Parallel Computer Routing and Communication Sudhakar Yalamanchili,Jose Duato,2003-06-26 This workshop was a continuation

of the PCRCW 94 workshop that focused on issues in parallel communication and routing in support of parallel processing. The workshop series provides a forum for researchers and designers to exchange ideas with respect to challenges and issues in supporting communication for high performance parallel computing. Within the last few years we have seen the scope of interconnection network technology expand beyond traditional multiprocessor systems to include high availability clusters and the emerging class of system area networks. New application domains are creating new requirements for interconnection network services e.g. real time video on line data mining etc. The emergence of quality of service guarantees within these domains challenges existing approaches to interconnection network design. In the recent past we have seen the emphasis on low latency software layers, the application of multicomputer interconnection technology to distributed shared memory multiprocessors and LAN interconnects and the shift toward the use of commodity clusters and standard components. There is a continuing evolution toward powerful and inexpensive network interfaces and low cost high speed routers and switches from commercial vendors. The goal is to address the above issues in the context of networks of workstations, multicomputers, distributed shared memory multiprocessors and traditional tightly coupled multiprocessor interconnects. The PCRCW 97 workshop presented 20 regular papers and two short papers covering a range of topics dealing with modern interconnection networks. It was hosted by the Georgia Institute of Technology and sponsored by the Atlanta Chapter of the IEEE Computer Society.

Fun with String Joseph Leeming, 1974-01-01 Over 150 tricks, escapes, dissolving loops, 3 and 4 strand braiding, string figures from around the world. 140 illustrations. Walz Guitar Method Kyle Walz, 2011 The Ukulele Handbook Gavin Pretor-Pinney, Tom Hodgkinson, 2013-01-01 The ukulele has gone from strength to strength in recent years, undergoing a massive resurgence. You can hear the uke all over the place, from trendster indie rock to top ten pop songs, from unshakeable TV ads to YouTube megahits. And this obsession shows no sign of abating: all over the country, people are picking up a ukulele and starting to strum at home in classes and down at the pub. Schools are even replacing the faithful recorder with a jazzy, inexpensive uke. Famous idlers Gavin Pretor-Pinney and Tom Hodgkinson have spent hours idling away on their ukuleles to produce the ultimate uke handbook: an illustrated guide to its history, crossed with a how-to guide and songbook. This is the book that will bring the underground movement into the mainstream. The first half of the book delves into the rich history of this eccentric little instrument, from its birth in Hawaii to its popularity across the world, with a timeline from 1879 to today and a ukulele hall of fame that includes George Formby, Hawaiian legend Israel Kamakawiwo'ole and YouTube ukulele superstar Jake Shimabukuro. Then on to the practicalities: the anatomy of the ukulele, which uke to buy, how to play it, how to strum, pick, read chord charts and tune the strings. Once you know all this, you can get playing the songbook, which includes a wide spread of songs from medieval lays and nursery rhymes to blues and rock n roll. Beautiful presentation and tab notation make reading the music easy even for beginners. With the highest production values, a light touch and an irresistible instrument at centre stage, this book is a must-have for all aspiring Formbys.
