Downsides Of Fish Culture:

Problems of Fish Culture Economics with Special Reference to Carp Culture in Eastern Europe Marian Leopold, M. Leopold, 1981-01-01 This document deals with the problems of fish culture particularly carp in eastern Europe It reviews the types methodology and role of fish culture and the economic analysis of this activity It shows that there is no universal method for economic analysis of fish culture especially if it has to be used for comparing economic efficiency of fish farming activities and presents a general simplified outline of feasible economic analysis

Problems of the Fishing Industry United States. Congress. Senate. Committee on Interstate Commerce, 1958

Rural Aquaculture Peter Edwards, David Little, Harvey Demaine, 2002 Aquaculture for both finfish and shellfish is expanding rapidly throughout the world It is regarded as having the potential to provide a valuable source of protein in less developed countries and to be integrated into the farming systems and livelihoods of the rural poor This book addresses key issues in aquaculture and rural development with case studies drawn from several countries in South and South East Asia Papers included cover topics ranging from production and technical issues such as pond culture and rice field fisheries to social aspects and research and development methodology The book has been developed from a meeting of the Asian Fisheries Society It is aimed at all concerned with aquaculture and rural development

World Fish Farming: Cultivation and Economics E. Brown, 2012-12-06

Until the First Edition of World Fish Farming Cultivation and Economics was published several years ago there was little or no economic and technical information on commercial aquaculture either by countries or by species I tried at that time to partially fill the gap in the literature In this Second Edition I have updated data originally presented and increased the scope by adding new countries New trout data have been added for 10 western European countries sections on cost of production of food sized catfish and fingerlings in the USA new and improved chapters for Japan Hungary Indonesia the Philippines and the United Kingdom and completely new chapters pertaining to Poland Thailand and Czechoslovakia have all been added to this edition The book now includes 31 countries including all major producing ones Between 5.5 and 6.0 million metric tons of finfish shrimp and crayfish cultured production are represented which accounts for about 90% of the world's total The People's Republic of China and the USSR as well as countries on the continents of Europe Asia North America and Oceania are represented Because of only minimal reported cultured fish production in Africa and South America these continents have been omitted Also according to information received from New Zealand there is no culturing of fish in that country other than for restocking of public waters More than 100 species of cultured fish seven species of shrimp and prawns and six species of crayfish are discussed
