Garden Design and Architects' Gardens William Robinson,1892 *What Makes a Garden* Jinny Blom,2023-11-02 One of the year s most engrossing thought provoking books *The English Garden* A reflective second book by Jinny Blom author of *The Thoughtful Garden* one of the world s leading garden designers *What Makes a Garden* builds upon the work of *The Thoughtful Garden* giving a broader idea of how she thinks about garden design In particular it emphasizes her multi disciplinary approach which embraces architecture conservation and art coupled with a strong holistic thread This fascinating and insightful book looks at how a garden should please all five senses how it is an alchemical mix of the inanimate and the living and also how it has to accommodate both the effects of time and the influences of culture This is not intended as a book of rules but rather a way of thinking about garden design and making sure it responds to the particularities of place the culture and the demands of the client Drawing on her work and experience over the last 20 years or so the book gets to the heart of what people want and need from a garden and what makes it different from a natural

landscape Reflecting Jinny's highly individual approach to garden design the book is filled with warmth and character alongside her expert knowledge With a broad appeal this beautiful book is for all garden lovers thoughtful yet practical and informative it marries artistry with functionality The Genius of the Place John Dixon Hunt, Peter Willis, 1988-09-09 A garden classic *The Genius of the Place* reveals that the history of landscape gardening is much more than a history of design and style it opens up a wide perspective of English cultural history showing how landscape gardening was gradually transformed over two centuries into an art that has been widely imitated throughout Europe and North America The English landscape garden is richly documented in this anthology Over 100 illustrations accompany writings that range from Francis Bacon to Jane Austin from the early 1600s when Englishmen began to determine their own concept and form of the garden through the first half of the eighteenth century when its distinctive feature emerged to the heyday of the landscape garden under Capability Brown and the reactions to his pure formalism under Repton and Loudon in the 1800s This edition contains a new introduction and bibliography covering the many developments in garden history during the last dozen years

Gardens in the Modern Landscape Christopher Tunnard, 2014-07-23 Between 1937 and 1938 garden designer Christopher Tunnard published a series of articles in the *British Architectural Review* that rejected the prevailing English landscape style Inspired by the principles of Modernist art and Japanese aesthetics Tunnard called for a new technique in garden design that emphasized an integration of form and purpose The functional garden avoids the extremes both of the sentimental expressionism of the wild garden and the intellectual classicism of the formal garden he wrote it embodies rather a spirit of rationalism and through an aesthetic and practical ordering of its units provides a friendly and hospitable milieu for rest and recreation Tunnard's magazine pieces were republished in book form as *Gardens in the Modern Landscape* in 1938 and a revised second edition was issued a decade later Taken together these articles constituted a manifesto for the modern garden its influence evident in the work of such figures as Lawrence Halprin Philip Johnson and Edward Larrabee Barnes Long out of print the book is here reissued in a facsimile of the 1948 edition accompanied by a contextualizing foreword by John Dixon Hunt *Gardens in the Modern Landscape* heralded a sea change in the evolution of twentieth century design and it also anticipated questions of urban sprawl historic preservation and the dynamic between the natural and built environments Available once more to students practitioners and connoisseurs it stands as a historical document and an invitation to continued innovative thought about landscape architecture **The Garden of Ideas** Richard Aitken, 2010 *The Garden of Ideas* tells an inspiring and engaging story of Australian garden design From the imaginings of emigrant garden makers of the late eighteenth century to the concerns of twenty first century gardeners this book charts its way across four centuries through a handsome and satisfying fusion of images and text *The Garden of Ideas* is embellished with an unparalleled array of images paintings drawings prints plans and photographs each richly evocative of their time and most never previously published Unearthed from around Australia and many from overseas these images carry the story of

Australian garden style down the years in the process criss crossing social and cultural history across the wide extremes of our continent Richard Aitken whose book Botanical Riches was published in 2006 to popular and critical acclaim brings a lifetime of experience to The Garden of Ideas He achieves fresh insights and presents our passion for garden making with wit and flair The Garden of Ideas is a valuable source book for the sophisticated gardener and an indispensable companion for the garden lover Georgian Gardens David Jacques,1984 **Gardens of the Arts and Crafts Movement** Judith B. Tankard,2018-11-27 The ever alluring Arts and Crafts garden is profoundly relevant to our 21st century needs Sam Watters author of Gardens for a Beautiful America In Gardens of the Arts and Crafts Movement landscape scholar Judith B Tankard surveys the inspirations characteristics and development of garden design during this iconic movement Tankard presents a selection of houses and gardens of the era from Great Britain and North America With almost 300 illustrations and photographs and an emphasis on the diversity of designers who helped forge the movement Gardens of the Arts and Crafts Movement is an essential resource for this truly distinct approach to garden design
