Ultra-Large Aircraft, 1940-1970 William Patrick Dean,2018-04-04 In 1962 a unique transport aircraft was built from the parts of 27 Boeing B 377 airliners to provide NASA a means of transporting rocket boosters With an interior the size of a gymnasium The Pregnant Guppy was the first of six enormous cargo planes built by Aero Spacelines and two built by Union de Transport Aeriens More than half a century later the last Super Guppy is still in active service with NASA and the design concept has been applied to next generation transports This comprehensive history of expanded fuselage aircraft begins in the 1940s with the military s need for a long range transport The author examines the development of competing designs by Boeing Convair and Douglas and the many challenges and catastrophic failures Behind the scenes maneuvers of financiers corporate raiders mobsters and other nefarious characters provide an inside look at aviation development from the drawing board to the scrap yard **The ATL-98 Carvair** William Patrick Dean,2015-09-15 The ATL 98 Carvair is a truly unusual aircraft Converted from 19 C 54 World War II transport planes and two DC 4 airliners into a small fleet of air ferries by Aviation Traders of Southend England the Carvair allowed commercial air passengers to accompany their automobiles onboard the aircraft The planes were dispersed throughout the world operating for 75 airlines and transporting cars royalty rock groups refugees whales rockets military vehicles gold and even nuclear material After more than 45 years two Carvairs were in 2008 still in service This comprehensive history of the ATL 98 Carvair begins with corporate histories and profiles of key players including William Patterson Donald Douglas and Freddie Laker Four chapters illustrate the evolution of the car ferry as a viable aircraft the history of Aviation Traders engineering details incorporated into the Carvair s production and major Carvair operators Chapters on each of the fleet s 21 planes provide individual histories and anecdotes Seven appendices provide several kinds of data and the book is fully indexed **Letters from the Globemaster Families** Michael Rocereta,2015-07-28 Letters from the Globemaster Families The Lost C 124 of Mount Gannett Alaska gathers evidence and

presents the most likely description of the final flight of a United States Air Force troop transport plane carrying fifty two servicemen The Globemaster C 124 crashed into the side of Mount Gannett Alaska Sixty years later a glacier yielded up both the wreckage and remains of some of the crashes victims Michael Rocereta uses his two decades worth of experience as an instrument rated private pilot his education as a geologist and his experience investigating accidents to guide his research presentation and conclusions regarding the accident Letters from the Globemaster Families uses as introductions to its chapters the correspondence of relatives as they write about their desires to know the details of the airplanes crash and their loved ones deaths This approach provides a personal counterbalance to the technical details covered in the chapters themselves The book concludes with a collection of short biographies of the servicemen a glossary of terms and acronyms a selected bibliography and an index No matter whether you appreciate the work of a solid investigation regional history of Alaska military history or the resolution that individuals can feel when they come to closure then Letters from the Globemaster Families The Lost C 124 of Mount Gannett Alaska will deliver a focused narrative of a tragic event that spans the decades

What We Need Barrett Tillman, In early 2006 the Army chief of staff reported about 440 billion in expenditures A dollar bill is a smidgen over six inches long If 440 billion greenbacks are placed end to end they would extend 220 billion feet or 41 600 000 miles That is 1 664 times around the equator If the greenbacks had Andy Jackson's picture instead of George Washington's that line still would run well over 2 000 000 miles That is about four trips to the moon and back So then On 440 billion how is it possible that soldiers still lack sufficient body armor training facilities and ammunition and high tech bandages On 440 billion how is it possible that there is not enough money for vehicle maintenance and repair On 440 billion how is it possible that GIs still write home asking folks to send socks and sheets and batteries What We Need addresses The Great American Dichotomy we allocate vast sums for our military yet inevitably we spend most of that treasure on technical marvels that we do not use And if we do not use them we are entitled to ask how much we need them
