Revoir, 2002-01-01 With a whimsical sense of fun and fancy that masks a much more serious quest to integrate your conscious and subconscious selves Katherine Revoir has created a playbook full of exercises and games to ignite your best self both your rational analytical and logical left brain self and your intuitive expressive and creative right brain self By using both halves of the brain you can achieve more complete introspection and expand your spiritual consciousness Hand lettered lay flat pages make doodling easy The book begins with an exercise designed to access inner guidance creating a pathway for finding your own unique formula for self expression *Spiritual Doodles and Mental Leapfrogs* gives readers a private powerful tool to experiment with creativity to try something new and to grow spiritually *Computer Models of Mind* Margaret A. Peterson, Barbara Gillam, H. A. Sedgwick, 2007-01-04 How can we best describe the processes by which we visually perceive our environment Contemporary perceptual theory still lacks a coherent theoretical position that encompasses both the limitations on the information that can be retained from a single eye fixation and the abundant phenomenal and behavioral evidence for the perception of an extended and coherent world As a result many leading theorists and researchers in visual perception are turning with new or renewed interest to the work of Julian Hochberg For over 50 years in his own experimental research in his detailed consideration of examples drawn from a wide range of visual experiences and activities and most of all in his brilliant and sophisticated theoretical analyses Hochberg has persistently engaged with the myriad problems inherent in working out the kind of coherent theoretical position the field currently lacks The complexity of his thought and the wide range of areas into which Hochberg has pursued the solution to this central problem have however limited both the accessibility of his work and the appreciation of his accomplishment In this volume we seek to bring the full range of Hochberg's work to the attention of a wider audience by offering a selection of his key works many taken from out of print or relatively inaccessible sources To facilitate the understanding of his accomplishment and of what his work has to offer to contemporary researchers and theorists in visual perception we include commentaries on salient aspects of his work by 20 noted researchers In the Mind's Eye will be of interest to researchers working on topics such as perceptual organization visual attention space perception motion perception visual cognition the relationship between perception and action picture perception and film who are striving to

obtain a deeper understanding of their own fields and who want to integrate this understanding into a broader unified view of visual perceptual processing

each attempt at visual self expression was for him a therapeutic intervention Wheatley a cell biologist who has enjoyed a full career in cancer research has had no formal training in art yet his haunting pictures many of them resembling life forms are brought to life by his perceptive self aware commentary This book will be of interest to psychologists and psychiatrists among the wider medical profession as well as people suffering from any form of bipolar disorder whatever the severity

Specifications Grading

Linda B. Nilson,2023-07-03 In her latest book Linda Nilson puts forward an innovative but practical and tested approach to grading that can demonstrably raise academic standards motivate students tie their achievement of learning outcomes to their course grades save faculty time and stress and provide the reliable gauge of student learning that the public and employers are looking for She argues that the grading system most commonly in use now is unwieldy imprecise and unnecessarily complex involving too many rating levels for too many individual assignments and tests and based on a hairsplitting point structure that obscures the underlying criteria and encourages students to challenge their grades This new specifications grading paradigm restructures assessments to streamline the grading process and greatly reduce grading time empower students to choose the level of attainment they want to achieve reduce antagonism between the evaluator and the evaluated and increase student receptivity to meaningful feedback thus facilitating the learning process all while upholding rigor In addition specs grading increases students motivation to do well by making expectations clear lowering their stress and giving them agency in determining their course goals Among the unique

characteristics of the schema all of which simplify faculty decision making are the elimination of partial credit the reliance on a one level grading rubric and the bundling of assignments and tests around learning outcomes Successfully completing more challenging bundles or modules earns a student a higher course grade Specs grading works equally well in small and large class settings and encourages authentic assessment Used consistently over time it can restore credibility to grades by demonstrating and making transparent to all stakeholders the learning outcomes that students achieve This book features many examples of courses that faculty have adapted to spec grading and lays out the surprisingly simple transition process It is intended for all members of higher education who teach whatever the discipline and regardless of rank as well as those who oversee train and advise those who teach Specification grading promotes the following values and outcomes It 1 Upholds High Academic Standards2 Reflects Student Attainment of Skills and Knowledge 3 Motivates Students to Learn and to Excel4 Fosters Higher Order Cognitive Development and Creativity5 Discourages Cheating6 Reduces Student Stress7 Makes Students Feel Responsible for Their Grades8 Minimizes Conflict Between Faculty and Students9 Saves Faculty Time and Is Simple to Administer10 Makes Expectations Clear and Simplifies Feedback for Improvement11 Assesses Authentically12 Achieves High Inter Rater Agreement
