Double Affine Hecke Algebras

Ivan Cherednik

Double Affine Hecke Algebras:

Double Affine Hecke Algebras Ivan Cherednik, 2005-03-21 This is an essentially self contained monograph centered on the new double Hecke algebra technique [Double Affine Hecke Algebras and Congruence Groups](#) Bogdan Ion, Siddhartha Sahi, 2021-06-18 The most general construction of double Artin groups DAAG and Hecke algebras DAHA associates such objects to pairs of compatible reductive group data We show that DAAG DAHA always admit a faithful action by automorphisms of a finite index subgroup of the Artin group of type A_2 which descends to a faithful outer action of a congruence subgroup of $SL(2, \mathbb{Z})$ or $PSL(2, \mathbb{Z})$ This was previously known only in some special cases and to the best of our knowledge not even conjectured to hold in full generality It turns out that the structural intricacies of DAAG DAHA are captured by the underlying semisimple data and to a large extent even by adjoint data we prove our main result by reduction to the adjoint case Adjoint DAAG DAHA correspond in a natural way to a finite Lie algebras or more precisely to their finite Weyl groups which are the semi direct products $W \ltimes Q$ of the Weyl group W with the coroot lattice Q They were defined topologically by van der Lek and independently algebraically by Cherednik We now describe our results for the adjoint case in greater detail We first give a new Coxeter type presentation for adjoint DAAG as quotients of the Coxeter braid groups associated to certain crystallographic diagrams that we call double Artin Coxeter diagrams As a consequence we show that the rank two Artin groups of type A_2, B_2, G_2 act by automorphisms on the adjoint DAAG DAHA associated to a finite Lie algebras of twist number $r = 1, 2, 3$ respectively This extends a fundamental result of Cherednik for $r = 1$ We show further that the above rank two Artin group action descends to an outer action of the congruence subgroup Γ_r In particular Γ_r acts naturally on the set of isomorphism classes of representations of an adjoint DAAG DAHA of twist number r giving rise to a projective representation of Γ_r on the space of a Γ_r stable representation We also provide a classification of the involutions of Kazhdan Lusztig type that appear in the context of these actions [Double Affine Hecke Algebras and Noncommutative Geometry](#) Alexei Oblomkov, 2005 In the first part we study Double Affine Hecke algebra of type A_{n-1} which is important tool in the theory of orthogonal polynomials We prove that the spherical subalgebra $eH^{\text{fin}}(t)$ of the Double Affine Hecke algebra $H^{\text{fin}}(t)$ of type A_{n-1} is an integral Cohen Macaulay algebra isomorphic to the center Z of $H^{\text{fin}}(t)$ and $H^{\text{fin}}(t)$ is a Cohen Macaulay $eH^{\text{fin}}(t)$ module with the property $H^{\text{fin}}(t) \text{End}_{H^{\text{fin}}(t)} H^{\text{fin}}(t) = eH^{\text{fin}}(t)$ This implies the classification of the finite dimensional representations of the algebras In the second part we study the algebraic properties of the five parameter family $H^{\text{fin}}(t_1, t_2, t_3, t_4, q)$ of double affine Hecke algebras of type CVC_1 which control Askey Wilson polynomials We show that if $q \neq 1$ then the spectrum of the center of H is an affine cubic surface C obtained from a projective one by removing a triangle consisting of smooth points Moreover any such surface is obtained as the spectrum of the center of H for some values of parameters We prove that the only flat deformations of H come from variations of parameters This explains from the point of view of noncommutative geometry why one cannot add more parameters into the theory of Askey Wilson polynomials We also prove several results on the

universality of the five parameter family $H(t_1, t_2, t_3, t_4, q)$ of algebras **Double Affine Hecke Algebras and Their Representations** Vincent Gajda, 2018 **Affine Hecke Algebras and Orthogonal Polynomials** I. G. Macdonald, 2003-03-20 First account of a theory created by Macdonald of a class of orthogonal polynomial which is related to mathematical physics **Induced Representations of Double Affine Hecke Algebras and Applications** Ivan Cherednik, 1993 *Double Affine Hecke Algebras and Macdonald's Conjectures* Ivan Cherednik, 1993 Double Affine Hecke Algebras and Macdonald's Operators Ivan Cherednik, 1992 **Double Affine Hecke Algebra of General Parameters** Wille Liu, 2020 The present thesis work focuses on the study of the category $\mathcal{O}$ of degenerate double affine Hecke algebras dDAHA with the point of view of Springer theory and perverse sheaves In the first two chapters we study algebraically the dDAHAs and their generalisations quiver double Hecke algebras QDHA We introduce the Knizhnik Zamolodchikov KZ functor for the QDHA and prove that it satisfies the double centraliser property in chapter 2 Chapters 3 and 4 are devoted to the study of perverse sheaves on a Lie algebra equipped with a cyclic grading and the Springer theory for the dDAHAs with certain families of parameters In chapter 5 we explain how the KZ functor can be realised in terms of perverse sheaves and we show how finer structures on the category $\mathcal{O}$ can be deduced from the sheaf theoretic analysis on cyclically graded Lie algebras *Intertwining Operators of Double Affine Hecke Algebras* Ivan Cherednik, 1996 Representation Theory of Algebraic Groups and Quantum Groups Akihiko Gyoja, Hiraku Nakajima, Ken-ichi Shinoda, Toshiaki Shoji, Toshiyuki Tanisaki, 2010-11-25 Invited articles by top notch experts Focus is on topics in representation theory of algebraic groups and quantum groups Of interest to graduate students and researchers in representation theory group theory algebraic geometry quantum theory and math physics *Algebra, Arithmetic, and Geometry* Yuri Tschinkel, Yuri Zarhin, 2010-08-05 EMAlgebra Arithmetic and Geometry In Honor of Yu I Manin EM consists of invited expository and research articles on new developments arising from Manin's outstanding contributions to mathematics Affine Hecke Algebras and Orthogonal Polynomials I. G. Macdonald, 2003-03-20 First account of a theory created by Macdonald of a class of orthogonal polynomial which is related to mathematical physics **Affine Flag Manifolds and Principal Bundles** Alexander Schmitt, 2011-01-28 Affine flag manifolds are infinite dimensional versions of familiar objects such as Grassmann varieties The book features lecture notes survey articles and research notes based on workshops held in Berlin Essen and Madrid explaining the significance of these and related objects such as double affine Hecke algebras and affine Springer fibers in representation theory e.g. the theory of symmetric polynomials arithmetic geometry e.g. the fundamental lemma in the Langlands program and algebraic geometry e.g. affine flag manifolds as parameter spaces for principal bundles Novel aspects of the theory of principal bundles on algebraic varieties are also studied in the book **Representations of Affine Hecke Algebras** Nanhua Xi, 2006-11-15 Kazhdan and Lusztig classified the simple modules of an affine Hecke algebra H_q $q \in \mathbb{C}$ provided that q is not a root of 1 Invent Math 1987 Ginzburg had some very interesting

work on affine Hecke algebras Combining these results simple H_q modules can be classified provided that the order of q is not too small These Lecture Notes of N Xi show that the classification of simple H_q modules is essentially different from general cases when q is a root of 1 of certain orders In addition the based rings of affine Weyl groups are shown to be of interest in understanding irreducible representations of affine Hecke algebras Basic knowledge of abstract algebra is enough to read one third of the book Some knowledge of K theory algebraic group and Kazhdan Lusztig cell of Coxeter group is useful for the rest

Infinite-Dimensional Aspects of Representation Theory and Applications Stephen Berman, 2005 The University of Virginia Charlottesville hosted an international conference on Infinite dimensional Aspects of Representation Theory and Applications This volume contains papers resulting from the mini courses and talks given at the meeting Beyond the techniques and ideas related to representation theory the book demonstrates connections to number theory algebraic geometry and mathematical physics The specific topics covered include Hecke algebras quantum groups infinite dimensional Lie algebras quivers modular representations and Gromov Witten invariants The book is suitable for graduate students and researchers interested in representation theory

Degenerate Double Affine Hecke Algebra and Conformal Field Theory Tomoyuki Arakawa, Takeshi Suzuki, Akihiro Tsuchiya, 1998 Abstract We introduce a class of induced representations of the degenerate double affine Hecke algebra H of $gl_{\subscript{N}} \mathbb{C}$ and analyze their structure mainly by means of intertwiners of H We also construct them from $l_{\subscript{m}} \mathbb{C}$ modules using Knizhnik Zamolodchikov connections in the conformal field theory This construction provides natural quotients of the induced modules which correspond to the integrable $l_{\subscript{m}} \mathbb{C}$ modules Some conjectural formulas are presented for the symmetric part of them

Proceedings of the International Conference on Knots, Quivers and Beyond (ICKQB 2025) Ramadevi Pichai, Johannes Walcher, 2025-08-17 This open access volume covers the select proceedings of the International Conference on Knots Quivers and Beyond ICKQB 2025

Branes and DAHA Representations Sergei Gukov, Peter Koroteev, Satoshi Nawata, Du Pei, Ingmar Saberi, 2023-08-28 In recent years there has been an increased interest in exploring the connections between various disciplines of mathematics and theoretical physics such as representation theory algebraic geometry quantum field theory and string theory One of the challenges of modern mathematical physics is to understand rigorously the idea of quantization The program of quantization by branes which comes from string theory is explored in the book This open access book provides a detailed description of the geometric approach to the representation theory of the double affine Hecke algebra DAHA of rank one Spherical DAHA is known to arise from the deformation quantization of the moduli space of $SL(2, \mathbb{C})$ flat connections on the punctured torus The authors demonstrate the study of the topological A model on this moduli space and establish a correspondence between Lagrangian branes of the A model and DAHA modules The finite dimensional DAHA representations are shown to be in one to one correspondence with the compact Lagrangian branes Along the way the authors discover new finite dimensional indecomposable representations They proceed to embed the A model story in an M

theory brane construction closely related to the one used in the 3d 3d correspondence as a result modular tensor categories behind particular finite dimensional representations with $PSL(2, \mathbb{Z})$ action are identified The relationship of Coulomb branch geometry and algebras of line operators in 4d $N=2$ theories to the double affine Hecke algebra is studied further by using a further connection to the fivebrane system for the class S construction The book is targeted at experts in mathematical physics representation theory algebraic geometry and string theory This is an open access book

Jack, Hall-Littlewood and Macdonald Polynomials Vadim B. Kuznetsov, Siddhartha Sahi, 2006 The subject of symmetric functions began with the work of Jacobi Schur Weyl Young and others on the Schur polynomials In the 1950 s and 60 s far reaching generalizations of Schur polynomials were obtained by Hall and Littlewood independently and in a different direction by Jack In the 1980 s Macdonald unified these developments by introducing a family of polynomials associated with arbitrary root systems The last twenty years have witnessed considerable progress in this area revealing new and profound connections with representation theory algebraic geometry combinatorics special functions classical analysis and mathematical physics All these fields and more are represented in this volume which contains the proceedings of a conference on Jack Hall Littlewood and Macdonald polynomials held at ICMS Edinburgh during September 23-26 2003 of historical material including brief biographies of Hall Littlewood Jack and Macdonald the original papers of Littlewood and Jack notes on Hall's work by Macdonald and a recently discovered unpublished manuscript by Jack annotated by Macdonald The book will be invaluable to students and researchers who wish to learn about this beautiful and exciting subject

Delve into the emotional tapestry woven by Crafted by in **Double Affine Hecke Algebras** . This ebook, available for download in a PDF format (Download in PDF: *), is more than just words on a page; it's a journey of connection and profound emotion. Immerse yourself in narratives that tug at your heartstrings. Download now to experience the pulse of each page and let your emotions run wild.

Double Affine Hecke Algebras Introduction

In the digital age, access to information has become easier than ever before. The ability to download Double Affine Hecke Algebras has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Double Affine Hecke Algebras has opened up a world of possibilities. Downloading Double Affine Hecke Algebras provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Double Affine Hecke Algebras has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Double Affine Hecke Algebras. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Double Affine Hecke Algebras. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Double Affine Hecke Algebras, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Double Affine Hecke Algebras has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous

learning and intellectual growth.

FAQs About Double Affine Hecke Algebras Books

What is a Double Affine Hecke Algebras PDF? A PDF (Portable Document Format) is a file format developed by Adobe that preserves the layout and formatting of a document, regardless of the software, hardware, or operating system used to view or print it. **How do I create a Double Affine Hecke Algebras PDF?** There are several ways to create a PDF: Use software like Adobe Acrobat, Microsoft Word, or Google Docs, which often have built-in PDF creation tools. Print to PDF: Many applications and operating systems have a "Print to PDF" option that allows you to save a document as a PDF file instead of printing it on paper. Online converters: There are various online tools that can convert different file types to PDF. **How do I edit a Double Affine Hecke Algebras PDF?** Editing a PDF can be done with software like Adobe Acrobat, which allows direct editing of text, images, and other elements within the PDF. Some free tools, like PDFescape or Smallpdf, also offer basic editing capabilities. **How do I convert a Double Affine Hecke Algebras PDF to another file format?** There are multiple ways to convert a PDF to another format: Use online converters like Smallpdf, Zamzar, or Adobe Acrobats export feature to convert PDFs to formats like Word, Excel, JPEG, etc. Software like Adobe Acrobat, Microsoft Word, or other PDF editors may have options to export or save PDFs in different formats. **How do I password-protect a Double Affine Hecke Algebras PDF?** Most PDF editing software allows you to add password protection. In Adobe Acrobat, for instance, you can go to "File" -> "Properties" -> "Security" to set a password to restrict access or editing capabilities. Are there any free alternatives to Adobe Acrobat for working with PDFs? Yes, there are many free alternatives for working with PDFs, such as: LibreOffice: Offers PDF editing features. PDFsam: Allows splitting, merging, and editing PDFs. Foxit Reader: Provides basic PDF viewing and editing capabilities. How do I compress a PDF file? You can use online tools like Smallpdf, iLovePDF, or desktop software like Adobe Acrobat to compress PDF files without significant quality loss. Compression reduces the file size, making it easier to share and download. Can I fill out forms in a PDF file? Yes, most PDF viewers/editors like Adobe Acrobat, Preview (on Mac), or various online tools allow you to fill out forms in PDF files by selecting text fields and entering information. Are there any restrictions when working with PDFs? Some PDFs might have restrictions set by their creator, such as password protection, editing restrictions, or print restrictions. Breaking these restrictions might require specific software or tools, which may or may not be legal depending on the circumstances and local laws.
