Darraby, 2009 *Visual Arts and the Law* Ms Judith B Prowda, 2013-10-01 This essential handbook offers art professionals and collectors an accessible legal analysis of important principles in art law as well as a practical guide to legal rights when creating buying selling and collecting art in a global market Although the book is international in scope there is a particular focus on the US as a major art centre and the site of countless key international court cases This authoritative but accessible and wide ranging volume is essential reading for arts advisors collectors dealers auction houses museums investors artists attorneys and students of art and law **The Old Bridge of Mostar and Increasing Respect for Cultural Property in Armed Conflict** Jadranka Petrovic, 2012-11-01 Based on the study of the Old Bridge of Mostar this book concerns the adequacy of the international humanitarian law regime relating to the targeting and destruction of immovable cultural property in armed conflict at both normative and enforcement level **Cultural Property Acquisitions** Aimée L Taberner, 2016-06-16 Museum staff whether new to the field or working with collections for decades are often overwhelmed by the complexities of acquiring cultural property particularly antiquities and archaeological material Collecting practices now require a greater

degree of transparency and cooperation with various stakeholders than in the past and are under greater scrutiny to be in line with current legal requirements and ethical expectations This book provides a concise unbiased and practical resource for those tasked with navigating the complicated and rapidly changing legal and ethical landscape governing the acquisition of cultural property and archaeological material *Legal Theory of Auction* Kristijan Poljanec, 2022-09-09 The widespread understanding of auction structure considers auction as consisting of three contracts contract between the seller and the auctioneer contract between the auctioneer and the buyer and the sale contract between the seller and the buyer The book challenges this concept arguing that the traditional tripartite concept of auction is too narrow and does not correspond to the actual structure of auction relations Demonstrating that an auction structure consists of a plethora of legal relationships including noncontractual relations this book explores the legal concept of auction sale and the structure of accompanying relations The book provides a historical overview of auctions and different auction models Following a brief introduction to the economic theory auction models are examined against the following legal criteria price formation publicity parties autonomy legal form and applied technology to find a legal concept and nature of auction The book explores the legal position of key auction figures and auction objects to identify the categories of legal relations that appear at auction It explores the legal nature of the main contract as well as the relations between the consignor and the auctioneer the auctioneer and the bidders the bidders themselves the consignor and the bidders The book covers relations arising from droit de suite financial and bidding agreements to provide a comprehensive overview of lesserknown legal relations that commonly arise in auction practice **New Art Examiner** , 1995 The independent voice of the visual arts [The Expert versus the Object](#) Ronald D. Spencer, 2004-04-01 The authenticity of visual art has always commanded the attention of experts dealers collectors and the art minded public Is it real or original is a way of asking what am I buying What do I own What am I looking at And today more sophisticated questions are being asked How is authenticity determined and what weight does this determination have in court This book of essays proposes to answer those questions Three lines of inquiry are basic to determining authenticity a connoisseur s evaluation historical documentation or provenance and scientific testing A connoisseur is an expert who evaluates the rightness of a work based on much careful scrutiny of many works by an artist and familiarity with that artist s usual manner of working with materials In determining provenance a researcher traces the physical object from the artist through a chain of ownership to the present owner simple enough in concept though it assumes that the documentation is not faked or inaccurate The goal is to ensure that the object is the same one that left the artist s hand Scientific testing although sometimes useful is often longer on promise than result Dating paint or wood samples for instance can show that a painting was made in Rembrandt s lifetime but it cannot prove that it is by Rembrandt s hand If expert opinion is divided and large sums of money are involved a dispute over authenticity may end up in a court of law where evaluation of expert opinion evidence can be problematic The essays in this book clarify the nature of the methods

outlined above and explain based on case law the present status of authentication issues in court Contributors include experts from Christie's London Sotheby's New York and the former director of the Frick Collection as well as leading art historians and art dealers an art conservator a forensic graphologist a philanthropist and collector and a specialist in French art law Their collective knowledge on issues of authenticity will be invaluable for anyone interested in the world of visual art
