Art And Thought:

Art and Thought Dana Arnold, Margaret Iversen, 2008-04-15 *Art and Thought* is a collection of newly commissioned essays that explores the relationship between the discipline of art history and important movements in the history of western thought Brings together newly commissioned essays that explore the relationship between the discipline of art history and movements in the history of western thought Considers the impact of the writings of key thinkers including Aristotle Kant and Heidegger on the way in which objects are perceived and understood and histories of art are constructed deconstructed and reconfigured according to varying sets of philosophical frameworks Introduces the reader to the dynamic interface between philosophical reflections and art practices Part of the New Interventions in Art History series which is published in conjunction with the Association of Art Historians *Tolstoy's Art and Thought, 1847-1880* Donna Tussing Orwin, 2013-05-16 My aim is to present Tolstoy's work as he may have understood it himself writes Donna Orwin Reconstructing the intellectual and psychic struggles behind the masterpieces of his early and middle age this major study covers the period during which he wrote *The Cossacks* *War and Peace* and *Anna Karenina* Orwin uses the tools of biography intellectual and literary history and textual analysis to explain how Tolstoy's tormented search for moral certainty unfolded creating fundamental differences among the great novels of the pre crisis period Distinguished by its historical emphasis this book demonstrates that the great novelist who had once seen a fundamental harmony between human conscience and nature's vitality began eventually to believe in a dangerous rift between the two during the years discussed here Tolstoy moved gradually from a celebration of life to instruction about its moral dimensions Paying special attention to Tolstoy's reading of Rousseau Goethe Schopenhauer and the Russian thinker N N Strakhov Orwin also explores numerous other influences on his thought In so doing she shows how his philosophical and emotional conflicts changed form but continued unabated until with his religious conversion of 1880 he surrendered his long attempt to make sense of life through art alone *Tragedy and the Tragic in German Literature, Art, and Thought* Stephen D. Dowden, Thomas P. Quinn, 2014 Essays in this volume seek to clarify the meaning of tragedy and the tragic in its many German contexts art forms and disciplines from literature and philosophy to music painting and history *Trinity and Incarnation in Anglo-Saxon Art and Thought* Barbara C. Raw, 1997-04-10 An illustrated study of the theology of the Trinity as expressed in the literature and art of the late Anglo Saxon period *The Horned Moses in Medieval Art and Thought* Ruth Mellinkoff, 1970-01-01 Good No Highlights No Markup all pages are intact Slight Shelfwear may have the corners slightly dented may have slight color changes slightly damaged spine **The Art and Thought of John La Farge** Katie Kresser, 2017-07-05 *The Art and Thought of John La Farge* Picturing Authenticity in Gilded Age America offers an unprecedented portrait of one of the most celebrated artists of the Gilded Age and opens a window onto nineteenth century American culture The book reveals how the work of John La Farge contributed to a rich philosophical dialogue concerning the trustworthiness of human perception In his struggle

against a common truth of iconic symbols presented by a new mass visual culture La Farge developed a subversive approach to visual representation that focused attention not on the artwork itself but on the complex real encounter of artist subject and medium from which the artwork came Katie Kresser charts La Farge's efforts to assert his own reality his own intrinsic uniqueness in a postwar society that increasingly based personal identity on standardized vocational labels and economic productivity La Farge's work is contrasted with that of Kenyon Cox James Whistler and Henry Adams all of whom for La Farge had fallen prey to the crass new visual environment albeit in very different ways This innovative study suggests that La Farge dealt with issues still relevant in a world characterized by ubiquitous mass media and the proliferation of normative visions

The Monstrous Races in Medieval Art and Thought John Block Friedman, 2000-06-01 Beyond the boundaries of the known Christian world during the Middle Ages there were alien cultures that intrigued puzzled and sometimes frightened the people of Europe The reports of travelers in Africa and Asia revealed that monstrous races of men lived there whose appearance and customs were quite different from the European norm This book examines the impact of these races upon Western art literature and philosophy from their earliest mention until the age of exploration Friedman furnishes a descriptive catalog of the races most of which were real geographically remote peoples some of which were fabled creatures that served as symbols He traces the evolution of European attitudes toward them with particular emphasis on the high Middle Ages when they seem most strongly to have captured the Western imagination Ranging through literature the arts cartography canon law and theology he considers the widely varying ways in which Christians viewed and depicted strange races of men Finally he examines transformations in European consciousness brought about by the discoveries of the exotic peoples of the Americas Whatever their form pygmy giant hirsute cave dweller cyclops or Amazon the monstrous races clearly challenged the traditional concept of man in the Christian world scheme It is the medieval thinking about this challenge that Mr Friedman addresses in this revealing account

The Art and Thought of Heraclitus Heraclitus, 1981-09-03 Behind the superficial obscurity of what fragments we have of Heraclitus thought Professor Kahn claims that it is possible to detect a systematic view of human existence a theory of language which sees ambiguity as a device for the expression of multiple meaning and a vision of human life and death within the larger order of nature The fragments are presented here in a readable order translation and commentary aim to make accessible the power and originality of a systematic thinker and a great master of artistic prose The commentary locates Heraclitus within the tradition of early Greek thought but stresses the importance of his ideas for topical theories of language literature and philosophy

Animals in Art and Thought Francis Klingender, 2019-07-02 Originally published in 1971 *Animals in Art and Thought* discusses the ways in which animals have been used by man in art and literature The book looks at how they have been used to symbolise religious social and political beliefs as well as their pragmatic use by hunters sportsmen and farmers The book discusses these various attitudes in a survey which ranges from prehistoric cave art to the later Middle

Ages The book is especially concerned with uncovering the latent as well as the manifest meanings of animal art and presents a detailed examination of the literary and archaeological monuments of the periods covered in the book The book discusses the themes of Creation myths of the pagan and Christian religion the contribution of the animal art of the ancient contribution of the animal art of the ancient Orient to the development of the Romanesque and gothic styles in Europe the use of beast fables in social or political satire and the heroic associations of animals in medieval chivalry The Screen in Surrealist Art and Thought Haim Finkelstein, 2017-07-05 An interrogation of the notion of space in Surrealist theory and philosophy this study analyzes the manifestations of space in the paintings and writings done in the framework of the Surrealist Movement Haim Finkelstein introduces the screen as an important spatial paradigm that clarifies and extends the understanding of Surrealism as it unfolds in the 1920s exploring the screen and layered depth as fundamental structuring principles associated with the representation of the mental space and of the internal processes that eventually came to be linked with the Surrealist concept of psychic automatism Extending the discussion of the concepts at stake for Surrealist visual art into the context of film literature and criticism this study sheds new light on the way film thinking permeates Surrealist thought and aesthetics In early chapters Finkelstein looks at the concept of the screen as emblematic of a strand of spatial apprehension that informs the work of young writers in the 1920s such as Robert Desnos and Louis Aragon He goes on to explore the way the spatial character of the serial films of Louis Feuillade intimated to the Surrealists a related mode of vision associated with perception of the mystery and the Marvelous lurking behind the surfaces of quotidian reality The dialectics informing Surrealist thought with regard to the surfaces of the real with walls doors and windows as controlling images are shown to be at the basis of Andr   Breton's notion of the picture as a window Contrary to the traditional sense of this metaphor Breton's window is informed by the screen paradigm with its surface serving as a locus of a dialectics of transparency and opacity permeability and reflectivity The main aesthetic and conceptual issues that come up in the consideration of Breton's window metaphor lay the groundwork for an analysis of the work of Giorgio de Chirico Ren   Magritte Max Ernst Andr   Breton and Joan Mir   he concluding chapter considers *Language, Intelligence, and Thought* Robin Barrow, 2015-06-03 In this text first published in 1993 Barrow decisively rejects the traditional assumption that intelligence has no educational significance and contends instead that intelligence is developed by the enlargement of understanding Arguing that much educational research is driven by a concept of intelligence that has no obvious educational relevance Dr Barrow suggests that this is partly due to a widespread lack of understanding about the nature and point of philosophical analysis and partly due to a failure to face up to the value judgements that are necessarily involved in analysing a concept such as intelligence If intelligence is to be of educational significance it must be understood in terms that allow it to be educable Written by a philosopher of education this study offers a reasoned and extended argument in favour of an original view of philosophical analysis It focuses on the issue of intelligence from a philosophical perspective It should be of interest
