Erickson, 2016-04-01 In a radically unequal United States schools are often key sites in which injustice grows Ansley T Erickson s Making the Unequal Metropolis presents a broad detailed and damning argument about the inextricable interrelatedness of school policies and the persistence of metropolitan scale inequality While many accounts of education in urban and metropolitan contexts describe schools as the victims of forces beyond their control Erickson shows the many ways that schools have been intertwined with these forces and have in fact via land use decisions curricula

and other tools helped sustain inequality Taking Nashville as her focus Erickson uncovers the hidden policy choices that have until now been missing from popular and legal narratives of inequality In her account inequality emerges not only from individual racism and white communities resistance to desegregation but as the result of long standing linkages between schooling property markets labor markets and the pursuit of economic growth By making visible the full scope of the forces invested in and reinforcing inequality Erickson reveals the complex history of and broad culpability for ongoing struggles in our schools

**Cruel World** Reut Yael Paz,2012-10-19 Through a collective biographical methodology of four scholars 20th century scholars this book investigates how Jewish identity and intellectual ties to Judaic civilisation in the German speaking legal context influenced the international legal discipline      No Longer Newsworthy Christopher R. Martin,2019-05-15 Until the recent political shift pushed workers back into the media spotlight the mainstream media had largely ignored this significant part of American society in favor of the moneyed upscale consumer for more than four decades Christopher R Martin now reveals why and how the media lost sight of the American working class and the effects of it doing so The damning indictment of the mainstream media that flows through No Longer Newsworthy is a wakeup call about the critical role of the media in telling news stories about labor unions workers and working class readers As Martin charts the decline of labor reporting from the late 1960s onwards he reveals the shift in news coverage as the mainstream media abandoned labor in favor of consumer and business interests When newspapers especially wrote off working class readers as useless for their business model the American worker became invisible In No Longer Newsworthy Martin covers this shift in focus the loss of political voice for the working class and the emergence of a more conservative media in the form of Christian television talk radio Fox News and conservative websites Now with our fractured society and news media Martin offers the mainstream media recommendations for how to push back against right wing media and once again embrace the working class as critical to its audience and its democratic function      Coxey's Crusade for Jobs Jerry Prout,2016-05-15 In the depths of a depression in 1894 a highly successful Gilded Age businessman named Jacob Coxey led a group of jobless men on a march from his hometown of Massillon Ohio to the steps of the nation s Capitol Though a financial panic and the resulting widespread business failures caused millions of Americans to be without work at the time the word unemployment was rarely used and generally misunderstood In an era that worshipped the self reliant individual who triumphed in a laissez faire market the out of work tramp was disparaged as weak or flawed and undeserving of assistance Private charities were unable to meet the needs of the jobless and only a few communities experimented with public works programs Despite these limitations Coxey

conceived a plan to put millions back to work building a nationwide system of roads and drew attention to his idea with the march to Washington In Coxey s Crusade for Jobs Jerry Prout recounts Coxey s story and adds depth and context by focusing on the reporters who were embedded in the march Their fascinating depictions of life on the road occupied the headlines and front pages of America s newspapers for more than a month turning the spectacle into a serialized drama These accounts humanized the idea of unemployment and helped Americans realize that in a new industrial economy unemployment was not going away and the unemployed deserved attention This unique study will appeal to scholars and students interested in the Gilded Age and US and labor history

Michael, 1977      *Mediated Politics* W. Lance Bennett, Robert M. Entman, 2000-11-20 *Mediated Politics* explores the changing media environments in contemporary democracy the internet the decline of network news and the daily newspaper the growing tendency to treat election campaigns as competing product advertisements the blurring lines between news ads and entertainment By combining new developments in political communication with core questions about politics and policy a distinguished roster of international scholars offers new perspectives and directions for further study Several broad questions emerge from the book with ever increasing media outlets creating more specialized segments what happens to broader issues Are there implications for a sense of community Should media give people only what they want or also what they need to be good citizens These and other tensions created by the changing nature of political communication are covered in sections on the changing public sphere shifts in the nature of political communication the new shape of public opinion transformations of political campaigns and alterations in citizens needs and involvement      **Wings of Power** Prof of Journalism & Political Science Terry M Sell, 2014 Through most of its history the Boeing Company has been one of the biggest providers of jobs and wealth in western Washington State But in the 1990s the company found itself a target of local activists and politicians who saw urban sprawl and growth politics ruining the region's quality of life T M Sell grew up in a Boeing family near Boeing's Renton plant and later covered the company as a reporter for the Valley Daily News and the Seattle Post Intelligencer He is a first hand observer of the drama he unfolds one personally interested in the future of his community well informed about the details of its history acquainted with many of the principal players and conversant with the theoretical and historical literature that bears on the multifaceted questions he seeks to answer After a lively sketch of the Boeing Company's history into the last decade of the 20th century Sell looks at what happened when Boeing tried to expand its facilities in Renton and Everett It was then that the paradox of growth first manifested itself the point at which the benefits of economic expansion appeared to be outweighed by its costs Sell examines political power management in Washington State paying particular attention to Boeing's successful efforts to be a positive influence in the state to the strategies it used to influence growth management legislation in Olympia and to its negotiations with the communities most affected by its efforts to grow In each case Sell gives not just an overview of positions and strategies but also sharply drawn portraits of the lobbyists analysts and politicians involved many of whom explain their views in direct conversation The balanced and comprehensive approach Sell brings to bear on the story is also his recommendation for dealing with inevitable future growth related contentions Fostering the continuing health of our economic and political environment he concludes will require just such a broad evenhanded and sensible approach to the politics of compromise      **Total Propaganda** Alex S. Edelstein, 2013-11-05 *Total Propaganda* moves the study of propaganda out of the exclusive realm of world politics into the more inclusive study of popular culture media and politics All

the participatory functioning elements of the society are aspects of membership in the popular culture. Thus the values of popular music, media politics, debates over social issues, and even international trade become everyday propaganda to which everyone may relate. To emphasize the necessity for new thinking about propaganda, Edelstein creates the concepts of the new propaganda and the old, and he devises a language of unonyms to convey their meanings more quickly. Oldprop is characteristic of mass cultures and utilizes totalitarian methods of conflict, hegemony, minimization, demonization, and exclusiveness to achieve its goals. By contrast, newprop is created by members of the popular culture to allow them to engage in accommodation, enhance the individual, and promote inclusiveness. Shifts in the old and the new propaganda are tracked across social issues such as race, religion, sexuality, gender, gun control, and the environment, as well as in fashion, politics, advertising, sports, media, and politics. Central to the concept of total propaganda is that it is not simply additive; it is the product of new energies that are produced by the fusing of propaganda in such related forums as music, art, advertising, sports, and politics. It is these synergies and their production of new energies that make total propaganda greater than the sum of its parts. Edelstein concludes that the most important distinction that should be drawn between mass culture and popular culture is its text, i.e., its propaganda. In a popular culture, everyone creates and consumes propaganda; in a mass culture, almost everyone consumes it, but only a few create it. This formulation offers new ways to discuss power and ideology in media texts. As an example, where once the least informed and the least educated were the most subject to propaganda, now the most informed and most educated often are the first to create propaganda and the first to consume it.
