LAS PUNTAS LIGERAS DE PROYECTIL DEL SOLUTRENSE EXTRACANTÁBRICO. ANÁLISIS TECNOMORFOLÓGICO E IMPLICACIONES FUNCIONALES MUÑOZ IBÁÑEZ Francisco Javier, 2014-05-16 Sin duda alguna el Solutrense es uno de los periodos más enigmáticos en la evolución de las sociedades de cazadores recolectores del continente europeo A través de estas páginas y a partir de los restos más característicos de su cultura material que han llegado hasta nuestros días se intenta desvelar algunos de sus misterios Tanto las puntas de aletas y pedunculo como las puntas de muesca de tipo mediterráneo constituyen una innovación tecnológica de gran importancia Su análisis detallado y minucioso permite establecer algunas hipótesis funcionales solidamente fundamentales que proporcionan un mayor conocimiento del Solutrense Extracantábrico de la Península Ibérica Además la perspectiva desde la cual se aborda el estudio del instrumental lítico cinegético ha generado una metodología totalmente novedosa que permitir continuar con otros estudios de estas características casi ausentes en nuestro país

As las conclusiones que aporta este trabajo hacen factible pensar que los inicios de la arqueología prehistórica pueden situarse en este momento por lo menos en la fachada mediterránea del este peninsular

Prehistoric Projectile Points Found Along the Atlantic Coastal Plain Wm Jack Hranicky, 2011 This publication was written to provide a source for archaeological projectile point typology for a region of the U S that over the years has been traditionally divided into Northeast culture area Middle Atlantic culture area Southeastern culture area These divisions are based primarily on lithic technology and settlement patterns While this focus tends to serve archaeological investigations most of the prehistoric Indian habitation occupation requires greater definition and appraisal from other sources within the archaeological community Even among artifact collectors there is a tendency to parcel these areas into the classic culture area concepts This publication makes no attempts to refocus archaeology but to show the vast overlaps of numerous point technologies This is especially true over time so that for lithic point technology in general there is a Panindian focus that can be applied to almost every tool type along the Atlantic Coast This publication provides most of the published types from along the Atlantic seaboard Each type has a basic description and the illustration is an ideal point for that type A set of point references is provided these make excellent and needed sources for the study of projectile point studies
