J. Cherryh, 1979-06-05 A space battle had destroyed his ship with over 80 people and the enemy ship with a hundred more His survival capsule has landed on a strange planet Stranded for life Kurt Morgan had to adapt or face extinction Novelist Planets of the Known Galaxy Kevin J. E. Walsh, 2024-11-15 This book offers a tour of the known galaxy here defined as the region of interstellar space closest to Earth The phrase the known galaxy has a particular resonance in science fiction as it refers to the part of the Milky Way that from the perspective of a point in time centuries from now may have been explored and settled by human beings In the known galaxy there are gloomy ocean worlds illuminated by the light of exploding stars There are worlds where precious gems could be as common as pebbles There are planets eternally wandering between the stars like the Flying Dutchman There are lava worlds steam

worlds hot Jupiters cold Jupiters and maybe even worlds like our Earth The purpose of the book is to begin to give this region a sense of place in the same way that Mars is now starting to be appreciated as a location rather than just a planet In doing so the book merges our current scientific knowledge of the known galaxy with speculative fiction and with older legends and myths A sense of place is the feeling that some locations have a special meaning This emotional connection arises from a combination of cultural and environmental factors that make individuals care about a particular place It is challenging to create a sense of place for distant locations that no human has visited and for which our current knowledge is limited This book attempts to take a step in this direction by dividing the known galaxy into a number of clearly described distinct regions by providing scientific descriptions of the likely environmental conditions on the known planets of these regions and by linking these planets to their literary and mythological context The book is aimed at fans of both science fact and science fiction It combines a tour of real planets outside of our solar system with tales of their fictional counterparts The combination of solid scientific facts and analysis with speculation and imagination will be appealing to readers who want to gain a feeling for these planets as places with a back story rather than just as names somewhere out there in the sky

Wave Without a Shore Freedom was an isolated planet off the main spaceways and rarely visited by commercial spacers It wasn't that Freedom was inhospitable the problem was that outsiders tourists and traders claimed that the streets were crowded with mysterious blue robed aliens Native born humans however denied that these aliens existed until a planetary crisis forced a confrontation between the question of reality and the reality of the question

Voyager in the Night Rafe Murray his sister Jillian and Jillian's husband Paul Gaines like many other out of luck spacers had come to newly built Endeavor Station to find their future Their tiny ship Lindy had been salvaged from the junk heap and fitted to mine ore from the mineral rich rings which circled Endeavor But their future proved to be far stranger than any of them imagined when a collision with a huge alien vessel provided them with the oddest first contact experience possible
