Dotcon The Real Story Of Why The Internet Bubble Burst:

The Internet Is Not the Answer Andrew Keen, 2018-09-01 The renowned Internet commentator and author of *How to Fix the Future* exposes the greed, egotism and narcissism that fuels the tech world. Chicago Tribune: The digital revolution has contributed to the world in many positive ways but we are less aware of the Internet's deeply negative effects. *The Internet Is Not the Answer* by longtime Internet skeptic Andrew Keen offers a comprehensive look at what the Internet is doing to our lives. The book traces the technological and economic history of the Internet from its founding in the 1960s through the rise of big data companies to the increasing attempts to monetize almost every human activity. In this sharp, witty narrative informed by the work of other writers, reporters and academics as well as his own research and interviews, Keen shows us the tech world's warts and all. Startling and important, *The Internet Is Not the Answer* is a big picture look at what the Internet is doing to our society and an investigation of what we can do to try to make sure the decisions we are making about the reconfiguring of our world do not lead to unpleasant, unforeseen aftershocks. Andrew Keen has written a very powerful and daring manifesto questioning whether the Internet lives up to its own espoused values. He is not an opponent of Internet culture; he is its conscience and must be heard. Po Bronson, 1 New York Times bestselling author. **Law and Internet Cultures** Kathy Bowrey, 2005-05-30 This book raises the profile of socio-political questions about the global technology and information market. It is a close study of communication flows, networks, nodes, biopolitics and the fragmentations of power. It brings to life the role played by personalities, corporate interactions, industry compromises and the regulatory incompetencies affecting the technological world we all live in. US technology powers the internet and disseminates American culture on an unprecedented scale. Assessing this power requires an analysis of the diffuse ways that US practice, policy and law dominates and a consideration of how influence is negotiated and resisted locally. This involves a discussion about how ideas about trade and innovation circulate, of the social power of engineers that establish conventions and protocols, of the reach of Leviathan corporations and questions about global marketing and consumer tastes. For readers interested in intellectual property, law, information technology, cultural studies, globalisation and mass communications. **Totally Wired** Andrew Smith, 2012-08-30 The story of the dotcom bubble, its tumultuous crash and the visionary pioneer at its epicentre. The Social Network meets Hammer of the Gods via Warhol's Factory. Independent, Effervescent, vivid: this is a book whose time has come. Sunday Times. One morning in February 2001, Josh Harris woke to the certain knowledge that he was about to lose everything. The man Time magazine called 'The Warhol of the Web' was now reduced to the role of helpless spectator as his personal fortune dwindled from 85 million dollars to 50 million to nothing. In the space of a week. If the mania attending those events is hard to recall, it's because when the crash came, the dreams and expectations of those surreal few years were swept away with near-Biblical inclemency. More than a decade later, they seem shrouded in a kind of pre-Millennial mist that might never have happened. How easy to forget that at the end of 1999, the world seemed to be spinning off its axis as a new one evolved before our eyes.

with anything imaginable seeming to be possible in real time In his bestselling book *Moondust* Andrew Smith looked at the lives of the nine remaining Moonwalkers how their exploits helped shape an era and how that era left its mark on them In *Totally Wired* he goes in search of the truth about one of the most extraordinary and mysterious events of the 20th century the dotcom bubble of the 1990s and draws a direct line from there to where we are now A brilliant exploration of madness and genius in the early days of the web Guardian

All the Facts James W. Cortada, 2016 A history of the role of information in the United States since 1870 [The Political Content of British Economic, Business and Financial Journalism](#) Gary James Merrill, 2019-03-16 This book assesses the extent to which British news organizations gave exposure and credence to different political interpretations of economics and business news in the decade before the 2008 Financial Crisis Through the content analysis of some 1 600 news items this study provides compelling empirical evidence to inform often theoretical debates about neoliberal assumptions in the media In each of the three pre 2008 case studies economic globalization private finance and public services and Tesco Merrill finds that the Telegraph The Times the Sunday Times and to varying extents the Guardian Observer and the BBC gave limited exposure and credence to ideas from the left of the political spectrum As such he builds an important comparative picture of economic business and financial journalism in the period before the defining event of the decade the effects of which continue to resonate

The Little Money Book David Boyle, 2006-04-01 They say money is the root of all evil That s debatable but one thing that s not is that money and its attendant enterprises buying selling lending borrowing credit cards the stock market and banking is an inescapable component of the fabric of modern life How did this come to be Money and the complex system that makes it work is a man made product that we invented and yet like Frankenstein it has us all in its grip From the poorest to the wealthiest we worry about money This highly accessible and easy to read synthesis of complex subjects asks some of the obvious questions about money and finance that few of us stop to think about For instance what is the real value of money Well astonishingly nobody agrees But most people seem to accept that it is lent into existence by the commercial banks When you stash money in the bank they must keep around 8 percent of that loan on deposit in case there s a run on the bank but all the rest is lent out again many times over In other words most of our mortgages and bank loans are created as if by magic by a stroke of the pen That s the strange truth behind modern money We don t mine it we don t find it on a beach it bears no relation to anything real but still some people have vast amounts of it and some people have none at all And we hardly ever talk about it [The Network Society](#) Louis Albrechts, Seymour Mandelbaum, 2007-05-07 Essential reading for graduate level courses in urban studies city and regional planning and urban design Albrecht and Mandelbaum s text examines the challenges that the new paradigm of the Network Society create for Urban and Regional Planning

E-Life after the Dot Com Bust Brigitte Preissl, Harry Bouwman, Charles Steinfield, 2013-03-09 After the dramatic failures of the dot coms in 2000 and 2001 many observers were quick to report on the death of electronic commerce Investor confidence sagged stock prices of technology

firms in nearly all of the related sectors suffered In reality the picture is not nearly as dismal as the press would have us believe E commerce is not dead but it has moved beyond its overhyped beginning stage This book is an effort to sort through the hype providing a realistic assessment of the state of electronic commerce today and the important areas of opportunity and challenge for tomorrow The book sees all kind of developments where e business is becoming an integral part of traditional business processes with special emphasis on practical and policy importance E commerce scholars from a number of disciplines and countries contribute to assess the impact of the dot com bust and the current state of e commerce

My First Recession Geert Lovink,2003 My First Recession starts when the party is over This study maps the transition of critical Internet culture from the mid to late 1990s Internet craze to the dotcom crash the subsequent meltdown of global financial markets and 9 11 In his discussion of the dotcom boom and bust cycle Geert Lovink lays out the challenges faced by critical Internet culture today In a series of case studies Lovink meticulously describes the ambivalent attitude that artists and activists take as they veer back and forth between euphoria and skepticism As a part of this process Lovink examines the internal dynamics of virtual communities through an analysis of the use of moderation and collaborative filtering on mailing lists and weblogs He also confronts the practical and theoretical problems that appear as artists join the growing number of new media education programs Delving into the unexplored gold mines of list archives and weblogs Lovink reveals a world that is largely unknown to both the general public and the Internet visionaries
