Dornier Do 335 An Illustrated History:

Dornier Do 335 Karl-Heinz Regnat,2003 This is the first comprehensive well illustrated documentation on the Do 335 one of the milestones in German aviation history The Do 335 was developed by Dornier as a heavy fighter in 1943 One of the last high performance piston engined aircraft designed the Do 335 was powered by tandem fore aft engines a concept proven in numerous Dornier flying boats As a result of this configuration drag was reduced to little more than that of a single engined aircraft enabling the Do 335 to achieve very high speeds The Do 335 represented the apex of propeller driven aircraft in the Second World War

Dornier Do 335 Robert Forsyth,2018-10-18 The Dornier Do 335 was conceived as a high speed all weather fighter and represented the pinnacle of piston engined aircraft design The Do 335 was a big aircraft weighing just over 10 000kg when laden with fuel equipment and pilot yet powered by two Daimler Benz DB 603 engines it was capable of reaching a maximum speed of 750km h at 6400 meters making it the fastest piston engine aircraft produced in Germany during World War II Some forty aircraft were built between late 1943 and the end of the war and it was intended to deploy the type as a day fighter bomber night fighter bad weather interceptor and reconnaissance aircraft all of which were intended to incorporate the latest armament bomb sights communications and radar equipment as well as an ejector seat Featuring archive photography and specially commissioned artwork this is the full story of the aircraft that the Luftwaffe hoped would turn the tide of the war

Flying Guns of World War I A.G. Williams,Emmanuel Gustin,2004-04-11 This book gives a complete picture of the Maritime Transport Industry so that those involved in shipping can see their own specific field of interest in perspective and understand how the basic mode of transportation works

Operation Lusty Graham M. Simons,2016-07-31 A fascinating overview of the Allies post WWII program to gain access to advanced Nazi war machines and the technology they ultimately recovered Prior to the Allied D Day assault on Normandy France rumors had already been circulating that high tech Nazi super weapons wunderwaffe had reached or were near completion At the war s end a mad scramble ensued to discover the enemy s secrets fueled in large part by a US desire to regain its technological edge and to keep these weapons out of Soviet hands Operation Lusty LUftwaffe Secret TechnologY was in full swing In Operation Lusty aviation historian Graham M Simons delivers a comprehensive and detailed history of the program while cataloging the advanced war equipment that was ultimately discovered from U boats carriers and battleships to radar equipment and operating systems to fighters bombers rockets and other V weapons With access to previously unreleased documentation and wide ranging archival materials Simons distinguishes what was fact in the Nazi arsenal from what was pure fantasy dreamed up by Joseph Goebbels s powerful propaganda machine Operation Lusty sheds new light on the furious race for postwar technological superiority and offers an insider s look at the full spectrum of military spoils that were gained

Flying Guns of the Modern Era Anthony G. Williams,Emmanuel Gustin,2004-08-06 *Flying Guns of The Modern Era* describes the history of aircraft guns ammunition and their installations in aircraft from the end of WWII to the present day This period has seen the

development of guided missiles for both air to air and ground attack roles Covers aircraft installations for all nations and an evaluation of combat use including a comprehensive table of gun installations in combat aircraft and helicopters comparative drawings of the principal service weapons and data tables of the guns and ammunition **Flying Guns World War II** Emmanuel Gustin,Anthony Williams,2003-06-08 This book describes the history of aircraft guns their ammunition and their installations in aircraft It commences with a technical history covering the development of guns their ammunition and related issues such as mountings and sights This is followed by chapters on aircraft installations covering all nations and an evaluation of their use in combat Appendices include comprehensive tables of the gun installations of World War II combat aircraft with details and illustrations of the guns used and specifications of their ammunition There has never before been a comprehensive description of World War II aircraft gun armament This book has been written with the aim of being the definitive work on this subject dealing with armament of all participating air forces Every technical aspect has been covered gun design in the full range of sizes from small caliber machine guns to heavy cannon ammunition types and their use fixed flexible and turreted installations and gun sights Comparative drawings and specifications of service weapons are provided plus illustrations and data concerning their ammunition **Aviation News** ,2007-07 *The Illustrated History of the Air*

Forces of World War I & World War II Christopher Chant,1979 American Book Publishing Record ,2003 *Flypast* ,2008 *Air Pictorial* ,2001-07 *American Aviation Historical Society Journal* American Aviation Historical Society,1997

The Illustrated Encyclopedia of Aviation ,1977 **AAHS Journal** American Aviation Historical Society,1973

Spitfire, Mustang and the 'Meredith Effect' Peter Spring,2024-04-04 Examines the life of the remarkable and controversial F W Meredith an individual who has largely been forgotten by history despite the brilliant advances he made which helped the Allies win the war against Hitler s Third Reich By the mid 1930s the obstacles to high speed that aircraft designers faced included the question of cooling the engine This was a big challenge that those working on the new fast aeroplanes entering service as the war clouds gathered over Europe had to consider as the drag from the system increased as a square of the speed Ducted systems were designed which lowered drag but these were based on the assumption that the system was cold This ignored the potential energy from the air heated by the radiator for liquid cooled aircraft and from the discharged engine exhaust gases It took a profoundly lateral thinker to harness the possibilities of the paradox that heat could cut the cost of cooling That thinker was the British engineer Frederick William Meredith A researcher at the Royal Aircraft Establishment at Farnborough until 1938 F W Meredith a key player in the UK s development of the autopilot and remote controlled aircraft His contribution to Allied success in the Second World War was enormous but incredibly he was also a known a Soviet agent Few would doubt that the Supermarine Spitfire was a pioneering aeroplane not because it was an all metal monoplane with retractable undercarriage and enclosed cockpit as these were not unique but because it was the first to incorporate a Meredith designed ducted cooling system This was intended from the beginning to use heat to create

negative drag In practice the Spitfire's design was flawed as Meredith himself pointed out and did not fully use what became known as the Meredith Effect Meredith also made entirely overlooked but extremely important contributions to resolving the problem of how to induce air smoothly into cooling ducts at high speeds without which as the Spitfire demonstrated ducted cooling systems worked sub optimally The first aeroplane properly to exploit the Meredith Effect was the North American P 51 Mustang this being a very significant factor as to why it was 30mph faster than the Spitfire when both had the same Rolls Royce Merlin engine This book by Peters Spring examines the life of the remarkable and controversial F W Meredith an individual who has largely been forgotten by history despite the brilliant advances he made advances which helped the Allies win the war against Hitler's Third Reich *Subject Index of Modern Books Acquired* British Library, 1961 Journal of the Royal Aeronautical Society ,1967 *Books In Print 2004-2005* Ed Bowker Staff, Staff Bowker, Ed, 2004 **Forthcoming**
