

Doomsday Men

Richard Morris

Doomsday Men:

The Doomsday Men ,1949 Doomsday Men P. D. Smith,2008-09-25 It was the weapon to end all weapons the doomsday device A huge nuclear bomb so powerful that it could envelop the entire planet in a cloud of radioactive dust and bring about instant extinction This is the untold story of the Cold War s most insane plan the men behind it and how it nearly happened It is also the history of humanity s nightmare vision of a superweapon showing how popular culture from the stories of H G Wells and Jules Verne to films such as Planet of the Apes Mad Max and Dr Strangelove itself have both shaped and reflected our darkest dreams **Beyond God the Father** Mary Daly,2015-12-08 Certainly one of the most promising theological statements of our time The Christian Century Not for the timid this brilliant book calls for nothing short of the overthrow of patriarchy itself The Village Voice *How the End Begins* Ron Rosenbaum,2012-02-21 An alarming deeply reported analysis of how close and how often the world has come to nuclear annihilation and why we are once again on the brink **The Doomsday Men** J. B. Priestley,2014-05 Three men each on a separate mission converge in the California desert The discover their situations are intertwined and join forces to unravel their mysteries The trail of clues leads to an explosive conclusion *Arming Mother Nature* Jacob Darwin Hamblin,2013-05-23 Hamblin argues that military planning for World War III essentially created catastrophic environmentalism the idea that human activity might cause global natural disasters This awareness Hamblin shows emerged out of dark ambitions as governments poured funds into environmental science after World War II **Open for Business** Judith A. Layzer,2012 A detailed analysis of the policy effects of conservatives decades long effort to dismantle the federal regulatory framework for environmental protection

Contemporary Science Fiction Authors Robert Reginald,2009-01-01 This bio bibliography of the golden age of the science fiction field includes 308 biographies compiled from questionnaires sent to the authors and chronological lists of 483 writers published works This facsimile reprint of the 1975 edition includes a title index introduction and minor corrections A now classic guide to the major and minor SF writers active in the early 1970s Three Middle-Irish Homilies on the Lives of Saints Patrick, Brigit, and Columba Whitley Stokes,1877 **The Doomsday Men** Kenneth Bulmer,1968 **Wisconsin Library Bulletin** ,1935 Public Spirit ,1808 **Nuclear Fictions** Michael Gardiner,2024-11-30 In this book Michael Gardiner suggests that the conception of the war ending weapon was tied up with a longer commitment to unified space and singular progress The mission for total weapons can be seen rising with the highly technical defensive war of the later nineteenth century and passing through twentieth century atomic research then the targeting of the outsides of commercial empire and the post war consensus with deterrence as its foundation The end of the Cold War brought an opportunity to fully naturalise deterrence but also brought a tacit acceptance of nuclear violence while forms of violence against the individual were rigorously sought out If the world unifying role of deterrence has always been undermined by the rise of rival empires it has also been questioned by critical communities including the consensus sceptics of the 1950s 60s 1980s 90s Nuclear

Criticism and readers of nuclear ism millennial campaigns for Scottish independence and twenty first century descriptions of nuclear colonialism Recently it has become more obvious that an Anglosphere concept of worldly deterrence was bound to a singular and ultimately nihilistic idea of progress bio Michael Gardiner is Professor in the Department of English and Comparative Literature at the University of Warwick Keep Watching the Skies! Bill Warren,2009-11-30 Bill Warren s Keep Watching the Skies was originally published in two volumes in 1982 and 1986 It was then greatly expanded in what we called the 21st Century Edition with new entries on several films and revisions and expansions of the commentary on every film In addition to a detailed plot synopsis full cast and credit listings and an overview of the critical reception of each film Warren delivers richly informative assessments of the films and a wealth of insights and anecdotes about their making The book contains 273 photographs many rare 35 in color has seven useful appendices and concludes with an enormous index This book is also available in softcover format ISBN 978 1 4766 6618 1 **The Country You Have Never Seen** Joanna Russ,2007-07-01 In 1959 at the age of 22 Joanna Russ published her first science fiction story Nor Custom Stale in The Magazine of Science Fiction and Fantasy In the forty five years since Russ has continued to write some of the most popular creative and important novels and stories in science fiction She was a central figure along with contemporaries Ursula K Le Guin and James Tiptree in revolutionizing science fiction in the 1960s and 1970s and her 1970 novel The Female Man is widely regarded as one of the most successful and influential depictions of a feminist utopia in the entire genre The Country You Have Never Seen gathers Joanna Russ s most important essays and reviews revealing the vital part she played over the years in the never ending conversation among writers and fans about the roles boundaries and potential of science fiction Spanning her entire career the collection shines a light on Russ s role in the development of new wave science fiction and feminist science fiction while at the same time providing fascinating insight into her own development as a writer The Rise of Nuclear Fear Spencer R. Weart,2012-04-02 After a tsunami destroyed the cooling system at Japan s Fukushima Nuclear Power Plant triggering a meltdown protesters around the world challenged the use of nuclear power Germany announced it would close its plants by 2022 Although the ills of fossil fuels are better understood than ever the threat of climate change has never aroused the same visceral dread or swift action Spencer Weart dissects this paradox demonstrating that a powerful web of images surrounding nuclear energy holds us captive allowing fear rather than facts to drive our thinking and public policy Building on his classic Nuclear Fear Weart follows nuclear imagery from its origins in the symbolism of medieval alchemy to its appearance in film and fiction Long before nuclear fission was discovered fantasies of the destroyed planet the transforming ray and the white city of the future took root in the popular imagination At the turn of the twentieth century when limited facts about radioactivity became known they produced a blurred picture upon which scientists and the public projected their hopes and fears These fears were magnified during the Cold War when mushroom clouds no longer needed to be imagined they appeared on the evening news Weart examines nuclear anxiety in sources as

diverse as Alain Resnais's film *Hiroshima Mon Amour* Cormac McCarthy's novel *The Road* and the television show *The Simpsons* Recognizing how much we remain in thrall to these setpieces of the imagination Weart hopes will help us resist manipulation from both sides of the nuclear debate Legends of the holy rood Richard Morris,1871 **Legends of the Holy Rood; symbols of the passion and cross-poems** Richard Morris,1871 *Legends of the Holy Rood* Morris,1871

The Oxford Handbook of Postwar European History Dan Stone,2012-05-17 The postwar period is no longer current affairs but is becoming the recent past As such it is increasingly attracting the attentions of historians Whilst the Cold War has long been a mainstay of political science and contemporary history recent research approaches postwar Europe in many different ways all of which are represented in the 35 chapters of this book As well as diplomatic political institutional economic and social history the *The Oxford Handbook of Postwar European History* contains chapters which approach the past through the lenses of gender espionage art and architecture technology agriculture heritage postcolonialism memory and generational change and shows how the history of postwar Europe can be enriched by looking to disciplines such as anthropology and philosophy The Handbook covers all of Europe with a notable focus on Eastern Europe Including subjects as diverse as the meaning of Europe and European identity southern Europe after dictatorship the cultural meanings of the bomb the 1968 student uprisings immigration Americanization welfare leisure decolonization the Wars of Yugoslav Succession and coming to terms with the Nazi past the thirty five essays in this Handbook offer an unparalleled coverage of postwar European history that offers far more than the standard Cold War framework Readers will find self contained state of the art analyses of major subjects each written by acknowledged experts as well as stimulating and novel approaches to newer topics Combining empirical rigour and adventurous conceptual analysis this Handbook offers in one substantial volume a guide to the numerous ways in which historians are now rewriting the history of postwar Europe
