Double weaves Stanislaw A. Zielinski, 1979 **Industrial Education** United States. Bureau of Labor, 1902 **Trade and Technical Education** United States. Bureau of Labor, 1902 Heterosexuality in Theory and Practice Chris Beasley, Heather Brook, Mary Holmes, 2012 This book explores heterosexualities in their complex and everyday expressions It engages with theories about the intersection of sexuality with other markers of difference and gender in particular The outcome will productively upset equations of heterosexuality with heteronormativity and accounts that cast heterosexuality in sex critical sex as danger terms Queer feminist pro sex perspectives have become prevalent in analyses of sexuality but in these approaches queer becomes the site of subversive transgressive exciting and pleasurable sex while heterosex if mentioned at all continues to be seen as objectionable or dowdy It challenges heterosexuality s comparative absence in gender sexuality debates and the common constitution of heterosexuality as nasty boring and normative The authors develop an innovative analysis showing the limits of the sharply bifurcated perspectives of the sex wars This is not a revisionist account of heterosexuality as merely one option in a fluid smorgasbord nor does it dismiss the weight of feminist pro feminist critiques of heterosexuality This book establishes that if relations of domination do not constitute the analytical sum of heterosexuality then identifying its range of potentialities is clearly important for understanding and helping to undo its nastier elements Spin Off , 1992 *Practice Theory and Process Philosophy* Stanley Blue, 2025-09-10 This book breaks new ground in sociological theory presenting a process oriented practice theory for conceptualising and studying the dynamism interconnectedness and ongoing transformation of everyday social life Drawing on process inspired approaches from disciplines such as anthropology geography and science and technology studies it develops a framework for understanding practices not as things that change but as ongoing processes that organise everyday life Each chapter

engages with a specific debate in practice theory including how to conceptualise the site of the social the status of the practitioner how practices connect and extend across space and time the role of memory in practice the place of power and appropriate methods for capturing the dynamics of social practice In doing so the book introduces a conceptual vocabulary for describing connection extension and emergence in a way that attends to the affective space of the social Practice Theory and Process Philosophy is essential reading for scholars and students across the social sciences and humanities who are interested in practice theory process philosophy and social theory
