Radical Pedagogies Beatriz Colomina, Ignacio G. Galán, Evangelos Kotsioris, Anna-Maria Meister, 2022-05-31 Experiments in architectural education in the post World War II era that challenged and transformed architectural discourse and practice In the decades after World War II new forms of learning transformed architectural education These radical experiments sought to upend disciplinary foundations and conventional assumptions about the nature of architecture as much as they challenged modernist and colonial norms decentered building imagined new roles for the architect and envisioned participatory forms of practice Although many of the experimental programs were subsequently abandoned terminated or assimilated they nevertheless helped shape and in some sense define architectural discourse and practice This book explores and documents these radical pedagogies and efforts to defy architecture's status quo The experiments include the adaptation of Bauhaus pedagogy as a means of unlearning under the conditions of decolonization in Africa a movement to design for everybody including the disabled by architecture students and faculty at the University of California Berkeley the founding of a support network for women interested in the built environment regardless of their academic backgrounds and a design studio in the USSR that offered an alternative to the widespread functionalist approach in Soviet design Viewed through their dissolution and afterlife as well as through their founding stories these projects from the last century raise provocative questions about architecture's role in the new century

Which Proximity in Design Education? Rita Assoreira Almendra, 2025-01-30 This book explores various pedagogical viewpoints and dialectical positions within the field of design education and the concept of proximity it has established with industries and manufacturing Which Proximity in Design Education frames a wide range of approaches in design studios on undergraduate graduate and postgraduate levels and their capacity to render meaningful and novel attitudes and actions beyond the classroom The urgent call for resilience in the way we lead our lives has brought our global boundaries and social tensions to the forefront of the conversation and there is a generation of students fully aware of our collective responsibility in this decisive decade As such educators need to rapidly adapt to new tools and ways of teaching design whilst also being challenged on how to educate the designer for the pressing tasks of the near future It presents optimistic solutions for how education can support renovated mindsets and efforts towards common goals This book contains distinct visions of the world and its problems relating to proximity in design education As such the chapters present diversified solutions to these issues which will be of interest to teachers and researchers working in design education

Catalog of the Avery Memorial Architectural Library of Columbia University. 2d Ed., Enl Avery Library, 1968 The Making of Mexican Modernist Architecture Celia Esther Arredondo Zambrano, 2023-05-03 This book presents the making of Mexican Modernist architecture through five power structures academic social status economic political gender and postcolonial and by interviews and analysis of 13 key Mexican architects These include Luis Barrag n Jos Villagr n Garc a Juan O Gorman Pedro Ram rez V zquez Agust n Hern ndez Abraham Zabludovsky Carlos Mijares Ricardo Legorreta Juan Jos D az Infante Enrique Norton Alberto Kalach Javier Sordo Madaleno and Clara de Buen Although the five power structures framed what was built the testimony of these Mexican architects helps us to recognize and discover subtleties and nuances Their views thereby shed light on what contributed to making Mexican Modernist architecture so distinctive globally Even if these architects were not always aware of the power structures their projects nonetheless supported discrimination marginalization and subjugation In that sense the book also reveals the extent to which these power structures are still present today The Making of Mexican Modernist Architecture s uniqueness lies in uncovering the remarkable buildings that arose amid the five power structures while at the same time questioning their validity It also voices the urgent need today for a new kind of architecture outside these boundaries The book is essential reading for anyone studying Mexican and Latin American architecture

Unidentified Flying Object for Contemporary Architecture Beatrice Lampariello, Andrea Anselmo, Boris Hamzeian, 2022-10-18 The first monographic publication focused on the Florentine UFO group 1968 1978 that conducts a historical analysis of its work reveals its close relationship with the contemporary artistic literary and architectural avant garde and finally investigates its legacy for the contemporary project The contemporary context is defined by a unique conjuncture On one hand we witness the revival of the Radical Architecture that from the avant garde experiments of the origins recovers creative processes and iconographic fragments while nullifying the original ideological and political values On the other hand we see social protests in defense of fundamental rights of democracy as in 1968 With these premises Architecture is now reinvestigating those ephemeral experiments that have endured half a century as new stone monuments capable of indicating new perspectives for both research and design Placing UFO group one of the authors of those still poorly known monuments at the core of the contemporary debate means investigating their formal and seductive aspects but also the ideological political and social values with which objects installations and happenings have been innervated transforming them into devices of an architecture nourished by literature art and political commitment for the foundation of an eloquent and activist project even more radical than the well known Superstudio and Archizoom The collaboration between Beatrice Lampariello an architecture historian specialized in the 1960s and 1970s and False Mirror Office a group of historians and designers engaged in the rediscovery of UFO group lead to a monograph focused on the UFO s work and an evaluation of their legacy relative to contemporary architecture This monograph is composed of three sections 1 History a first ever study of UFO by False Mirror Office via analysis of all archival and bibliographic sources as well as a

F.C.I. Siza Luis Muñoz, Carlos Seoane, Álvaro Siza, 2002 **Dissident Cartographies** José Miguel G. Cortés, 2008 The contemporary city in Spain and Latin America and the ensemble of social cultural and personal relationships are the reference points for this project The new city that converts itself into a metropolis unites millions of people through economic social and cultural integration This publication reflects on the new city through works by international contemporary artists including Antoni Abad Carmela Garca Hanna Collins Mario Navarro Alexander Apostol Minerva Cuevas Carlos Garaioa Grupo de Arte Callejero and Itziar Okariz **Architecture for Spain's Recovered Democracy** Manuel López Segura, 2023-03-30 Historical studies on the involvement of architecture in twentieth century politics have overlooked its contribution to building Spain's democracy This pioneering book seeks to fill that void Between the late 1970s and early 1990s Spain founded representative institutions launched its welfare state and devolved autonomy to its regions The study brings forth the architectural incarnation of that threefold program as it deployed in the Valencian Country a Catalan speaking region on Spain's Mediterranean shores There social democratic authorities mobilized architects planners and graphic artists to devise a newly open public sphere and to recover a local identity that Franco's dictatorship had repressed for decades The research follows the impetus of reform and its contradictions through urban projects designs for cultural amenities and the renovation of governmental and professional bodies Architecture for Spain's Recovered Democracy contributes to current debates on nationalism and the arts the environments of democratic socialism and postmodernism and neoliberalism As a result it widens our understanding of how peripheral regions may yield egalitarian architectures of resistance This book is written for students and researchers in architecture and planning art history spatial politics and Hispanic studies as well as for a general readership interested in inclusive politics in the built environment Neo-Avant-Garde, 2016-08-01 The neo avant garde of the 1950s 60s and 70s is due for a thoroughgoing reassessment This collection of essays represents the first full scale

attempt to deal with the concept from an interdisciplinary standpoint A number of essays in this book concentrate on fine art particularly painting and sculpture thereby adding significantly to the growing art historical literature in the field but a number of the contributions also focus on poetry performance theatre film architecture and music Given that there are also major essays here dealing with geographical blindspots in current neo avant garde studies with thematic issues such as art s entanglement with gender mass culture and politics with key neo avant garde publications and with the purely theoretical problems attaching to the theorisation of the topic this collection offers a multi dimensional approach to the subject which is noticeably lacking elsewhere Taken together these essays represent a consolidated attempt at re thinking the cultural logic of the immediate post World War II period
