Framework covered in the 2017 ISTE book Learning First Technology Second Kolb found that teachers needed a framework based on good learning practices with technology rather than a focus on technology tools themselves With this in mind she developed the Triple E Framework in which the learning goal not the tool is the most important element of a given lesson Understanding how students learn is built into the Triple E Framework allowing teachers to choose the tool and pedagogical strategies that best fit the learning goal Ultimately the Triple E Framework is meant to support the teacher in making choices with technology and instructional strategies based on the learning goal and the science of learning For Learning First Technology Second readers this book will build on their knowledge providing a brief overview as well as new research scenarios cases and ideas for using technology in education For readers new to the framework this book will provide all of the essential research and tools mentioned above along with an overview of the framework so they can apply what they learn without missing a beat

McGathey,2019-12-09 In this highly anticipated follow up to his memoir One Hundred Virgins the author continues to document in riotous fashion life on a major college campus in a major U S city Though specifically Ohio State University and Columbus Ohio in a sense the particulars don t matter because such experiences though often outrageous are universal ones Joined by his familiar cast of fellow reprobates along with a healthy crop of fresh recruits this crew closes out their final year exploring campus If the first six months were centered around discovery then this epoch finds them operating under the banner of refinement and expansion As always the journey is nothing if not wildly unpredictable and a continual reminder that it s often best to just start running with no end goal in sight If I had to describe how any of us and certainly yours truly ever manages to accomplish anything McGathey observes in these passages I would say it runs something like this we start down a hallway toward the object of our desire at the other end but a rug is pulled out from under us just about on a daily basis before we get anywhere near it Yet every so often after landing on the floor you happen to spot this secret passage in the wall that you never would have noticed otherwise Certainly not by remaining back on the starting block And this passage commonly leads to something as good as or even better than what you originally mapped *Why Didn't Anyone Tell Me?*
