May, 2022-10-24 In the first decades of the 20th century civil engineers were widely seen as a role model for future architects Their role within the contemporary architecture movements however was hardly discussed To this day even fundamental questions about collaborations rivalries or conflicts between the two sister disciplines still await answers This volume brings together contributions by international scholars on the cooperation between architects and civil engineers in various countries in the interwar period By offering both insights into national peculiarities and new reflections on the general nature character and significance of such joint efforts it opens exciting new perspectives on the modern building culture of Europe and beyond Fabrikarchitektur im 20.
