their early study abroad experiences They tend to see themselves in between two cultures languages and this in between ness is the most distinctive common characteristic of their identities However their in between ness means more than being connected to both Korea and America or hybridizing Korean and American discourses As transnational elites who cross the borders freely they are in a position to be cosmopolitans who can take advantage of the in between ness becoming keen critics of dominant cultures in both contexts and potentially social activists who can stand up for social justice In short the early study abroad experience should be understood not just in terms of language learning but as a process by means of which learners develop social awareness in multiple language related contexts that can lead them beyond their own circumscribed world of elitism to a position of responsibility for sharing what they have experienced and learned for the benefit of society
