Double Burden

Double Burden:

Weighed down by the gains: India's twin double burdens of malnutrition and disease Oommen C Kurian, Shoba Suri, 2019-05-21 Given its continent like diversity India's epidemiological nutritional and demographic transitions are occurring in a staggered fashion with high state level variances In many parts of the country high rates of undernutrition co exist with equally high and increasing rates of overweight and obesity Further the incidence of non communicable diseases NCDs as a leading cause of mortality is increasing even as the communicable maternal neonatal and nutritional causes or the Millennium Development Goals MDG conditions are coming down Indeed India has witnessed inconsistent progress towards the MDGs and even in states where absolute levels of MDG conditions are still high the NCD proportion is growing rapidly The imperative is for a realignment of policy responding to fast changing subnational realities through greater integration between health and nutrition policy at every level of governance

Regional Overview of Food Security and Nutrition in Latin America and the Caribbean 2020 Food and Agriculture Organization of the United Nations ,World Food Programme ,United Nations International Children's Fund ,International Fund for Agricultural Development ,Pan American Health Organization ,2021-05-19 The goals of the 2030 Agenda for Sustainable Development that are related to food security and nutrition will not be achieved as long as in some territories in Latin America and the Caribbean populations continue to live with malnutrition rates Economic opportunities in these areas are often limited public services are scant and exposure to severe climate events is high The public policies promoted in the region have had less impact in these historically lagging territories and there is a pressing need to produce a new agenda of public instruments that address the characteristics of the communities that inhabit them The full and sustainable development of the territories that are falling behind is not only an obligation in terms of the realization of the rights of their inhabitants it would also allow these territories to activate their social economic environmental and cultural potential to the benefit of all societies It is hoped that the 2020 Regional Overview will help to highlight the challenges experienced by the territories with the worst indicators in terms of food and nutrition and that it will serve to mobilize political commitment and public attention towards those areas that are most highly lagging The year 2020 will be remembered for many decades as the year of the COVID 19 pandemic The indicators of the 2030 Agenda that are used in this publication do not yet show the different impacts of COVID 19 However there are references to the possible implications of the pandemic for the future

Mission-oriented Innovation in Economic Systems and Governance for Equitable Global Health and Wellbeing

Sam Agatre Okuonzi,Humphrey Cyprian Karamagi,Jolem Mwanje,2025-10-08 Sustainable economic production and equitable distribution are aimed at a reducing inequality b ending human deprivation c maximizing human fulfillment d maintaining

innovation and not exceeding the earth's carrying capacity. Mission-oriented research addresses grand challenges facing the world that affect the well-being of people. These challenges include health insecurity, climate change, population changes, unemployment, mass migration, environmental degradation, and terrorism. The goal of this Research Topic is to urge governments and international governance organizations to innovate systems and guide new technologies to respond to the grand challenges. Health and socio-economic crises around the world are prevalent and can be attributed to the global neo-liberal capitalist policies. Three decades of free market health sector reforms in poor countries did not achieve appreciable improvement in health care. Instead, they have fragmented, commodified, and privatized health care and condoned inequity in health and health care. This has been especially so in underdeveloped countries where foreign aid grants are often tied to free market conditions. The global pandemic Coronavirus Disease 2019 (COVID-19) has revealed this inequality and how unsuitable and unprepared global economic and governance systems are for health security and the overall well-being of people. The wider socio-economic crises engulfing the world today include unemployment, mass migration, environmental degradation, and terrorism.
