Humanities and Social Sciences HSS in higher education and offers novel approaches to reintegrating them. It paradoxically informs readers of how HSS got relegated to the periphery in the capitalist driven higher education market and the pressing need to re-organise higher education to meet the demands of competencies in the same education industry. The contributors, including eminent scholars from academia and industry decision makers and researchers, bring nuanced perspectives on integrating HSS into STEM through the global north and south lens. The book is divided into seven parts providing a comprehensive understanding of the critical position of STEM, its interaction with HSS, some exemplars to elucidate holistic education, the importance of HSS in industry and the roadmap facilitating the organic integration across disciplines. It provides an in-depth analysis of the difficulties HSS faces in science and technical higher education and offers creative solutions to these difficulties, a plausible roadmap for teachers and educational planners wishing to incorporate HSS into STEM higher education. The book stresses the importance of integrating the social sciences and humanities to foster innovation and success in STEM education. It is a must-read for those dedicated to integrating and advancing HSS in STEM higher education, such as educational policymakers, institutional leaders, higher education managers and educational policy and management researchers.
