That Came to Sarnath, the Original Short Story H.p. Lovecraft,2015-01-08 There is in the land of Mnar a vast still lake that is fed by no stream and out of which no stream flows Ten thousand years ago there stood by its shore the mighty city of Sarnath but Sarnath stands there no more It is told that in the immemorial years when the world was young before ever the men of Sarnath came to the land of Mnar another city stood beside the lake the gray stone city of Ib which was old as the lake itself and peopled with beings not pleasing to behold Very odd and ugly were these beings as indeed are most beings of a world yet inchoate and rudely fashioned It is written on the brick cylinders of Kadatheron that the beings of Ib were in hue as green as the lake and the mists that rise above it that they had bulging eyes pouting flabby lips and curious ears and were without voice It is also written that they descended one night from the moon in a mist they and the vast still lake and gray stone city Ib However this may be it is certain that they worshipped a sea green stone idol chiseled in the likeness of Bokrug the great water lizard before which they danced horribly when the moon was gibbous The Empty Sea Ilaria Perissi,Ugo

Bardi,2021-02-12 The Blue Economy is used to describe all of the economic activities related to the sea with a special emphasis on sustainability Traditional activities such as fisheries but also undersea mining tourism and scientific research are included as well as the phenomenal growth of aquaculture during the past decade All of these activities and the irresistible prospect of another new frontier has led to enthusiastic and most likely overenthusiastic assessments of the possibilities to exploit the sea to feed the world provide low cost energy become a new source of minerals and other future miracles This book makes sense of these trends and of the future of the blue economy by following our remote ancestors who gradually discovered the sea and its resources describing the so called fisherman's curse or why fishermen have always been poor explaining why humans tend to destroy the resources on which we depend and assessing the realistic expectations for extracting resources from the sea Although the sea is not so badly overexploited as the land our demands on ecosystem services are already above the oceans sustainability limits Some new ideas including fishing down for untapped resources such as plankton could lead to the collapse of the entire marine ecosystem How Neanderthals crossed the sea in canoes how it was possible for five men on a small boat to kill a giant whale what kind of oil the virgins of the Gospel put into their lamps how a professor of mathematics Vito Volterra discovered the equations of fishing why it has become so easy to be stung by a jellyfish while swimming in the sea and how to play Moby Dick a simple board game that simulates the overexploitation of natural resources are just some of the questions that you will be able to answer after reading this engaging and insightful book about the rapidly expanding relationship between humanity and the sea *A Subtler Magick* S. T. Joshi,1996-12-01 He
