Environmental Change and Globalization: Double Exposures Robin Leichenko, Karen O'Brien, 2008-08-28 This book explores the connections between two of the most transformative processes of the twenty first century namely climate change and globalization In this book Leichenko and O'Brien present a conceptual framework for analyzing the interactions between these two processes and illustrate through case studies how these interactions create situations of double exposure Drawing upon prominent recent and current climate related events Hurricane Katrina in New Orleans recurring droughts in India and the melting of Arctic sea ice the case studies each demonstrate a different pathway of interaction between globalization and global environmental change Through exploration of these pathways of double exposure the book also shows how broader human security concerns including growing inequalities growing vulnerabilities and unsustainable rates of development are integrally connected to both processes of global change The double exposure framework not only sheds light on the challenges raised by these two global processes but also reveals possibilities for using the interactions to generate positive opportunities for action

Double Exposures Eric Downing, 2000 Downing's highly original thorough and rewarding book is certain to emerge as an indispensable critical reference point for scholars and students in the areas of narrative theory problems of realism and 19th century German prose A nearly ideal combination of intellectual scope erudition and originality Thomas Pfau Duke University To write an engaging and entertaining study of German or poetic realism that offers insightful and differentiated readings of the novellas of Stifter Storm Keller C F Meyer and Raabe through the lenses focused on repetition of narratology Critical Theory and psychoanalysis and to a lesser extent gender studies is without a doubt a daunting endeavor This study with its keen analysis

of the doubling within German realist texts is equal to the task While this book is written to engage and challenge scholars of realism the clarity of Downing s prose makes the textual twists and turns and thus the study as a whole equally accessible to non specialists German Studies Review

Victorian Negatives Susan E. Cook,2019-08-01 Argues that the photographic negative gives a new way of understanding Victorian debates surrounding origins and copies as well as reality and representation Victorian Negatives examines the intersection between Victorian photography and literary culture and argues that the development of the photographic negative played an instrumental role in their confluence The negative is a technology that facilitates photographic reproduction by way of image inversion and Susan E Cook argues that this particular photographic technology influenced the British realist novel and literary celebrity culture as authors grappled with the technology of inversion and reproduction in their lives and works The book analyzes literary works by Charles Dickens Arthur Conan Doyle E W Hornung Cyril Bennett Robert Louis Stevenson Oscar Wilde Thomas Hardy and Bram Stoker and puts readings of those works into conversations with distinct photographic forms including the daguerreotype solarization forensic photography common cabinet cards double exposures and postmortem portraiture In addition to literary texts the book analyzes photographic discourses from letters and public writings of photographers and the nineteenth century press as well as

discussions and debates surrounding Victorian celebrity authorship The book s focus on the negative both illuminates an oft marginalized part of the history of photography and demonstrates the way in which this history is central to Victorian literary culture This is a fascinating and extremely specific discussion of the ways in which photography more precisely negative technology was culturally embedded in the Victorian era It is this precision that makes the book most compelling as Cook herself notes most literary scholars treat photography as a monolithic whole but she offers a welcome specificity Antonia Losano author of *The Victorian Painter in Victorian Literature* [Some Effects of Superimposing Two Radiant Energy Thermal Burns on Bare Porcine Skin](#) J.
