Around The Home:

A Material Culture Ethnography of Home-Making in Asylum Reception Friedemann Yi-Neumann, 2025-05-10 This book explores what it takes to create a sense of home while in exile drawing on ethnographic research conducted in German asylum reception facilities from 2016-2020. From a material culture perspective it examines how asylum seekers and migrants with precarious legal status translate aspects of home into challenging environments. Through these translations processual shifts of objects, habits and ideas across borders, migrants work to reassemble a sense of belonging. The book delves into the material, social and individual efforts involved in this homing process while highlighting the ongoing impact of dispossession and loss. By focusing on personal attachments to objects and the broader context of migration, this work offers a unique perspective on forced migration, home cultures and the quest for ontological security. The book will be of interest to scholars, researchers and students in disciplines such as anthropology, sociology and human geography as well as other research interested in ethnographic perspectives on the respective topics.

Home and Family in Japan Richard Ronald, Allison Alexy, 2017-12-04 In the Japanese language the word *ie* denotes both the materiality of homes and family relations within. The traditional family and family house, often portrayed in ideal terms as key foundations of Japanese culture and society, have been subject to significant changes in recent years. This book comprehensively addresses various aspects of family life and dwelling spaces, exploring how homes, household patterns and kin relations are reacting to contemporary social, economic and urban transformations and the degree to which traditional patterns of both houses and households are changing. The book contextualises the shift from the hegemonic post-war image of standard family life to the nuclear family and to a situation now where Japanese homes are more likely to include unmarried singles, childless couples, divorcees, unmarried adult children and elderly relatives either living alone or in nursing homes. It discusses how these new patterns are both reinforcing and challenging typical understandings of Japanese family life.

What Are the Arts and Sciences? Dan Rockmore, 2017-06-06 What constitutes the study of philosophy or physics? What exactly does an anthropologist do or a geologist or historian? In short, what are the arts and sciences? While many of us have been to college and many aspire to go, we may still wonder just what the various disciplines represent and how they interact. What are their origins, methods, applications and unique challenges? What kind of people elect to go into each of these fields and what are the big issues that motivate them? Curious to explore these questions himself, Dartmouth College professor and mathematician Dan Rockmore

asked his colleagues to explain their fields and what it is that they do The result is an accessible entertaining and enlightening survey of the ideas and subjects that contribute to a liberal education The book offers a doorway to the arts and sciences for anyone intrigued by the vast world of ideas **Remembering (Korea: 1950-1953)** Dennis J Ottley,2015-12-22
