Downtime By Fox Peter:

Downtime on the Microgrid Malcolm McCullough, 2020-03-31 Something good about the smart city a human centered account of why the future of electricity is local Resilience now matters most and most resilience is local even for that most universal foundational modern resource the electric power grid Today that technological marvel is changing more rapidly than it has for a lifetime and in our new grid awareness community microgrids have become a fascinating catalyst for cultural value change In *Downtime on the Microgrid* Malcolm McCullough offers a thoughtful counterpoint to the cascade of white papers on smart clean infrastructure Writing from an experiential perspective McCullough avoids the usual smart city futurism technological solutionism policy acronyms green idealism critical theory jargon and doomsday prepping to provide new cultural context for a subject long a favorite theme in science and technology studies McCullough describes the three eras of North American electrification innovation consolidation and decentralization He considers the microgrid boom and its relevance to the built environment as architecture's grid edge Finally he argues that resilience arises from clusters although a microgrid is often described as an island future resilience will require archipelagos clusters of microgrids with a two way intermittent connectiveness that is very different from the always on top down technofuture we may be expecting With *Downtime on the Microgrid* McCullough rises above techno hype to find something good about the smart city and reassuring about local resilience

moments valuable to media companies while also providing a sense of control and connection In moments of downtime waiting for a friend to arrive or commuting to work we pull out our phones for a few minutes of distraction Just as television reoriented the way we think about living rooms mobile devices have taken over the interstitial spaces of our everyday lives Ethan Tussey argues that these in between moments have created a procrastination economy an opportunity for entertainment companies to create products apps platforms subscription services micropayments and interactive opportunities that can colonize our everyday lives But as businesses commoditize our free time and mobile devices become essential tools for promotion branding and distribution consumers are using these devices as a means of navigating public and private space These devices are not just changing the way we spend and value our time but also how we interact with others and transform our sense of the politics of space By examining the four main locations of the procrastination economy the workplace the commute the waiting room and the connected living room Ethan Tussey illuminates the relationship between the entertainment industry and the digitally empowered public [The Early Days of ESPN](#) Peter Fox,2024-06-04 The tales of early ESPN people who gambled their careers while critics carped that all sports television will never work are full of guile luck fear fun and unbridled optimism As ESPN s founding executive producer Peter Fox was privy to some spectacular professional efforts by a cadre of Connecticut locals who made the dream real The first 300 days of the fledgling network were filled with mayhem on air gaffes and the slowest instant replay in television What started as a humble idea in the late spring of 1978 to capitalize on the brand new mania for UConn men s basketball soon morphed into ESPN and a plan to begin airing a series of test broadcasts in the fall This is the story of the early days at ESPN told by one on the network s launching pad and how a conversation over a couple of martinis in 1978 led to the creation of a broadcast juggernaut
