 Patricia L. Kolencik, Carianne Bernadowski, 2007-05-31 Help children learn coping skills through literature This book answers
 the often repeated question Is there a children's book I can read in my classroom to give children insight into significant life
 events Literature ideas and activities help students cope with real life situations such as bullying that interfere with school
 This book will assist educators in guiding and nurturing children's special issues and concerns with outstanding ready to go
 reading and writing lessons This professional resource for K-6 educators and parents uses literature with identifiable
 characters to help children who are facing challenges in their lives Like bullying peer acceptance peer pressure and being
 different as well as family situations such as death divorce adoption and sibling rivalry **Running Like a Girl** Alexandra
 Heminsley, 2014-06-10 In her twenties Alexandra Heminsley spent more time drinking white wine than she did in pursuit of
 athletic excellence When she decided to take up running in her thirties she had high hopes for a blissful runner's high and
 immediate physical transformation After eating three slices of toast with honey and spending ninety minutes on iTunes
 creating the perfect playlist she hit the streets and failed miserably The stories of her first runs turn the common notion that
 we are all born to run on its head and exposes the truth about starting to run it can be brutal Running Like a Girl tells the
 story of getting beyond the brutal part how Alexandra makes running a part of her life and reaps the rewards not just the
 obvious things like weight loss health and glowing skin but self confidence and immeasurable daily pleasure along with a new
 closeness to her father a marathon runner and her brother with whom she ultimately runs her first marathon **Book**

Venkatesan,Sandeep K. Shukla,2023-07-27 Cyber security is one of the most critical problems faced by enterprises government organizations education institutes small and medium scale businesses and medical institutions today Creating a cyber security posture through proper cyber security architecture deployment of cyber defense tools and building a security operation center are critical for all such organizations given the preponderance of cyber threats However cyber defense tools are expensive and many small and medium scale business houses cannot procure these tools within their budgets Even those business houses that manage to procure them cannot use them effectively because of the lack of human resources and the knowledge of the standard enterprise security architecture In 2020 the C3i Center at the Indian Institute of Technology

Kanpur developed a professional certification course where IT professionals from various organizations go through rigorous six month long training in cyber defense. During their training groups within the cohort collaborate on team projects to develop cybersecurity solutions for problems such as malware analysis, threat intelligence collection, endpoint detection and protection, network intrusion detection, developing security incidents event management systems etc. All these projects leverage open source tools and code from various sources and hence can be also constructed by others if the recipe to construct such tools is known. It is therefore beneficial if we put these recipes out in the form of book chapters such that small and medium scale businesses can create these tools based on open source components easily following the content of the chapters. In 2021 we published the first volume of this series based on the projects done by cohort 1 of the course. This volume second in the series has new recipes and tool development expertise based on the projects done by cohort 3 of this training program. This volume consists of nine chapters that describe experience and know how of projects in malware analysis, web application security, intrusion detection system and honeypot in sufficient detail so they can be recreated by anyone looking to develop home grown solutions to defend themselves from cyber attacks.
