Art And Knowledge:

Art and Knowledge James O. Young, 2013 **Art, Research, Philosophy** Clive Cazeaux, 2017-04-11 Art Research Philosophy explores the emergent field of artistic research art produced as a contribution to knowledge As a new subject it raises several questions What is art as research Don t the requirements of research amount to an imposition on the artistic process that dilutes the power of art How can something subjective become objective What is the relationship between art and writing Doesn t description always miss the particularity of the artwork This is the first book length study to show how ideas in philosophy can be applied to artistic research to answer its questions and to make proposals for its future Clive Cazeaux argues that artistic research is an exciting development in the historical debate between aesthetics and the theory of knowledge The book draws upon Kant phenomenology and critical theory to show how the immediacies of art and experience are enmeshed in the structures that create knowledge The power of art to act on these structures is illustrated through a series of studies that look closely at a number of contemporary artworks This book will be ideal for postgraduate students and scholars of the visual and creative arts aesthetics and art theory The Open Access version of this book available at www.taylorandfrancis.com has been made available under a Creative Commons Attribution NonCommercial No

Postsensual Aesthetics James Voorhies, 2023-02-28 Contemporary art exhibitions appeal to cognition as well as the senses modeling a new and expansive understanding of global aesthetics In this original work of aesthetic theory James Voorhies argues that we live in the shadow of old ways of thinking about art that emphasize the immediate visual experience of an autonomous art object But theory must change as artistic and curatorial production has changed It should encompass the full range of activities through which we encounter art and exhibitions in which reading and thinking are central to the aesthetic experience Voorhies advances the theoretical framework of a postsensual aesthetics which does not mean we are beyond a sensual engagement with objects but rather embraces the cognitive connections with ideas that unite art and knowledge

production Cognitive engagements with art often begin with publications conceived as integral to exhibitions conveying the knowledge and research artists and curators produce and continuing in time and space beyond traditional curatorial frames The idea and not just visual immediacy is now art s defining moment Voorhies reframes aesthetic criteria to account for the liminal cognitive spaces inside and outside of the exhibition Surveying a wide range of artists curators exhibitions and related publications he repositions the aesthetic theory of Theodor Adorno and draws inspiration from Rosalind Krauss and Fredric Jameson to describe a contemporary logic of the curatorial He demonstrates how even as we increasingly expect to learn from contemporary art we must avoid an instrumentalist and reductive view of art as a mere source of information As Voorhies shows through an analysis of two major global exhibitions dOCUMENTA 13 artistic director Carolyn Christov Bakargiev and Documenta11 artistic director Okwui Enwezor and of Ute Meta Bauer s curatorial work at the Centre for Contemporary Art Singapore it is imperative for artistic research to retain its unique role in the production of knowledge

The Theory of the Arts Francis Edward Sparshott, 2014-07-14 In a systematic overview of classical and modern contributions to aesthetics Professor Sparshott argues that all four lines of theory and no others are necessary to coherent thinking about art Originally published in 1982 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Science Meets Philosophy** Hans Christian Garmann Johnsen, 2023-04-26 The book is an attempt to bring together what are often seen as incommensurable scientific and philosophical positions Its core argument is that a main reason for the divisions about what constitutes scientific knowledge relates to disagreements on philosophical issues The book explores what these disagreements are about and discusses whether they can be overcome Taking a historical perspective the book traces the divides in science back to three main philosophical traditions realism idealism and scepticism It maps how these have inspired three main current positions in science logical empiricism phenomenology and sociology of scientific knowledge The book is intended for a general audience concerned with today s debates on scientific knowledge and society It will be useful for students and researchers studying philosophy of science sociology of scientific knowledge realism phenomenology positivism logical empiricism analytical philosophy and sustainable scientific knowledge **Handbook of Research on Teaching Literacy Through the Communicative and Visual Arts** James Flood, Shirley Brice Heath, Diane Lapp, 2011 The Handbook of Research on Teaching Literacy Through the Communicative and Visual Arts a comprehensive overview of research on this topic extends conceptualizations of literacy to include all of the communicative arts reading writing speaking listening viewing and the visual arts of drama dance film art video and computer technology **Art, Aesthetics, and the Brain**

Flanagan, 2022-07-20 The apostle Peter is a pillar of the church whose writing has been overlooked until recently when scholarship remedied this gap significantly elevating Peter's letters However one critical area has been omitted Within the Petrine writing is a robust empowered and beautiful mystical theology which makes Peter an unexpected but vital Christian mystic In exploring his love of artwork German theologian and priest Romano Guardini developed the Threefold Seeing which has been brought to light by Yvonne Dohna Schlobitten of the Pontificate Gregorian University His unique method of viewing the artist artwork and observer develops a way of encountering the world and word Instead of looking at the world or the biblical text through separate vantage points the Threefold Seeing integrates all disciplines under greater view of God the artist of all creation The Letters of an Unexpected Mystic employs Guardini's Threefold Seeing to encounter the mystic Peter and the Petrine mystical theology The result is a book that provides its readers with a means to become the Christian Karl Rahner wrote about in 1971 The devout Christian of the future will either be a mystic one who has experienced something or he will cease to be anything at all **Works** Horace H.
