Nineteenth-Century Theories of Art Joshua C. Taylor,1987 This unique and extraordinarily rich collection of writings offers a thematic approach to

understanding the various theories of art that illumined the direction of nineteenth century artists as diverse as Tommaso Minardi and Georges Seurat It is significant that during the nineteenth century most artists felt compelled to found their artistic practice on a consciously established premise Think Art Jean-Marie Schaeffer,1998 Schaeffer says the object of aesthetics should be the behaviors the relations that link us to the world of the works and to the world in general **Art Theory** Christopher Cornford,1978 Art Theory for Beginners Richard Osborne,Dan Sturgis,2009 From Paleolithic cave painting to postmodernism Art Theory For Beginners i is a concise and entertaining survey of the major historical and current debates on art Painters theorists and philosophers are all included to show how the idea of art has developed over the last 5 000 years Art is a visual representation of a range of concepts stories and emotions including curiosity humanity political statements and the Self Art Theory for Beginners examines and explains the development of the different ways in which people study interpret and appreciate art in its rich variety of forms Art Theory For Beginners is a clear and entertaining introduction to the complex questions that stem from the simple idea of art Early Modern Art Theory. Visual Culture and Ideology, 1400-1700 James Hutson,2016-03 The development of art theory over the course of the Renaissance and Baroque eras is reflected in major stylistic shifts In order to elucidate the relationship between theory and practice we must consider the wider connections between art theory poetic theory natural philosophy and related epistemological matrices Investigating the interdisciplinary reality of framing art making and interpretation this treatment rejects the dominant synchronic approach to history and historiography and seeks to present anew a narrative that ties together various formal approaches focusing on stylistic transformation in particular artist s oeuvres Michelangelo Annibale Carracci Guercino Guido Reni Poussin and others and the contemporary environments that facilitated them Through the dual understanding of the art theoretical concept of the Idea an evolution will be revealed that illustrates the embittered battles over style and the overarching intellectual shifts in the period between art production and conceptualization based on Aristotelian and Platonic notions of creativity beauty and the goal of art as an exercise in encapsulating the divine truth of nature *Art Theory as Visual Epistemology* Harald Klinke,2014-06-26 How can we know What does knowledge mean These were the fundamental questions of epistemology in the 17th century In response to continental rationalism the British empiricist John Locke proposed that the only knowledge humans can have is acquired a posterior In a discussion of the human mind he argued the source of knowledge is sensual experience mostly vision Since vision and picture making are the realm of art art theory picked up on questions such as are pictures able to represent knowledge about the world How does the production of images itself generate knowledge How does pictorial logic differ from linguistic logic How can artists contribute to a collective search for truth Questions concerning the epistemic potential of art can be found throughout the centuries up until the present day However these are not questions of art alone but of the representational value of images in general Thus the history of art theory can contribute much to recent discussions in Visual Studies and Bildwissenschaften by

showing the historic dimension of arguments about what images are or should be What is knowledge is as much a philosophic question as What is an image Visual epistemology is a new and promising research field that is best investigated using an interdisciplinary approach that addresses a range of interconnected areas such as internal and external images and the interplay of producer and perceiver of images This publication outlines this territory by gathering together several approaches to visual epistemology by many distinguished authors **Artistic Theory in Italy, 1450-1600** Anthony Blunt, 1940 Leonardo da Vinci Alberti Michelangelo Vasari Social position of the artist Religious art Minor writers of the High Renaissance Later mannerists **Art and Art-Attempts** Christy Mag Uidhir, 2013-06-27 Christy Mag Uidhir presents a new theory of art Few philosophers agree about what it is for something to be art but most or all agree that art must be somehow intention dependent Mag Uidhir shows that this requirement has radical implications for the nature of art and of art forms for the ontology of art and for issues about authorship Semiotics and Art Theory Madeleine Schechter, 2008
