Aircraft United States. President's Aircraft Board, 1925 Interservice Rivalry and Airpower in the Vietnam War Dr. Ian Horwood, 2012-05-28 The objectives of this study are to establish the nature and levels of rivalry and dispute between the United States armed services over matters relating to the military application of airpower during the Vietnam period and to assess the extent to which such rivalry may have distorted US operational policy in Southeast Asia It is probably a truism to suggest that interservice rivalry has always been endemic among military establishments in the modern age yet there are few monographs that deal specifically with the subject Presumably interservice rivalry is so commonplace that it excites little comment among military historians and analysts except in passing However if interservice rivalry is so typical of military organisms then it constitutes one of their defining characteristics and is worthy of study for this reason alone *Army Aviation in Modern Warfare* Rajiv Ghose, 2011 The nation s general environment comprises men and women with high intellect and the wisdom to evaluate the change that is continuously taking place at a frenetic pace The nation and the armed forces also need to act accordingly keeping the national interests uppermost This book commences with a canvas indicating the present combat environment and the changes that are expected to occur in which Army Aviation will be expected to function Subsequent chapters unfold the link Army Aviation will be providing to the management of conflict and combat

challenges in the process of crafting solutions for war time situations This has already been preceded by an environment in which the soldiers in the sky are preparing to fight the next battle History and present developments have indicated that there would be an intermix of combat situations wherein there is no war but there is no peace either There will also be a blurring of lines which transcends the generations in warfare and the means used The unprecedented range of missions will dictate the expanding and modified roles and responsibilities of aviation ranging from kinetic delivery to non kinetic applications of air power The Army fulfills this responsibility even when constrained in resources In a shapeless and seemingly troubled future in dealing with modern warfare this book urges the reader to give thought to the issues dealt with and beyond
