Environmental Change and Globalization: Double Exposures Robin Leichenko, Karen O'Brien, 2008-08-28 This book explores the connections between two of the most transformative processes of the twenty first century namely climate change and globalization In this book Leichenko and O'Brien present a conceptual framework for analyzing the interactions between these two processes and illustrate through case studies how these interactions create situations of double exposure Drawing upon prominent recent and current climate related events Hurricane Katrina in New Orleans recurring droughts in India and the melting of Arctic sea ice the case studies each demonstrate a different pathway of interaction between globalization and global environmental change Through exploration of these pathways of double exposure the book also shows how broader human security concerns including growing inequalities growing vulnerabilities and unsustainable rates of development are integrally connected to both processes of global change The double exposure framework not only sheds light on the challenges raised by these two global processes but also reveals possibilities for using the interactions to generate positive opportunities for action

Racing the Great White Way Katie N. Johnson, 2023-07-19 The early drama of Eugene O'Neill with its emphasis on racial themes and conflicts opened up extraordinary opportunities for Black performers to challenge racist structures in modern theater and cinema By adapting O'Neill's dramatic writing changing scripts to omit offensive epithets inserting African American music and dance or including citations of Black internationalism theater artists of color have used O'Neill's texts to raze barriers in American and transatlantic theater Challenging the widely accepted idea that Broadway was the white hot creative engine of U.S. theater during the early 20th century author Katie N. Johnson reveals a far more complex system of exchanges between the Broadway establishment and a vibrant Black theater scene in New York and beyond to chart a new history of American and transnational theater In spite of their dichotomous and at times problematic representation of

Blackness O'Neill's plays such as *The Emperor Jones* and *All God's Chillun Got Wings* make ideal case studies because of the way these works stimulated traffic between Broadway and Harlem and between white and Black America. These investigations of O'Neill and Broadway productions are enriched by the vibrant transnational exchange found in early to mid-20th century artistic production. Anchored in archival research, *Racing the Great White Way* recovers not only vital lost performance histories but also the layered contexts for performing bodies across the Black Atlantic and the Circum Atlantic.
