Arms Control and Nuclear Weapons W Gary Nicols, L Boykin, 1987-09-09 This wide ranging collection of essays establishes a historical framework for understanding the evolution and current state of U S and Soviet policies toward arms control as it details the course of arms control negotiations between the two superpowers In addition it treats arms control nuclear armaments and strategic considerations from a variety of perspectives examining the social and moral aspects as well as political and economic considerations

The National Interest and the Human Interest Robert C. US Foreign Policy and Government Guide Volume 1 Important Information and Developments IBP USA, **Negotiating START** Kerry M. Kartchner, The United States and the Soviet Union have been negotiating nuclear arms control agreements for over twenty years yet radical differences remain in the two sides concept of and approaches to strategic stability and arms control This book compares and contrasts those approaches using START Strategic Arms Reduction Treaty as a case study Throughout two decades of negotiation U S policy has been directed toward dialogue that would encourage convergence of American and Soviet thought on nuclear deterrence In Kartchner s view that hope is belied not only by continuing asymmetries in the development and deployment of their strategic nuclear arsenals but by differing U S and Soviet negotiating positions The Reagan administration viewed START as a means of repudiating SALT II restoring a measure of balance in the U S Soviet strategic competition and as a way of closing the so called window of vulnerability In contrast Kartchner analyzes the Soviets differing views of nuclear balance emphasizing their satisfaction with SALT II and a strategic equilibrium shaped by a decade of bilateral arms control Kartchner offers a detailed exposition of the major negotiating issues in START contrasting concerns of U S and Soviet negotiators Not surprisingly each side s agenda was dominated by weapon systems that figure prominently in the other s development program The author concludes by summarizing and comparing American and Soviet quests for stability and drawing up an assessment of U S efforts in both SALT and START to use arms control negotiations as a kind of classroom for instructing Soviet officials in American notions of stabilizing versus destabilizing weapon technology and America s own ethnocentric view of stability START will profoundly affect the acquisition operation maintenance and cost of U S strategic nuclear forces well into the next century The history

and analysis presented here will provide an essential source to policymakers and students of military political relations for much needed further study of this treaty's implications

The Mood/Interest Theory of American Foreign Policy Jack E. Holmes, 2014-07-15 In 1952 Frank L. Klingberg's article on introvert and extrovert American foreign policy moods projected an American turn toward introversion in the late 1960s. After this came to pass, Jack Holmes began to develop a theory of how these moods might work in a more specific sense. His mood interest theory points to a basic conflict between politico-military interests and the foreign policy moods of the American electorate. Holmes presents a pioneering account of the overwhelming impact of public moods on foreign policy. Policy-making structures, executive-legislative relations, presidential personality, pragmatism, moralism, elitism, conservatism, international economics, and humanitarianism are related to the mood interest pattern. Major points are illustrated with examples from 1776 to the present. Holmes's analysis indicates that American moods are continuing unabated according to past patterns so that American foreign policy may undergo some surprising changes in the next decade. One of the author's hopes is that emphasis on the importance of national moods will help avoid future extremes. This book is bold in its assertions and points to major problems in the analysis of American foreign policy. Whether or not the reader agrees with the entire analysis, he or she will be challenged to think about American foreign policy in new and perhaps revealing ways.

Glocalized Security Abu Bakarr Bah, 2025-06-03 What forces drive violent conflicts and whose interests are protected by military involvement? In those conflicts, how do domestic factors fuse with external dynamics and what issues spell the difference between successful and

failed intervention Enter Glocalized Security a concept that argues that this fusion of domestic and external matters produces new war dynamics which require both substantial domestic reforms and realignment of external interests to achieve sustainable peace In this edited collection contributors use this concept to examine grievances and interests in and around war torn countries Combining a variety of disciplines from sociology and political science to peace studies and public policy and administration these case studies draw from over three decades of international military interventions around the world including Afghanistan Turkey Somalia Iraq Nigeria and Nepal Analyzing the intersectional relationship of the local and global Glocalized Security provides new insights into the problems of international security and why international military interventions often fail to ensure peace and security in conflict zones where these factors have morphed into terrorism warfare or zones of national interest among major world and regional powers By focusing on ethnicity religion poverty governance and the other most common motivators of violent conflicts Glocalized Security provides a crucial conceptual basis for understanding international relations in the twenty first century *United States Policy and United States-Soviet Relations*, 1979 United States.
