Arqueología Agustiniana:

Arqueología agustiniana José Pérez de Barradas, 1943 **Handbook of South American Archaeology** Helaine Silverman, William Isbell, 2008-04-06 Perhaps the contributions of South American archaeology to the larger field of world archaeology have been inadequately recognized. If so, this is probably because there have been relatively few archaeologists working in South America outside of Peru, and recent advances in knowledge in other parts of the continent are only beginning to enter larger archaeological discourse. Many ideas of and about South American archaeology held by scholars from outside the area are going to change irrevocably with the appearance of the present volume. Not only does the Handbook of South American Archaeology (HSA) provide immense and broad information about ancient South America, the volume also showcases the contributions made by South Americans to social theory. Moreover, one of the merits of this volume is that about half the authors (30) are South Americans, and the bibliographies in their chapters will be especially useful guides to Spanish and Portuguese literature as well as to the latest research. It is inevitable that the HSA will be compared with the multi-volume Handbook of South American Indians (HSAI) with its detailed descriptions of indigenous peoples of South America that was organized and edited by Julian Steward. Although there are heroic archaeological essays in the HSAI by the likes of Junius Bird, Gordon Willey, John Rowe, and John Murra, Steward states frankly in his introduction to Volume Two that archaeology is included by way of background to the ethnographic chapters. *Arqueología de San Agustín: Alto de los ídolos, montículos y tumbas* Luis Duque Gómez, 1979 **Megaliths of the World** Luc Laporte, Jean-Marc Large, Laurent Nespoulous, Chris Scarre, Tara Steimer-Herbet, 2022-08-22 Bringing together the latest research on megalithic monuments throughout the world, 150 researchers offer 72 articles providing a region-by-region account in their specialist areas and a summary of the current state of knowledge. Highlighting salient themes, the book is vital to anyone interested in the phenomenon of megalithic monumentality. **Foundations of Social Inequality** T. Douglas Price, Gary M. Feinman, 2013-06-29 In this authoritative volume, leading researchers offer diverse theoretical perspectives and a wide range of information on the beginnings and nature of social inequality in past human societies. Their illuminating work investigates the role of status differentiation in traditional archaeological debates and major societal transitions. This volume features numerous case studies from the Old and New World, spanning foraging societies to agricultural groups and complex states. Diachronic in view and archaeological in focus, this book will be of significant interest to archaeologists, anthropologists, and students. **Archaeology in Latin America** Benjamin Alberti, Gustavo G. Politis, 2005-08-16 The first overview of current themes in Latin American archaeology, written solely by archaeologists native to the region, making their collected expertise available to an English-speaking audience for the first time. *La escultura en la sociedad agustiniana* Pablo Gamboa Hinestrosa, 1982 **La arqueología entre la historia y la prehistoria** Carlo Emilio Piazzini Suárez, 2011-10-03 Este estudio se dirige a comprender el proceso de formación de la diferencia entre dos campos de conocimiento: arqueología e

historia analizando el concepto de prehistoria También quiere evaluar cómo esa diferencia fue apropiada desde una geografía situada en la frontera externa de los centros metropolitanos de producción de conocimiento arqueológico e histórico como es Colombia A partir de una definición de las características de los enunciados que constituyen el concepto de prehistoria y de una identificación de las principales rupturas o acercamientos efectuados entre los dos campos de conocimiento desde el siglo XIX hasta finales del siglo XX se interroga por la forma en que esta diferencia se articula con tensiones localizadas en ámbitos discursivos más amplios como la pretensión o negativa de cientificidad de los saberes sociales así como el juego de oposiciones metafísicas entre materia y espíritu espacio y tiempo En vista de las implicaciones geopolíticas que se ponen de manifiesto en el modo en que históricamente ha operado dicha articulación se propone una espacialización crítica de la diferencia entre historia y arqueología localizando el problema en Colombia
