Door Way The People In The Landscape:

Door Way Norbert Blei, 1981 *Rooted* David R. Pichaske, 2009-05 David Pichaske has been writing and teaching about midwestern literature for three decades In *Rooted* by paying close attention to text landscape and biography he examines the relationship between place and art His focus is on seven midwestern authors who came of age toward the close of the twentieth century their lives and their work grounded in distinct places Dave Etter in small town upstate Illinois Norbert Blei in Door County Wisconsin William Kloefkorn in southern Kansas and Nebraska Bill Holm in Minneota Minnesota Linda Hasselstrom in Hermosa South Dakota Jim Heynen in Sioux County Iowa and Jim Harrison in upper Michigan The writers intimate knowledge of place is reflected in their use of details of geography language environment and behavior Yet each writer reaches toward other geographies and into other dimensions of art or thought jazz music and formalism in the case of Etter gender issues in the case of Hasselstrom time past and present in the case of Kloefkorn ethnicity and the role of the artist in the case of Blei magical realism in the case of Heynen the landscape of literature in the case of Holm and the curious worlds of academia best selling novels and Hollywood films in the case of Harrison The result Pichaske notes is the growing away from roots the explorations and alter egos of these writers of place and the tension between the here and there that gives each writer s art the complexity it needs to transcend provincial boundaries Quoting generously from the writers Pichaske employs a practical jargon free literary analysis fixed in the text making *Rooted* interesting readable and especially useful in treating the literary categories of memoir and literary essay that have become important in recent decades

Left Out Kimberley Reynolds, 2016 *Left Out* presents an alternative and corrective history of writing for children in the first half of the twentieth century Between 1910 and 1949 a number of British publishers writers and illustrators included children s literature in their efforts to make Britain a progressive egalitarian and modern society Some came from privileged backgrounds others from the poorest parts of the poorest cities in the land some belonged to the metropolitan intelligentsia or bohemia others were working class autodidacts but all sought to use writing for children and young people to create activists visionaries and leaders among the rising generation Together they produced a significant number of both politically and aesthetically radical publications for children and young people This radical children s literature was designed to ignite and underpin the work of making a new Britain for a new kind of Briton While there are many dedicated studies of children s literature and childrens writers working in other periods the years 1910 1949 have previously received little critical attention In this study Kimberley Reynolds shows that the accepted characterization of interwar children s literature as retreatist anti modernist and apolitical is too sweeping and that the relationship between children s literature and modernism left wing politics and progressive education has been neglected

Landscapes of Origin in the Americas Jessica Joyce Christie, 2009-09-27 Landscape is a

powerful factor in the operation of memory because of the associations narrators make between the local landscape and the events of the stories they tell. Ancestors and mythological events often become fixed in a specific landscape and act as timeless reference points. In conventional anthropological literature, landscape is the term applied to the meaning local people bestow on their cultural and physical surroundings. In this work, the authors explore the cultural and physical landscapes an individual or cultural group has constructed to define the origins or beginnings of that cultural group as revealed through shared or traditional memory. The cultural landscapes of origins in diverse sites throughout the Americas are investigated through multidisciplinary research not only to reveal the belief system and mythologies but also to place these origin beliefs in context and relationship to each other. In a continual interaction between the past, present, and future, time is subordinate to place and history as defined in Western academic terms does not exist. *Squares* Mark C.

Childs, 2006. This discussion of what makes public places appealing and useful will inspire those involved with public planning and design. *Hierophantic Landscapes* Richard Leviton, 2011-09-26. The Earth is poised to make a great disclosure. It's a hierophant. But what's a hierophant? A person who reveals the holy light. But it can also be a landscape or a planet. And what's the holy light? It is the structure of reality and consciousness, a map of the heavenly realms, the engineering blueprint of Creation. Some people call this imminent disclosure the Apocalypse and run for cover. But that is mistaken. Apocalypse means the revelation of the divine revelation. It means the end of our picture of the world as we know it. The world itself will be fine, even better than fine. Splendid. Illumined. The Architect of reality lays down His cards face up, and you see the whole deck. Here is the truth of yourself and the Earth. How will this disclosure work? What we call sacred sites and holy landscapes will start revealing themselves in full to us in all their geomantic and visionary richness. That's the inner patterning of their design, their arrays of Light temples and subtle palaces primed for our visionary adventures and edification. The Earth needs us to have these adventures and visions because that's how we keep the planet healthy. *Hierophantic Landscapes* visits five landscapes from Norway and England to California and Mexico, providing firsthand reports on the visions and adventures of a small band of geomancers as they seek to unravel the mysteries of the Earth. Maybe not such a small band, because along the way we encounter angels, landscape devas, Nature Spirits, and otherworldly mentors and revel in vistas of the ancient past of the Earth when that revelation was as fresh as a sunrise as it will soon be again. The Routledge International Handbook of Disability Human Rights Hierarchies Stephen Meyers, Megan McCloskey, Gabor Petri, 2023-10-31. Disability is defined by hierarchy. Regardless of culture or context, persons with disabilities are almost always pushed to the bottom of the social hierarchy. With the advent of the Convention on the Rights of Persons with Disabilities, 2006 disability human rights seemingly provided a path forward for tearing down ableist social hierarchies and ensuring that all persons with disabilities everywhere were treated equally. Despite important progress, the disability human

rights project not only remains incomplete but has often created new hierarchies among persons with disabilities themselves or across the human rights it promotes. Certain groups of persons with disabilities have gained new voices while others remain silenced and certain rights are prioritized over others depending on what states, international organizations or advocates want rather than what those on the ground need most. This volume was inspired both by the continued need to expose human rights violations against persons with disabilities but to also explore the nuanced role that hierarchies play in the spread, implementation and protection of disability human rights. The enjoyment of human rights is not equal nor is the recognition of specific individuals and groups' rights. In order to change this situation, inequalities across the disability human rights movement must be explored. Divided into five parts: Who counts as disabled, Political, social and cultural context, Which rights on top, whose rights on bottom, Pushed to the periphery in the disability rights movement, Representations of disability and comprised of 34 newly written chapters including case studies from the Anglophone Caribbean, Bangladesh, Bosnia Herzegovina, China, Ghana, Haiti, Hungary, India, Israel, Kenya, Latin America, Poland, Russia, Scotland, Serbia and South Africa and other countries, this book will be of interest to all scholars and students of disability studies, sociology, human rights, law and social policy.

The Ten Most Influential Buildings in History Simon Unwin, 2016-07-07

Even the most inventive and revolutionary architects of today owe debts to the past, often to the distant past when architecture really was being invented for the first time. Architects depend on their own imaginations for personal insights and originality but their ideas may be stimulated consciously or subliminally by particularly powerful buildings from history. *The Ten Most Influential Buildings in History: Architecture's Archetypes* identifies ten architectural archetypes that have been sources of inspiration for architects through the centuries. Each archetype is analysed through distinctive examples following the methodology established by the author in his previous books. The variety of lines of enquiry each archetype has provoked in latter day architects are then explored by analysing their work to reveal ideas inspired by those earlier buildings. Archetypes have a timeless relevance. In adopting this approach *The Ten Most Influential Buildings in History* is as pertinent to contemporary practice as it is to understanding buildings from antiquity and offers insights into the bridges of influence that can operate between the two.

Where the Ancestors Walked Philip A. Clarke, 2003

Philip Clarke has penned an insightful and wide ranging account of Australia's Aboriginal cultures from a perspective of great learning and insider privilege. It's an immensely significant work revealing the extraordinary richness of one of the world's oldest continuous cultures. Tim Flannery, author of *The Future Eaters*. Since their arrival many thousands of years ago, Australia's Aboriginal people have developed a unique, rich and elaborate way of life. With a deep spiritual attachment to land and a strong sense of community, they have drawn on tradition to respond to new situations. In *Landscape Architecture as Storytelling* Bob Scarfo, 2022-11-30. This book introduces students, practitioners and laypeople to a comfortable approach to learning landscape architectural design, free of design jargon and derived from their existing knowledge. A step by step

process has readers consider their knowledge of language as metaphorically related to basic design and landscape design Through information delivery and questioning processes readers build on what they already know their tacit understanding of language as applied to problem solving and storytelling Everyone is a storyteller Taken one step at a time through a three tiered analogy of language basic design and landscape design readers learn the makeup and role of such design features as points lines planes volumes and sequential volumetric spaces that make up their worlds With that in a sense new world view and numerous questions and examples readers begin to see that they in fact daily read the environments in which they live work play raise families and grow old Once they realize how they read their surroundings they are helped to recognize that they can build narratives into their surroundings At that point the existence of authored landscape narratives finds readers understanding a design process that relies on the designer as author landscape as text and participant user as reader That process has the reader write a first or second person narrative visually interpret the written narrative into a storyboard and turn the storyboard into a final design the physical makeup of which is read by those who participate in it
