Douglas Mawson Survivor:

Douglas Mawson, the Survivor David Parer, Elizabeth Parer-Cook, 1983-01-01 Mawson's Will Lennard Bickel, 1988

Mawson's Will Lennard Bickel, 2000-02-04 Read the grim and inspiring Arctic survival story of the legendary explorer who completed one of the most harrowing journeys in Antarctica's history Wall Street Journal For weeks in Antarctica Douglas Mawson faced some of the most daunting conditions ever known to man blistering wind snow and cold the loss of his companion dogs supplies and even the skin on his hands and feet But despite constant thirst starvation disease and snow blindness he survived Sir Douglas Mawson is remembered as the young Australian who would not go to the South Pole with Robert Scott in 1911 Instead he chose to lead his own expedition on the less glamorous mission of charting nearly 1 500 miles of Antarctic coastline and claiming its resources for the British Crown His party of three set out through the mountains across glaciers in 60 mile per hour winds Six weeks and 320 miles out one man fell into a crevasse along with the tent most of the equipment the dogs food and all except a week's supply of the men's provisions Mawson's Will is the unforgettable story of one man's ingenious practicality unbreakable spirit and how he continued his meticulous scientific observations even in the face of death When the expedition was over Mawson had added more territory to the Antarctic map than anyone else of his time Thanks to Bickel's moving account Mawson can be remembered for the vision and dedication that make him one of the world's great explorers *Survivor Douglas Mawson* David Parr, **Mawson's Last Survivor** Anna Bemrose, 2011 Alf Howard sailed with legends of the heroic era of Antarctic exploration and became a legend in his own lifetime He was the last surviving member of Sir Douglas Mawson's 1929-1931 British Australian and New Zealand Antarctic Research Expedition BANZARE and was also the last survivor to have served aboard the coal fired three masted wooden ship Discovery built for Captain Robert Falcon Scott's 1901-1904 Antarctic odyssey As a young chemist and hydrologist on board the Discovery going south with Mawson was the catalyst for his long distinguished career with the Commonwealth Scientific and Industrial Research Organisation CSIRO Subsequently at the University of Queensland he was awarded degrees in physics and linguistics and completed a PhD in psychology For more than twenty years he designed computer programs and provided statistical advice to postgraduate students and staff until he was 97 The call of Antarctica was too strong to resist and during the 1990s he returned four times In Bed with Douglas Mawson: Travels Around Antarctica , **Alone on the Ice** David Roberts, 2013-01-21 Gripping and superb This book will steal the night from you Laurence Gonzales author of Deep Survival On January 17 1913 alone and near starvation Douglas Mawson leader of the Australasian Antarctic Expedition was hauling a sledge to get back to base camp The dogs were gone Now Mawson himself plunged through a snow bridge dangling over an abyss by the sledge harness A line of poetry gave him the will to haul himself back to the surface Mawson was sometimes reduced to crawling and one night he discovered that the soles of his feet had completely detached from the flesh beneath On February 8 when he staggered back to base his features unrecognizably skeletal the first teammate to reach him blurted out

Which one are you This thrilling and almost unbelievable account establishes Mawson in his rightful place as one of the greatest polar explorers and expedition leaders It is illustrated by a trove of Frank Hurley s famous Antarctic photographs many never before published in the United States **The Home of the Blizzard** Sir Douglas Mawson,1998 A firsthand account of an epic sledge journey across Antarctica in 1912 and 1913 describes life in harsh sub zero weather and the deaths of the author s companions **Lost in Antarctica** Wilbur Garrett, Douglas Mawson made an immeasurable contribution to the history of scientific research in Antarctica He was raised in Sydney and had a strong interest in science and exploration which inspired him to enrol in the University of Sydney s geology and mineralogy programme Mawson made renowned contributions to Antarctic research and science and his tale of perseverance and survival throughout the voyage has come to represent the strength and resolve of people everywhere Mawson left a lasting legacy that continues to serve as motivation for adventurers scientists and explorers today His solo journey through all the difficulties and bearing the weight of the death of his companions was the most important part of his voyage Mawson s persistent will and courage in the face of unimaginable hardship are proof of the determination of the human spirit For many decades to come his contributions as an explorer scientist and supporter of nature will be honoured and cherished **The Home of the Blizzard** Douglas Mawson,2013-03-06 In *The Home of the Blizzard* Sir Douglas Mawson records his historic expedition to explore uncharted land in Antarctica Pitted against formidable natural forces he and his team faced unrelenting winds with speeds of up to two hundred miles per hour as well as freezing temperatures and day long blizzards They traversed the previously unexplored King George V Land directly south of Australia and collected geological samples and magnetic readings After accident and illness led to the death of his two teammates a starving and frostbitten Mawson finished one hundred miles of the return journey alone Mawson kept a detailed journal of his expedition reprinted here in the popular abridged version from 1930 He puts the reader at the cold windy scene with vivid descriptions of the men and their sled dogs persevering over rough terrain Mawson s thoughts upon losing his colleague Lt Belgrave Ninnis in a deep snow covered crevasse in a glacier or while dangling from his own sled in another crevasse while alone and near death convey the dual excitement and danger that accompany his unique expedition Readers will be swept up in Sir Douglas Mawson s amazing and historic adventures The over 300 accompanying photographs taken during the Antarctic trip paint a vivid picture of that harsh and extraordinary land

Mawson's Huts David Jensen,Mawson's Huts Foundation,2014-12-01 *Survivors* John B. Letterman,2003 This collection of entertaining true life and riveting eyewitness accounts contains more than 30 remarkable first person narratives by men and women who have endured a wide range of harrowing dangers *The Return of the South Pole Sled Dogs* Mary R. Tahan,2021-02-25 This book documents the return of the surviving sled dogs of the Norwegian Antarctic Expedition of 1910 1912 from Antarctica where they had helped Roald Amundsen become the first human to reach the South Pole This book is the sequel to the highly acclaimed Roald Amundsen s Sled Dogs The Sledge Dogs Who Helped Discover the South

Pole It chronicles how the sled dogs were used internationally to further promote the expedition's great achievement and follows some of the dogs as they undertake subsequent expeditions with Douglas Mawson's Australasian Antarctic Expedition of 1911-1914 which made scientific discoveries and with Arve Staxrud's Norwegian Arctic Rescue Mission of 1913 which saved members of the Herbert Schröder Stranz German Arctic Expedition. The book tracks the remaining 39 sled dogs to their next challenging adventures and their final destinations in Argentina, Norway, Antarctica, and Australia. Like its predecessor, the book portrays how Amundsen continued to utilize the Polar dogs both in their lives and in their deaths to propel his career and solidify his expedition's image. *Australian Explorers by Sea, Land, and Air, 1788-1988* Ian Francis McLaren, 1991

Survival and Sacrifice in Mars Exploration Erik Seedhouse, 2015-03-26. With current technology, a voyage to Mars and back will take three years. That's a lot of time for things to go wrong. But sooner or later, a commercial enterprise will commit itself to sending humans to Mars. How will the astronauts survive? Some things to consider are: With current technology, a voyage to Mars and back will take three years. That's a lot of time for things to go wrong. But sooner or later, a commercial enterprise will commit itself to sending humans to Mars. How will the astronauts survive? Some things to consider are: Who decides what medical resources are used for whom? Who decides what medical resources are used for whom? What is the relative weight of mission success and the health of the crew? What is the relative weight of mission success and the health of the crew? Do we allow crewmembers to sacrifice their lives for the good of the mission? Do we allow crewmembers to sacrifice their lives for the good of the mission? And what if a crewmember does perish? Do we store the body for return to Earth or give the member a burial in space? Questions like these and hundreds of others have been explored by science fiction, but scant attention has been paid by those designing missions. Fortunately, the experience gained in polar exploration more than 100 years ago provides crews and mission planners with a framework to deal with contingencies, and it is this that forms the core of this book. Why the parallels between polar and space exploration? Because polar exploration offers a better analogy for a Mars mission today than those invoked by the space community. Although astronauts are routinely compared to Lewis and Clark, Mars-bound astronauts will be closer in their roles to polar explorers. And as much as space has been described as a New Frontier, Mars bears greater similarity to the polar regions, which is why so much can be learned from those who ventured there.
