Pompeii, Its Life and Art August Mau,2020-09-28 The Social History of Roman Art Peter Stewart,2008-05-29 An introduction to the study of ancient Roman art in its social context The Freedman in Roman Art and Art History Lauren Hackworth Petersen,2011-09-19 From monumental tombs and domestic decoration to acts of benefaction and portraits of ancestors Roman freed slaves or freedmen were prodigious patrons of art and architecture Traditionally however the history of Roman art has been told primarily through the monumental remains of the emperors and ancient writers who worked in their circles In this study Lauren Petersen critically investigates the notion of freedman art in scholarship dependent as it is on elite authored texts that are filled with hyperbole and stereotypes of freedmen such as the memorable fictional character Trimalchio a boorish ex slave in Petronius Satyricon She emphasizes integrated visual ensembles within defined historical and social contexts and aims to show how material culture can reflect preoccupations that were prevalent throughout Roman society Interdisciplinary in scope this book explores the many ways that monuments and artistic commissions by freedmen spoke to a much more complex reality than that presented in literature *The Invention of Art History in Ancient Greece* Jeremy Tanner,2006-03-23 The ancient Greeks developed their own very specific ethos of art appreciation advocating a rational involvement with art This book explores why the ancient Greeks started to write art history and how the writing of art history transformed the social functions of art in the Greek world It looks at the invention of the genre of portraiture and the social uses to which portraits were put in the city state Later chapters explore how artists sought to enhance their status by writing theoretical treatises and producing works of art intended for purely aesthetic contemplation which ultimately gave rise to the writing of art history and to the development of art collecting The study which is illustrated throughout and draws on contemporary perspectives in the sociology of art will prompt the student of classical art to rethink fundamental assumptions about Greek art and its cultural and social implications **The Routledge Companion to African Diaspora Art History** Eddie Chambers,2024-10-31 This is an authoritative companion that is global in scope recognizing the presence of African Diaspora artists across the world It is a bold and broad reframing of this neglected branch of art history challenging dominant presumptions about the field Diaspora pertains to the global scattering or dispersal of in this instance African peoples as well as their patterns of movement from the mid twentieth century onwards Chapters in this book emphasize the importance of cross fertilization interconnectedness and intersectionality in the framing of African Diaspora art history The book stresses the complexities of artists born within or living and working within the African continent alongside the complexities of Africa born artists who have migrated to other parts of the world The group of international contributors emphasizes and accentuates the interplay between for example Caribbean art and African Diaspora art or Latin American art and African Diaspora art or Black British art and African Diaspora art The book will be of interest to scholars

and students working in art history the various branches of African studies African American studies African Diaspora studies Caribbean studies and Latin American studies The New Art History Jonathan P. A Cornucopia for a Polymath: Studies in Archaeology, Architecture and Art History for John Burnett Mitchell Jane Chick, Richard Hodges, Ian Riddler, 2025-09-11 This festschrift celebrates John Mitchell s 80th birthday showcasing his remarkable breadth as a polymath art historian From Anglo Saxon bibles to Roman mosaics and medieval knick knacks his infectious curiosity and

deep insight defy academic categorisation Critical Terms for Art History, Second Edition Robert S. Nelson, Richard Shiff, 2010-03-15 Art has always been contested terrain whether the object in question is a medieval tapestry or Duchamp's Fountain. But questions about the categories of art and art history acquired increased urgency during the 1970s when new developments in critical theory and other intellectual projects dramatically transformed the discipline. The first edition of *Critical Terms for Art History* both mapped and contributed to those transformations offering a spirited reassessment of the field's methods and terminology. Art history as a field has kept pace with debates over globalization and other social and political issues in recent years making a second edition of this book not just timely but crucial. Like its predecessor this new edition consists of essays that cover a wide variety of loaded terms in the history of art from sign to meaning ritual to commodity. Each essay explains and comments on a single term discussing the issues the term raises and putting the term into practice as an interpretive framework for a specific work of art. For example Richard Shiff discusses *Originality in Vija Celmins's To Fix the Image in Memory* a work made of eleven pairs of stones each consisting of one original stone and one painted bronze replica. In addition to the twenty-two original essays this edition includes nine new ones performance style memory monument body beauty ugliness identity visual culture visual studies and social history of art as well as new introductory material. All help expand the book's scope while retaining its central goal of stimulating discussion of theoretical issues in art history and making that discussion accessible to both beginning students and senior scholars. The Oxford History of Western Art Martin Kemp, 2000 The Oxford

History of Western Art is the new authority on the development of visual culture in the West over the last 2700 years from the classical period to the end of the twentieth century. OHTWA is an innovative and challenging reappraisal of how the history of art can be presented and understood. None of the currently available general histories of art offers the wealth of perspectives and cross media references of this book. Through a carefully devised modular structure, readers are given insights not only into how and why works of art were created but also how works in different media relate to each other across time. Here uniquely is not the simple linear story of art but a rich series of stories told from varying viewpoints. The founding principle of the book has been to use carefully selected groupings of pictures to give readers a sense of the visual texture of the various periods and episodes covered. The 167 illustration groups supported by explanatory text and picture captions create a sequence of visual tours not merely a procession of individually great works viewed in isolation but juxtapositions of significant images that powerfully convey a sense of the visual environments in which works of art need to be viewed in order to be understood and appreciated. The aim throughout has been to make the shape and nature of these visual presentations a stimulating and rewarding experience allowing readers to become active participants in the process of interpretation and synthesis. Another key feature of the narrative is the redefinition of traditional period boundaries. Rather than relying on conventional labels such as Medieval, Renaissance, Baroque etc, five major phases of significant historical change are established that unlock longer and more meaningful continuities. The art of classical antiquity from c 600 BC to the fall of Rome in AD 410. The establishment of visual culture in Europe from 410 to 1527. The sack of papal Rome. European visual regimes from 1527 to 1770. The era of revolutions 1770 to 1914. Modernism and after 1914 to 2000. This new framework shows how the major religious and secular functions of art have been forged, sustained, transformed, revived and revolutionized over the ages; how the institutions of Church and State have consistently aspired to make art in their own image; and how the rise of art history itself has come to provide the dominant conceptual framework within which artists create, patrons patronize, collectors collect, galleries exhibit, dealers deal and art historians write. The text has been written by a team of 50 specialist authors working under the direction of Professor Martin Kemp, one of the UK's most distinguished art historians. Whilst bringing their own expertise and vision to their sections, each author was also asked to relate their text to a number of unifying themes and issues including written evidence, physical contexts, patronage, viewing and reception techniques, gender and racial issues, centres and peripheries, media and condition, the notion of art and current presentations. Though the coverage of topics focuses on European notions of art and their transplantation and transformation in North America, space is also given to cross-fertilizations with other traditions including the art of Latin America, the Soviet Union, India, Africa and Afro-Caribbean, Australia and Canada. Professor Kemp and his team similarly deal generously with the applied arts and reproductive media such as photography and prints. The result is a vibrant, vigorous and revolutionary account of Western art serving both as an inspirational introduction for the general reader and an authoritative source of

reference and guidance for students
