The Mongol Conquests Carl Fredrik Sverdrup, 2017-05-04 A scholarly detailed history of how the Mongols created the greatest landlocked empire in history Midwest Book Review The Mongols created the greatest landlocked empire known to history It was an empire created and sustained by means of conquest Initially an insignificant tribal leader Genghis Khan gradually increased his power overcoming one rival after another After he had subjugated all tribes of Inner Asia he struck southward into China and later attacked distant Khwarizm in the Near East Subetei continued to make significant conquests after Genghis Khan died conquering central China and leading a large force into the heart of Europe Between them Genghis Khan and Subetei directed more than 40 campaigns fought more than 60 battles and conquered all lands from Korea in the east to Hungary and Poland in the west This book offers a detailed narrative of the military operations of these two leaders based on early Mongolian Chinese Near Eastern and European sources Making full use of Chinese sourced not translated properly into any European language the account offers details never before given in English works Detailed maps showing the operations support the text Many conventional wisdom views of the Mongols such as their use of terror as a deliberate strategy or their excellence at siege warfare are shown to be incorrect This is a major contribution to our knowledge of the Mongols and their way of warfare History is littered with great leaders leading great armies and conquering large swathes of the world Attila the Hun Alexander the Great the Roman Empire but none perhaps as staggering as that of Genghis Khan I have never heard of Subetei I'm ashamed to say until now in this excellent book by Carl Fredrik Sverdrup Asian history has never particularly appealed to me but this is big history and the author's style makes it compelling and readable Books Monthly This is a very valuable addition to the literature on the Mongol conquests giving us a much clearer idea of the detailed course of their campaigns the world in which they took place and the methods used to win them History of War

Bench, 2002-07-04 This volume examines the early growth of Barcelona and the formation of its ruling classes The city did not at first grow because of overseas trade but because of market oriented agriculture and tribute from Islamic Spain Only after a difficult adjustment did the city develop the commercial foundations which would later ensure its prosperity Barcelona's patriciate rose to prominence during the second stage of growth its rise forming part of a profound restructuring of territorial power in response to the feudal crisis that

challenged traditional authority throughout Catalonia. Patrician families did not model themselves after noble patrilineages but forged marital alliances in which the wife's dowry played a fundamental role. In this new book, the family structure of the patriciate receives close examination and many traditional assumptions about the nature of Mediterranean towns are challenged.
