Handbook of Adult Development Jack Demick, Carrie Andreoletti, 2012-12-06 This volume is an outgrowth of contemporary research on development over the adult lifespan which by now has burgeoned and developed both nationally and internationally However for us the impetus to be involved in this area was spawned and nurtured by our initial association with the Society for Research in Adult Development SRAD with its origins some 15 years ago by Michael

Commons and his associates in Cambridge Massachusetts Through the good will and support of this society we also became and are still heavily involved with the Journal of Adult Development and the Kluwer Plenum Monograph Series on Adult Development and Aging of which this volume is a companion Many of the contributions in the volume are from SRAD members who consistently adhere to a focus on positive adult development Their chapters have been complemented by pieces from other researchers who have adopted more mainstream approaches to adult development and aging Regardless of the particular approach and or focus of the chapter all the work reported herein supports the relatively recent idea that development is not restricted to children and adolescents but continues throughout the adult lifespan in ways that we never envisioned some 20 years ago Thus the volume represents state of the art theory research and practice on adult development which has the potential to occupy us all for some time to come

Adult Development, Therapy, and Culture Gerald D. Young, 2013-06-29 This volume proposes a theoretical integration of several major streams in contemporary psychological theory about adult development and therapy It adopts the perspective that there are steps in development throughout the adult period and that they are characterized by a union of the cognitive and affective the self and the other and idea with idea in second order collective abstractions That is they are at once postformal in terms of Piaget's theory sociocultural in terms of Vygotsky's theory and postmodern with the latter perspective providing an integrating theme The affirmative multivoiced contextual relational other sensitive side of postmodernism is emphasized Levinas's philosophy of responsibility for the other is seen as congruent with this ethos The neopietagetic model of development on which the current approach is based proposes that the last stage in development concerns collective intelligence or postmodern postformal thought Kegan 1994 has attempted independently to describe adult development from the same perspective His work on the development of the postmodern mind of the adult is groundbreaking and impressive in its depth However I analyze the limitations as well as the contributions of his approach under scoring the advantages of my particular model

Adult Development and Aging Susan Krauss Whitbourne, Stacey B. Whitbourne, 2010-10-18 The fourth edition continues to provide psychologists with a fresh and engaging approach to the field of psychology of adult development and aging It focuses on three themes a multidisciplinary approach positive images of aging and the newest and most relevant research Recent articles and updates to the information on demography economics and public policy are presented The Aging in the News feature includes a story of a remarkable achievement by a middle aged or older adult The Assess Yourself boxes are also updated with new questions Psychologists appreciate this mix of examples and discussions that make the material come to life

Adult Development Calvin A. Colarusso, Robert A. Nemiroff, 2013-11-22 This volume is about the normal development of adulthood as well as its vicissitudes and the contributions of such development to psychopathology The authors are psychoanalysts of great clinical skill and perceptiveness but while their focus is consistently a psychodynamic one their conceptualizations about adult developmental processes are applicable to virtually all kinds of therapy It is extraordinary how little attention has been paid

to the effects of adult developmental experience on mental development Obviously mental structures are not static after the profound experiences of childhood and adolescence nor are they merely a template upon which adult experiences are processed The authors clearly demonstrate that current adult experience always adds to and interacts with existing mental structure which is itself the result of all preceding development After a first section in which they examine life cycle ideas on development from antiquity to the present they present their own work as it relates to adult experience and adult development Their hypotheses about the psychodynamic theory of adult development are particularly creative and an enormous contribution to the psychiatric literature and the clinical understanding of patients Consistent with their views that development in adulthood is an ongoing and dynamic process they elaborate their ideas that childhood development is focused primarily on the formation of psychic structure while adult development is concerned with the continued evolution of existing structure and its use Adolescent Romantic Relationships as Precursors of Healthy Adult Marriages Benjamin R.

Karney, 2007 Policymakers are interested in promoting healthy marriages in adulthood by providing services to strengthen the adolescent precursors of healthy marriage especially within low income populations But if programs and curricula targeting adolescent romantic relationships are to be effective they must be grounded in an accurate understanding of how adolescent relationships function and the role that they play in the development of healthy adult marriages This report evaluates the current landscape of theory research and interventions addressing the role of adolescent romantic relationships in the development of healthy adult marriages Drawing on a thorough review of the existing theoretical and empirical literature in this area as well as interviews with practitioners directly involved with developing or administering relationship education to adolescents the authors bring together relevant research and theory from a wide range of disciplines that have examined these issues and suggest future directions for research and intervention In particular they note that although research describing romantic relationships in low income populations is sparse there are already existing nationally representative data sets that include data from substantial numbers of well sampled low income adolescents Analyses of these data would have relatively low cost and a potentially high yield for informing policies that target low income youth
