Nuclear War and Nuclear Peace Y. Harkabi, This book began as a personal effort to comprehend the effect of nuclear weapons on the current era and its international system Nuclear weapons have not merely revolutionized the military sphere but have also left their stamp on the world order Knowledge of the basic principles of nuclear strategy has become a prerequisite to understanding world events Consequently no country can remain indifferent to nuclear strategy or can consider itself exempt from its implications The very importance of the subject precludes the assumption of a narrow technical or military point of view Political historical moral and even religious implications must be considered Nuclear War

and Nuclear Peace serves as an introduction to the study of modern strategy within the framework of international relations as well as a basic account for laymen to the intricacies of modern strategy and its ramifications. It deals with a wide range of problems: deterrence and its implications, surprise and preemptive and preventative attack. The problems of quantities of nuclear weapons, limitations of war, conventional tactical and strategic, and proliferation of nuclear weapons are also discussed. In the end, Harkabi introduces alternate global approaches and the problem of coalitions in the nuclear era. By focusing on disarmament and arms control, peace in the shadow of terror and stability of the international system, and peace research, he brings relevance to his study in terms of the current world climate. Many books and articles have been published on nuclear strategy. Most have been designed to formulate strategic policies to suit the needs of particular countries and influence their policy. Most books on nuclear strategy have appeared in the United States with strategic prescriptions for the United States. This book will be of tremendous interest to anyone wishing to understand the major problems of our contemporary world from a global perspective.

Yehoshafat Harkabi is a graduate of the Hebrew University of Jerusalem and Harvard University. He participated in the armistice negotiations held at Rhodes and served as chief of Intelligence of the Israel Armed Forces. He was in charge of Strategic Research in the Israel Ministry of Defence. He has also published extensively on the Arab-Israel conflict. Until his retirement, he was lecturer in International Relations and Middle East Studies at the Hebrew University of Jerusalem.

The Realities of Reality - Part IV: The Reality Behind Achieving World Peace Fritz Dufour, MBA, DÉSS, 2020-04-05. This book is organized in seven chapters. Chapter one looks at the origins and the causes of war. The chapter argues that war is a consequence of how we as a species have evolved. War has both endogenous and exogenous causes. While the former depends on our biology and psychology, the latter has to do primarily with international relations. Chapter two makes the case for the paradoxical nature of war. While war takes lives, it is legitimate under certain circumstances. For example, armed humanitarian interventions are allowed to save lives among local populations at the expense of the oppressors by employing all necessary means, ethical or not. Chapter three asks if peace among nations is achievable, which is the main theme of this book. However, it does not elaborate on the question entirely. Instead, it gives sort of a prelude of what will be discussed in the remaining of the book by talking about the concepts of world order and American hegemony, arms race, and peacebuilding. Chapter four builds on three by looking at realism, idealism, and pacifism in international relations. As to pacifism, the chapter attempts to answer the question: what was the most peaceful time in history? Chapter five presents the elements of hope for world peace by considering the role played by the following: 1. the United

Nations 2 the North Atlantic Treaty Organization NATO 3 the Organization for Security and Cooperation in Europe OSCE 4 the non governmental organizations NGOs 5 the role of nuclear deterrence 6 globalization 7 transnationalism 8 diplomacy 9 sports 10 international cooperation in space exploration 11 the Nobel Prize and 12 the declining of war and violence in modern times On the other hand chapter six presents the opposite argument or the barriers to world peace using the following points 1 the proliferation of nuclear weapons 2 geoeconomics 3 terrorism 4 the global refugee crisis 5 the profitability of arms sales and 6 the profitability of wars It makes an interesting argument especially as to the profitability of wars by showing how the United States first emerged as an imperial and a world power in the 1890s then as the only world s superpower after World War II Finally chapter seven takes a proactive approach by peering into the future of armed conflict which is likely to take place in new environments Cyberspace the littoral choke points near space and increasingly in expanding cities or slums War The chapter concludes with a discussion on the Doomsday Clock a concept stemmed from the uncertainty as to the future of mankind because of armed conflicts and which is a symbol that represents the likelihood of a man made global catastrophe

The Origins of the First World War William Mulligan,2010-03-04 A new interpretation of the origins of World War I that synthesises recent scholarship and introduces the major historiographical and political debates surrounding the outbreak of the war It examines key issues providing a clear account of relations between the great powers disintegrating empires and the role of smaller states

Theories of War and Peace Michael E. Brown,Owen R. Cote, Jr.,Sean M. Lynn-Jones,Steven E. Miller,1998-09-15 New approaches to understanding war and peace in the changing international system What causes war How can wars be prevented Scholars and policymakers have sought the answers to these questions for centuries Although wars continue to occur recent scholarship has made progress toward developing more sophisticated and perhaps more useful theories on the causes and prevention of war This volume includes essays by leading scholars on contemporary approaches to understanding war and peace The essays include expositions analyses and critiques of some of the more prominent and enduring explanations of war Several authors discuss realist theories of war which focus on the distribution of power and the potential for offensive war Others examine the prominent hypothesis that the spread of democracy will usher in an era of peace In light of the apparent increase in nationalism and ethnic conflict several authors present hypotheses on how nationalism causes war and how such wars can be controlled Contributors also engage in a vigorous debate on whether international institutions can promote peace In a section on war and peace in the changing international system several authors consider whether rising levels of international economic independence and environmental scarcity will influence the likelihood of war

Dilemmas of Nuclear Strategy Roman Kolkowicz,2005-08-31 Nuclear strategy and deterrence in their golden age A nostalgically defined period sometime in the mid 1950s to mid 1960s promised to harness and control the nuclear Moloch hopes were high that the civilian strategists flooding into Washington would succeed in designing a new science of war that would safeguard national security provide a stable international

environment and develop a rational decision making process for the management of national interests in a hostile nuclear world Three decades later it is a commonplace that the erstwhile promises and pretensions of the nuclear w
