**European Art of the Fifteenth Century** Stefano Zuffi, 2005 Influenced by a revival of interest in Greco Roman ideals and sponsored by a newly prosperous merchant class fifteenth century artists produced works of astonishingly innovative content and technique The International Gothic style of painting still popular at the beginning of the century was giving way to the influence of Early Netherlandish Flemish masters such as Jan van Eyck who emphasized narrative and the complex use of light for symbolic meaning Patrons favored paintings in oil and on wooden panels for works ranging from large hinged altarpieces to small increasingly lifelike portraits In the Italian city states of Florence Venice and Mantua artists and architects alike perfected existing techniques and developed new ones The painter Masaccio mastered linear perspective the sculptor Donatello produced anatomically correct but idealized figures such as his bronze nude of David and the brilliant architect and engineer Brunelleschi integrated Gothic and Renaissance

elements to build the self supporting dome of the Florence Cathedral This beautifully illustrated guide analyzes the most important people places and concepts of this early Renaissance period whose explosion of creativity was to spread throughout Europe in the sixteenth century     The Oxford History of Western Art Martin Kemp, 2000 The Oxford History of Western Art is the new authority on the development of visual culture in the West over the last 2700 years from the classical period to the end of the twentieth century OHWA is an innovative and challenging reappraisal of how the history of art can be presented and understood None of the currently available general histories of art offers the wealth of perspectives and cross media references of this book Through a carefully devised modular structure readers are given insights not only into how and why works of art were created but also how works in different media relate to each other across time Here uniquely is not the simple linear story of art but a rich series of stories told from varying viewpoints The founding principle of the book has been to use carefully selected groupings of pictures to give readers a sense of the visual texture of the various periods and episodes covered The 167 illustration groups supported by explanatory text and picture captions create a sequence of visual tours not merely a procession of individually great works viewed in isolation but juxtapositions of significant images that powerfully convey a sense of the visual environments in which works of art need to be viewed in order to be understood and appreciated The aim throughout has been to make the shape and nature of these visual presentations a stimulating and rewarding experience allowing readers to become active participants in the process of interpretation and synthesis Another key feature of the narrative is the re definition of traditional period boundaries Rather than relying on conventional labels such as Medieval Renaissance Baroque etc five major phases of significant historical change are established that unlock longer and more meaningful continuities The art of classical antiquity from c 600 BC to the fall of Rome in AD 410 The establishment of visual culture in Europe from 410 to 1527 the sack of papal Rome European visual regimes from 1527 to 1770 The era of revolutions 1770 to 1914 Modernism and after 1914 to 2000 This new framework shows how the major religious and secular functions of art have been forged sustained transformed revived and revolutionized over the ages how the institutions of Church and State have consistently aspired to make art in their own image and how the rise of art history itself has come to provide the dominant conceptual framework within which artists create patrons patronize collectors collect galleries exhibit dealers deal and art historians write The text has been written by a team of 50 specialist authors working under the direction of Professor Martin Kemp one of the UK's most distinguished art historians Whilst bringing their own expertise and vision to their sections each author was also asked to relate their text to a number of unifying themes and issues including written evidence physical contexts patronage viewing and reception techniques gender and racial issues centres and peripheries media and condition the notion of art and current presentations Though the coverage of topics focuses on European notions of art and their transplantation and transformation in North America space is also given to cross fertilizations with other traditions including the art of Latin America the Soviet Union India Africa and Afro Caribbean

Australia and Canada Professor Kemp and his team similarly deal generously with the applied arts and reproductive media such as photography and prints The result is a vibrant vigorous and revolutionary account of Western art serving both as an inspirational introduction for the general reader and an authoritative source of reference and guidance for students *The Art Market in Rome in the Eighteenth Century* Paolo Coen,2018-11-05 Recent interest in the economic aspects of the history of art have taken traditional studies into new areas of enquiry Going well beyond provenances or prices of individual objects our understanding of the arts has been advanced by research into the demands intermediaries and clients in the market Eighteenth century Rome offers a privileged view of such activities given the continuity of remarkable investments by the local ruling class combined with the decisive impact of external agents largely linked to the Grand Tour This book the result of collaboration between international specialists brings back into the spotlight protagonists facts and dynamics that have remained unexplored for many years *The Business of Art* Michelle O'Malley,2005-01-01 In taking a fresh approach to the study of contracts and commissioning *The Business of Art* demonstrates the fundamental quality of negotiation involving the equal input of both parties to the gestation of a new work of art It underlines the contributions made by both parties working together to deciding such issues as the approach to the production of a work the costs involved in its creation and the details of its subject matter **Living on the Edge in Leonardo's Florence** Gene Brucker,2005-03-14 In *Living on the Edge in Leonardo's Florence* an internationally renowned master of the historian's craft provides a splendid overview of Italian history from the Black Death to the rise of the Medici in 1434 and beyond into the early modern period Gene Brucker explores those pivotal years in Florence and ranges over northern Italy with forays into the histories of Genoa Milan and Venice The ten essays three of which have never before been published exhibit Brucker's graceful intelligence his command of the archival sources and his ability to make history accessible to anyone interested in this place and period Whether he is writing about a case in the criminal archives about a citation from Machiavelli or the concept of modernity the result is the same Brucker brings the pulse of the period alive Five of these essays explore themes in the premodern period and delve into Italy's political social economic religious and cultural development Among these pieces is a lucid synoptic view of the Italian Renaissance The last five essays focus more narrowly on Florentine topics including a fascinating look at the dangers and anxieties that threatened Florence in the fifteenth century during Leonardo's time and a mini biography of Alessandra Strozzi whose letters to her exiled sons contain the evidence for her eventful life *Renaissance Papers 2000* Philip Rollinson,
