## **Double Mirrors:**

**The Twin Mirrors** J. Lennington, 2013-05-08 Rachel Walters thought she had everything she ever wanted until it all came crashing down around her. It had to be The Pickett Curse. Nana and her family were cursed by her twin sister Carrie to live unhappy lives before Carrie hung herself in the barn. Rachel believed in the curse until she gazed into Carrie's wedding mirror at the reflection of Nana in an identical mirror built for Nana on her wedding day. Rachel suddenly found herself in The Valley of the Dead Trees when Nana and Carrie were mere children. Rachel was soon to learn that all was not as she had been led to believe.

The resources offer preparation for the OCR exams with teacher support to minimise time spent on administration. The teacher's resources are available on CD ROM in a fully customizable format.

**Symmetry As A Developmental Principle In Nature And Art** Werner Hahn, 1998-10-16 Looking beyond the boundaries of various disciplines the author demonstrates that symmetry is a fascinating phenomenon which provides endless stimulation and challenges. He explains that it is possible to readapt art to the sciences and vice versa by means of an evolutionary concept of symmetry. Many pictorial examples are included to enable the reader to fully understand the issues discussed. Based on the artistic evidence that the author has collected he proposes that the new *ars evolutoria* can function as an example for the sciences. The book is divided into three distinct parts each one focusing on a special issue. In Part I the phenomenon of symmetry including its discovery and meaning is reviewed. The author looks closely at how Vitruvius, Polyclitus, Democritus, Plato, Aristotle, Plotinus, Augustine, Alberti, Leonardo da Vinci and Durer viewed symmetry. This is followed by an explanation on how the concept of symmetry developed. The author further discusses symmetry as it appears in art and science as well as in the modern age. Later he expounds the view of symmetry as an evolutionary concept which can lead to a new unity of science. In Part II he covers the points of contact between the form developing process in nature and art. He deals with biological questions in particular evolution. The collection of new and precise data on perception and knowledge with regard to the postulated reality of symmetry leads to further development of the evolutionary theory of symmetry. In Part III The author traces the enormous treasure of observations made in nature and culture back to a few underlying structural principles. He demonstrates symmetry as a far reaching leading structuring causal element of evolution as the idea lying behind nature and culture. Numerous controllable reproducible double mirror experiments on a new stereoscopic vision verify a symmetrization theory of perception.

**The Two Cultures: Shared Problems**

Ernesto Carafoli, Gian Antonio Danieli, Giuseppe O. Longo, 2010-06-28 The aim of the book is to encourage an in depth discussion of problems of fundamental importance that are common to the two cultures but that are traditionally seen from different perspectives The forum will bring together scientists philosophers humanists musicians with the aim of fostering comprehension of problems that have traditionally troubled humankind and establish more fertile grounds for the communication between the two cultures The themes of the contributions are the followings the concept of time infinity the concept and meaning of nothingness numbers intelligence and the human mind basic mechanisms in the production of thought and of artistic creation the relationship between artistic and scientific creativity Multidisciplinary Aspects of Design

Francesca Zanella, Giampiero Bosoni, Elisabetta Di Stefano, Gioia Laura Iannilli, Giovanni Matteucci, Rita Messori, Raffaella Trocchianesi, 2023-12-30 This open access book gathers the contributions from the Design OPEN International Conference held in Parma Italy in May 2022 The conference explored the multidisciplinary aspects of design starting from its dimensions objects design as focused on the object on its functional and symbolic dimension and at the same time on the object as a tool for representing cultures processes the designer s self reflective moment which is focused on the analysis and on the definition of processes in various contexts spanning innovation social engagement reflection on emergencies or forecasting experiences design as a theoretical and practical strategy aimed at facilitating experiential interactions among people people and objects or environments and narratives making history representing through different media archiving narrating and exhibiting design The contributions which were selected by means of a rigorous international peer review process highlight numerous exciting ideas that will spur novel research directions and foster multidisciplinary collaboration among different specialists **Seeing Foucault's Pendulum**

Michael Hagner, 2025-09-30 An investigation of a cosmic experiment In 1851 the physicist L on Foucault performed an unforgettable experiment By suspending a large pendulum inside the dome of Paris Pantheon Foucault provided the first simple direct empirical evidence of the Earth s rotation an undeniable demonstration of heliocentrism This experiment conducted long after the Copernican Revolution and using a laboratory apparatus rather than astronomical observation visually confirmed what had previously been accepted as theory The pendulum s motion clearly illustrated the Earth s rotation But Foucault s experiment did not end there It sparked a range of subsequent reenactments and interpretations each adding new layers to its meaning Repeated over and over again its afterlives were many as were its ramifications Historian Michael Hagner revisits this epoch making experiment and its reception from the nineteenth century to the present day and follows how cosmological questions conjoined political and aesthetic judgments about the public staging and history of science The pendulum experiment Hagner argues is more than just a mere scientific demonstration It contains within it the histories of technological innovation ideological conflicts and the rise of popular culture and visual media In a series of insightful studies of literary artistic and scientific reenactments Hagner uses both words and images to narrate the rich and complex legacy of this experiment Seeing Foucault s Pendulum includes

among other fascinating tales a short but stunning history of the Copernican Revolution the paradigm shifting work of the nineteenth century astronomer Camille Flammarion and the reenactments of Foucault's experiment at the Smithsonian Institution and New York's United Nations building Linking nature to culture and calling for world unity the experiment's legacy extends beyond science It has been reimaged in Umberto Eco's novel Foucault's Pendulum and in Gerhard Richter's 2018 installation *enchantments of the postmodern world theater* where the relationship between knowledge and sensory experience is problematized anew A complex symbol in the history of ideas challenging our assumptions inspiring artistic expression and prompting philosophical reflection on our place in the cosmos Foucault's experiment serves as a powerful reminder that both the Earth and the universe should never be reduced to a disposable mass of human hubris and of irresponsible manipulation

**Demonstrational Optics** Oleg Marchenko, Sergi Kazantsev, Laurentius Windholz, 2009-06-02 Demonstrational Optics presents a new didactical approach to the study of optics Emphasizing the importance of elaborate new experimental demonstrations pictorial illustrations computer simulations and models of optical phenomena in order to ensure a deeper understanding of wave and geometric optics It includes problems focused on the pragmatic needs of students secondary school teachers university professors and optical engineers Part 2 Coherent and Statistical Optics contains chapters on interference diffraction Fourier optics light quanta thermal radiation Shot noise and Gaussian light Correlation of light fields and Correlation of light intensities A substantial part of this volume is devoted to thermal radiation and its properties especially with partial coherence A detailed treatment of the photo effect with respect to statistical properties leads to the basics of statistical optics To illustrate the phenomena covered by this volume a large number of demonstration experiments are described and discussed In the chapters devoted to statistical phenomena computer simulations are described the code of all relevant programs being included
