Double Shadow The:

The Man with Two Shadows. [The Editor's Preface Signed: J. W. D.] Ernest HOVEN (pseud.), 1869 *The Poetics of Shadows: The Double in Literature and Philosophy* Andrew Hock Soon Ng, 2012-02-24 The essays in this collection attest to the richness of the double motif in literature and philosophy Veering away from predominantly psychoanalytical readings of narratives which foreground the double or doppelganger which have formed the basis of much scholarly discussions of this motif the contributions in this volume privilege divergent philosophical leanings ranging from Rousseau to Kierkegaard from Christian philosophy to Eastern mysticism to elicit the layered nuances and signifiers of this elusive motif Narratives interrogated in this collection include the works of Dickens Blanchot Edmund Jab s Orhan Pamuk Chuck Palahniuk and Don Delillo among others *Augmented Reality* Soha Maad, 2010-01-01 Virtual Reality VR and Augmented Reality AR tools and techniques supply virtual environments that have key characteristics in common with our physical environment Viewing and interacting with 3D objects is closer to reality than abstract mathematical and 2D approaches Augmented Reality AR technology a more expansive form of VR is emerging as a cutting edge technology that integrates images of virtual objects into a real world In that respect Virtual and Augmented reality can potentially serve two objectives reflecting realism through a closer correspondence with real experience and extending the power of computer based technology to better reflect abstract experience With the growing amount of digital data that can be stored and accessed there is a rising need to harness this data and transform it into an engine capable of developing our view and perception of the world and of boosting the economic activity across domain verticals Graphs pie charts and spreadsheet are not anymore the unique medium to convey the world Advanced interactive patterns of visualization and representations are emerging as a viable alternative with the latest advances in emerging technologies such as AR and VR And the potential and rewards are tremendous This book discusses the opportunities and challenges facing the development of this technology Polygraphice William Salmon, 1685

Elaborated (etc.) Johann Ebers, 1796 **Hegel and Newtonianism** Michael John Petry, 2012-12-06 It could certainly be argued that the way in which Hegel criticizes Newton in the *Dissertation the Philosophy of Nature* and the lectures on the History of Philosophy has done more than anything else to prejudice his own reputation At first sight what we seem to have here is little more than the contrast between the tested accomplishments of the founding father of modern science and the random remarks of a confused and somewhat disgruntled philosopher and if we are persuaded to concede that it may perhaps be something more than this between the work of a clear-sighted mathematician and experimentalist and the blind assertions of some sort of Kantian logician blundering about among the facts of the real world By and large it was this clear-cut simplistic view of the matter which prevailed among Hegel's contemporaries and which persisted until fairly recently The modification and eventual transformation of it have come about gradually over the past twenty or twenty-five years The first full-scale commentary on the *Philosophy of Nature* was published in 1970 and gave rise to the realization that to some extent at least the Hegelian criticism was directed against Newtonianism rather than the work of Newton himself and that it tended to draw its inspiration from developments within the natural sciences rather than from the exigencies imposed upon Hegel's thinking by a priori categorial relationships **A Text Book of Geometrical Drawing** William Minifie, 1857 **Encyclopaedia Londinensis** John Wilkes, 1828 **THE NEW AND COMPLETE DICTIONARY OF THE GERMAN AND ENGLISH LANGUAGES** Johann Ebers, 1796 *Facts and Values* M.C. Doeser, J.N. Kraay, 2012-12-06 The answer to philosophical questions will often depend on the position one takes regarding the fact-value problem It is therefore not surprising that in the tradition of western philosophy the past 200 years or so record an animated discussion of it In the present collection the debate is continued by representatives of various schools in contemporary western thought A number of philosophers from non-western cultures too enter into it The contributions do not all reflect on the same theme nor do they use the same approach Essays written by philosophers sympathetic to the analytical tradition are followed by reflections on the part of those inspired by phenomenology A third group of contributions is by non-western thinkers who are more likely to approach the problem in terms of culture Their engagement with the issue clearly shows among other things that it is almost exclusively in the western tradition that the fact-value distinction is often understood as an outright dichotomy The occasion for the publication of this collection is Dr Cornelis Anthonie van Peursen's retirement as Professor of Philosophy This year he leaves the Free University Amsterdam until 1982 he was professor at the University of Leyden as well In the Netherlands and

beyond he has become known for his concern with constructive comparison of diverging philosophical trends and the cross cultural fertilization of thought Characteristic of his career are his efforts to render the results of academic philosophizing understand able to a broader audience Virtual, Augmented and Mixed Reality Randall Shumaker,Stephanie Lackey,2015-07-20 This volume constitutes the refereed proceedings of the 7th International Conference on Virtual Augmented and Mixed Reality VAMR 2015 held as part of the 17th International Conference on Human Computer Interaction HCI 2015 held in Los Angeles CA USA in August 2015 The total of 1462 papers and 246 posters presented at the HCII 2015 conferences was carefully reviewed and selected from 4843 submissions These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems The papers thoroughly cover the entire field of human computer interaction addressing major advances in knowledge and effective use of computers in a variety of application areas The 54 papers included in this volume are organized in the following topical sections user experience in virtual and augmented environments developing virtual and augmented environments agents and robots in virtual environments VR for learning and training VR in Health and Culture industrial and military applications Goethe's Theory of Colours Johann Wolfgang von Goethe,1840 This work by Johann Wolfgang von Goethe 1749 1832 was translated into English in 1840 by Sir Charles Eastlake 1793 1865 painter and later keeper of the National Gallery Goethe s 1810 work was rejected by many contemporary scientists because it appeared to contradict the physical laws laid down by Newton However its focus on the human perception of the colour spectrum as opposed to the observable optical phenomenon was attractive to and influential upon artists and philosophers As Eastlake says in his preface the work s dismissal on scientific grounds had caused a well arranged mass of observations and experiments many of which are important and interesting to be overlooked Eastlake also puts Goethe s work into its aesthetic and scientific context and describes its original reception His clear translation of Goethe s observations and experiments on colour and light will appeal to anyone interested in our responses to art **Goethe's Theory of colours, tr. with notes by C.L.
