Municipal Finances and the Adoption of

Participatory Budgeting in Germany Janina Apostolou, 2024-03-01 Participatory Budgeting PB is one of the most popular democratic innovations of recent times Since its first implementation in Germany in 1998 a growing number of municipalities have experimented with it Unlike in other countries PB processes in Germany follow primarily the goal of increasing transparency efficiency and service orientation as part of an effort to modernize public administration In global comparison the diffusion of PB in Germany has been rather slow In this book the author investigates the question how this specific adoption pattern occurs For that purpose she applies theories from Public Administration Fiscal Federalism Public Choice and diffusion of innovations to explain the incentives driving politicians to adopt PB from a public finance point of view According to empirical analysis by the author municipalities with a relatively worse financial situation are more likely to adopt a PB process Consequently PB processes seem to be used as a tool to spread responsibility gain legitimacy and raise understanding by citizens for necessary budget cutting decisions

The Rise, Spread, and Decline of Brazil's Participatory

Budgeting Brian Wampler, Benjamin Goldfrank, 2022-01-03 This book examines the rise spread and decline of participatory budgeting in Brazil In the last decade of the twentieth century Brazil became a model of participatory democracy for activists practitioners and scholars However some thirty years later participatory budgeting is in steep decline and on the verge of disappearing from Brazil Drawing from institutional political choice civil society and public administration literature this book generates theory that accounts for the rise and fall of an innovative democratic institution It examines what the arc of the creation spread and decline of participatory budgeting tells us about the long term viability and potential democratic impact of this innovative democratic institution as it spreads globally Will the same inverted trajectory plague other countries in the future or will they be able to sustain participatory budgeting for greater periods of time

Cities of the Global South Reader

Faranak Miraftab, Neema Kudva, 2014-10-10 The Cities of the Global South Reader adopts a fresh and critical approach to the field of urbanization in the developing world The Reader incorporates both early and emerging debates about the diverse trajectories of urbanization processes in the context of the restructured global alignments in the last three decades Emphasizing the historical legacies of colonialism the Reader recognizes the entanglement of conditions and concepts often understood in binary relations first third worlds wealth poverty development underdevelopment and inclusion exclusion By asking whose city whose development the Reader rigorously highlights the fractures along lines of class race gender and other socially and spatially constructed hierarchies in global South cities The Reader's thematic structure where editorial introductions accompany selected texts examines the issues and concerns that urban dwellers planners and policy makers face in the contemporary world These include the urban

economy housing basic services infrastructure the role of non state civil society based actors planned interventions and contestations the role of diaspora capital the looming problem of adapting to climate change and the increasing spectre of violence in a post 9 11 transnational world The Cities of the Global South Reader pulls together a diverse set of readings from scholars across the world some of which have been written specially for the volume to provide an essential resource for a broad interdisciplinary readership at undergraduate and postgraduate levels in urban geography urban sociology and urban planning as well as disciplines related to international and development studies Editorial commentaries that introduce the central issues for each theme summarize the state of the field and outline an associated bibliography They will be of particular value for lecturers students and researchers making the Cities of the Global South Reader a key text for those interested in understanding contemporary urbanization processes
