Army Active Reserve Mix Force Planning For Major Regional Contingencies:

Structuring the Active and Reserve Army for the 21st Century, 1997 The U S Army s Cold War focus on the Soviet Union has shifted to fighting smaller conflicts against less formidable foes Today s Army is also 30 percent smaller than it was a decade ago In spite of those changes the composition of the Army has not shifted markedly the service remains almost equally divided between active duty and reserve soldiers A question under debate is whether that composition is well suited to the Army s current role The Army hopes to make its force structure better suited to its current mission by converting some of the combat forces in the National Guard to support forces That change would eliminate some of the excess combat forces but it would not enable the Army to get to regional conflicts more quickly than it can today nor would it improve the Army s ability to carry out peacekeeping operations Finally because the Army s plan would not reduce the overall size of the service it would not yield significant savings therefore the Army may have difficulty finding the funds to acquire the modern weapons it will need

Structuring the Active and Reserve Army for the 21st Century Frances M. Lussier, 1999-09 Addresses the question of whether the Army s current composition of almost equal numbers of active duty and reserve soldiers is well suited to the service s current role of fighting regional conflicts and taking part in peacekeeping operations Examines several alternative approaches for meeting the Army s force requirements comparing the advantages and disadvantages of each alternative with those of the current Army and the Army s plan to reorganize the National Guard Charts and tables **Army Active/reserve Mix** Ronald Eugene Sortor, 1995 The results of the analysis show that under current planning assumptions the planned combat force is adequate even when judged against a scenario with two nearly simultaneous contingencies

Army Force Structure, 1993-07 Reviews the Army s planned force reduction and the roles that will be assigned to Army Reserve and National Guard forces Addresses the factors influencing the Army s decisions on future reserve roles rationale behind its planned reserve force reductions and opportunities to more effectively use the reserves in the downsized force Charts and tables *The U.S. Army and the New National Security Strategy* Lynn E.
