Around The Zoo With Baboon:

In Quest of the Sacred Baboon Hans Kummer, 2017-03-14 In a tale that begins at a zoo in Zurich and takes us across the deserts of Ethiopia to the Asir Mountains in Saudi Arabia Hans Kummer recreates the adventure and intellectual thrill of the early days of field research on primates Just as Jane Goodall and Dian Fossey introduced readers to the fascinating lives of chimpanzees and gorillas Kummer brings us face to face with the Hamadryas baboon With their furry white mantles and gleaming red hindquarters the Hamadryas appear frequently in the art of the ancient Egyptians who may have interpreted the baboons early morning grooming rituals as sun worshiping rites Back then Hamadryas were thought to be incarnates of Thoth the god of wisdom today they are considered to have one of the most highly structured social systems among primates very close in some respects to that of humans In the 1960s Kummer after conflicts with nomadic warriors managed to track down these elusive baboons near the Danakil Desert and then followed them from dawn to dusk on their treks from one feeding place to another His scientific account of this period reads like a travel memoir as he describes his encounters with the Hamadryas and the people with whom they share the desert Winding his way through cliffs and stubble Kummer records the baboons social life from the development of pair relationships to the way an entire group decides where to march each day Much like the human nomads who cope with the harsh demands of the desert environment the Hamadryas maintain a society that is strict and patriarchal in its details but multilayered and flexible in its largest units We learn for example of the Hamadryas respect for possession that protects family structure and of the cohesion among family leaders that lessens the threat of battle At the same time clear cut personalities emerge from Kummer s account drawing us into the life stories and power struggles of individual baboons Whereas this rich detail holds many implications for natural scientists the colorful way it comes to life makes for a compelling book bound to entertain and educate all readers Originally published in 1995 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

The Good Mother Myth Nancy Reddy, 2025-01-21 Timely and thought provoking Nancy Reddy unpacks and debunks the bad ideas that have for too long defined what it means to be a good mom When Nancy Reddy had her first child she found herself suddenly confronted with the ideal of a perfect mother a woman who was constantly available endlessly patient and immediately invested in her child to the exclusion of all else Reddy had been raised by a single working mother considered herself a feminist and was well on her way to a PhD Why did doing motherhood right feel so wrong For answers Reddy turned to the mid 20th century social scientists and psychologists whose work still forms the basis of so much of what we believe about parenting It seems ludicrous to imagine modern moms taking advice from midcentury researchers Yet their bad ideas about so called good motherhood have seeped so pervasively into our cultural norms In *The Good Mother Myth* Reddy debunks the flawed lab studies sloppy research and straightforward misogyny of researchers from Harry Harlow who claimed to have discovered love by observing monkeys in his lab to the famous Dr Spock whose bestselling parenting guide included just one 1 illustration of a father interacting with his child This timely and thought provoking book will make you laugh cry and want to scream sometimes all at once Blending history of science cultural criticism and memoir *The Good Mother Myth* pulls back the curtain on the flawed social science behind our contemporary understanding of what makes a good mom

The Parable of the Tribes Andrew Bard Schmookler, 1995-01-01 This is a new view of the role of power in social evolution It shows how as human societies evolved intersocietal conflicts necessarily developed and how humanity can choose peace over war

[Zoo Studies](#) Paul A. Rees, 2023-06-01 Zoos and aquariums are culturally and historically important places where families enjoy their leisure time and scientists study exotic animals Many contain buildings of great architectural merit Some people consider zoos little more than animal prisons while others believe they play an important role in conservation and education Zoos have been the subject of a vast number of academic studies whose results are scattered throughout the literature This interdisciplinary volume brings together research on animal behaviour visitor studies zoo history human animal relationships veterinary medicine welfare education enclosure design reproduction legislation and zoo management conducted at around 200 institutions located throughout the world The book is neither pro nor anti zoo and attempts to strike a balance between praising zoos for the good work they have done in the conservation of some species while recognising that they face many challenges in making themselves relevant in the modern world

Through a Lens Darkly Marjorie Hewitt Suchocki, 2015-01-16 What if we ask questions concerning sin and redemption outside of the religious or theological milieu After all sin functions something like religious code language for that which is

problematic in human existence But all humans deal with our fragility and our penchant for harming ourselves or others and all humans seek to resolve these issues Might the religious community learn from those outside our gates Accordingly in this book a theologian seeks to gain insight from the way seven outstanding filmmakers of our time set up the problems of human existence and seek to resolve them over a series of their films Explore with her how Clint Eastwood Woody Allen Spike Lee the Coen brothers John Sayles Ang Lee and Terrence Malick define human problems and explore resolutions mark the overlap with Christianity but more importantly ponder the contrasts You ll never watch films the same way again **Zoos and Animal Rights** Stephen St C. Bostock,2003-09-02 First Published in 2004 Zoos and animal rights would appear to be in conflict yet Stephen Bostock argues that this need not and should not be so Examining the diverse ethical and technical issues involved including human cruelty human domination over animals outside their natural habitat and the nature of wild and domestic animals Bostock analyzes areas in which misconceptions abound A timely and controversial book it explores the long history of zoos as well as current philosophical debates to argue for a controversial view of their role in the modern world Anyone concerned with humanity s relationship with other animals and the natural world should find this a thought provoking book *Animal Tool Behavior* Robert W. Shumaker,Kristina R. Walkup,Benjamin B. Beck,2011-05-02 When published in 1980 Benjamin B Beck s *Animal Tool Behavior* was the first volume to catalog and analyze the complete literature on tool use and manufacture in non human animals Beck showed that animals from insects to primates employed different types of tools to solve numerous problems His work inspired and energized legions of researchers to study the use of tools by a wide variety of species In this revised and updated edition of the landmark publication Robert W Shumaker and Kristina R Walkup join Beck to reveal the current state of knowledge regarding animal tool behavior Through a comprehensive synthesis of the studies produced through 2010 the authors provide an updated and exact definition of tool use identify new modes of use that have emerged in the literature examine all forms of tool manufacture and address common myths about non human tool use Specific examples involving invertebrates birds fish and mammals describe the differing levels of sophistication of tool use exhibited by animals
