual achieve a core self Jung concluded that a coherent and continuous self is the hard won achievement of consciousness the product of a mature personality in the second half of life His theory of the integration of

multiple subjectivities into an individuating self anticipates current trends in constructivism and developmental psychology Jung did not systematize his own work nor attempt to make accessible many of his most complex ideas about the self This volume explores his self psychology its meaning and its application within the context of other contemporary theories of subjectivity To describe Jung s self psychology more fully in the light of contemporary theories the authors introduce twelve other self theories in a comparative analysis of the clinical case of a midlife man in psychotherapy From Kohut and Piaget to Lichtenberg and Loewinger the authors compare Jung s theories with other clinical and developmental approaches The book s final chapter offers cogent suggestions for future use of Jung s self psychology Unique in its treatment and understanding of Jung s theories this volume illuminates and simplifies many of his central ideas about the self For Jungians it provides a contemporary context in which to read and systematize his work For professionals in the larger therapeutic and educational communities it offers an up to date introduction to a provocative and imaginative body of work that is a central chapter of modern theories of subjectivity

Family Life in Adolescence Patricia Noller, Sharon Atkin, 2014-01-01 Many parents fear the time when their beautiful happy children will become unmanageable adolescents continually engaging in risky or destructive behaviour Unfortunately this view of adolescents is the focus of the media even though it relates to just a small proportion of young people As the large amount of research we report shows most adolescents are responsible young people who care about their families and crave the support of their parents It is also true however as much research indicates that the quality of the relationship parents have with their adolescents is crucial to the wellbeing of those young people We discuss the need for parents to set reasonable limits on their adolescents and to expect appropriate behavior We also show on the basis of research that children who have experienced positive caring relationships with their parents are more likely than other adolescents to behave responsibly In other words behavior in adolescence does not come out of nowhere but builds on earlier experiences in the family Because of the large amount of research reported in this volume we expect that it will be useful to practitioners from a range of professions that are likely to focus on adolescents social workers youth leaders welfare workers religious leaders psychologists and psychiatrists and contribute to a better understanding of young people and their development and the importance of families to that development
