## **Doomsday Horizon:**

**Doomsday Horizon** Michael D. Cooper, 2003-09 The Star-men are captured but they alone have the key to overcoming the monstrous threat against civilization **God Created the Universe with the Purpose to Serve Humankind** Fateh Ullah Khan, 2009 Crossing the Event Horizon Jonathan Zap, 2012-02-24 Crossing the Event Horizon provides evidence that we are both individually and collectively hurtling toward an evolutionary event horizon Using the tools of Jungian psychology the nature of the singularity is defined by its myriad manifestations emerging from the collective unconscious These include dreams motifs and themes found in art science fiction and fantasy literature and films religious cults and the paranormal especially near death experiences and UFO encounters Key aspects of the Singularity Archetype include Logos Beheld visually comprehended linguistic intent often associated with a collective telepathic network Homo gestalt a new species where individuality is conserved but also telepathically networked and a parallelism between the individual event horizon of death and eschaton the collective event horizon of the species Apocalypticism is analyzed as an example of the Singularity Archetype pathologizing A study of the Heaven's Gate saucer suicide cult illustrates what can happen when people become possessed by the Singularity Archetype and are driven by it into delusory projections The Singularity Archetype is viewed apocalyptically by the ego and as a transcendent evolutionary event by the Self and the duality of these views is explored in many examples The evolutionary origins of the ego and its metamorphosis as it approaches the event horizon are explored Evolutionary theory which relates to the Singularity Archetype through a number of dynamic paradoxes is discussed Many popular books and movies are analyzed as permutations of the Singularity Archetype including Avatar Childhood's End Village of the Damned Powder and 2001 A Space Odyssey The Singularity Archetype is a primordial image of human evolutionary metamorphosis which emerges from the collective unconscious How the Archetype Manifests a Composite Picture A rupture of plane event occurs usually threatening the survival of the individual and or species The event is a shock that disrupts the equilibrium of body physical world and also individual collective psyche It is an ontological shock that will be viewed as the worst thing possible by individual collective ego There is another rupture of plane that may actually be the same rupture as above but seen from a cosmic rather than a personal view The shock is revealed to be a transcendent evolutionary event The revelation of the transcendent aspect will often involve spiral motifs and unusual lights Consciousness and communication metamorphose and with them core aspects ego individuality connection to linear time corporeality gender identification social order etc fundamentally transform There is a vision or actualization of release from some or all limits of corporeal incarnation and the emergence of glorified bodies which have enhanced powers and various degrees of etherialization More visual and telepathic modes of consciousness and communication emerge and this is part of a transformation of individuality into Homo gestalt a new species where individual psyches are networked telepathically The Singularity Archetype may be experienced and even actualized to various degrees by an individual through transcendent and

or anomalous experiences such as near death experiences NDEs UFO abduction close encounter experiences kundalini and psychotropic episodes As with encounters with all archetypes individuals and groups attach idiosyncratic material to it such as particular end dates and scenarios Another way of defining the Singularity Archetype in its collective form is as a resonance flowing backward through time of an approaching Singularity at the end of human history The Singularity Archetype relates to both the evolutionary event horizon of the species and for the individual the event horizon of death

**Apocalyptic Fever** Richard G. Kyle, 2012-08-01 How will the world end Doomsday ideas in Western history have been both persistent and adaptable peaking at various times including in modern America Public opinion polls indicate that a substantial number of Americans look for the return of Christ or some catastrophic event The views expressed in these polls have been reinforced by the market process Whether through purchasing paperbacks or watching television programs millions of Americans have expressed an interest in end time events Americans have a tremendous appetite for prophecy more than nearly any other people in the modern world Why do Americans love doomsday In Apocalyptic Fever Richard Kyle attempts to answer this question showing how dispensational premillennialism has been the driving force behind doomsday ideas Yet while several chapters are devoted to this topic this book covers much more It surveys end time views in modern America from a wide range of perspectives dispensationalism Catholicism science fringe religions the occult fiction the year 2000 Islam politics the Mayan calendar and more

**Tropologies** Ryan McDermott, 2016-04-15 *Tropologies* is the first book length study to elaborate the medieval and early modern theory of the tropological or moral sense of scripture Ryan McDermott argues that tropology is not only a way to interpret the Bible but also a theory of literary and ethical invention The tropological imperative demands that words be turned into works books as well as deeds Beginning with Augustine Jerome and Gregory the Great then treating monuments of exegesis such as the *Glossa ordinaria* and Nicholas of Lyra as well as theorists including Thomas Aquinas Erasmus Martin Luther and others *Tropologies* reveals the unwritten history of a major hermeneutical theory and inventive practice Late medieval and early Reformation writers adapted tropological theory to invent new biblical poetry and drama that would invite readers to participate in salvation history by inventing their own new works *Tropologies* reinterprets a wide range of medieval and early modern texts and performances including the *Patience Poet* *Piers Plowman* Chaucer the York and Coventry cycle plays and the literary circles of the reformist King Edward VI to argue that tropological invention provided a robust alternative to rhetorical theories of literary production In this groundbreaking revision of literary history the Bible and biblical hermeneutics commonly understood as sources of tumultuous discord turn out to provide principles of continuity and mutuality across the Reformation's temporal and confessional rifts Each chapter pursues an argument about poetic and dramatic form linking questions of style and aesthetics to exegetical theory and theology Because *Tropologies* attends to the flux of exegetical theory and practice across a watershed period of intellectual history it is able to register subtle shifts in literary production fine tuning our sense of how literature and religion mutually and dynamically informed and reformed each other
