Donahue,2012-12-19 Prepare for takeoff Sixteen stained glass images of flying machines will make young colorists' spirits soar Imaginative illustrations include planes helicopters hang gliders dirigibles and other vehicles Introducing Architectural Theory Korydon Smith,Miguel Guitart,2013-05-20 This is the most accessible architectural theory book that exists Korydon Smith presents each common architectural subject such as tectonics use and site as though it were a conversation across history between theorists by providing you with the original text a reflective text and a philosophical text He also introduces each chapter by highlighting key ideas and asking you a set of reflective questions so that you can hone your own theory which is essential to both your success in the studio and your adaptability in the profession These primary source texts which are central to your understanding of the discipline were written by such architects as Le Corbusier Robert Venturi and Adrian Forty The appendices also have guides to aid your reading comprehension to help you write descriptively analytically and disputationally and to show you citation styles and how to do library based research More than any other architectural theory book about the great thinkers Introducing Architectural Theory teaches you to think as well

Children's Books in Print R R Bowker Publishing,Bowker,1999-12 **Science from Your Airplane Window** Elizabeth A. Wood,1975-01-01 Describes dozens of interesting phenomena and occurrences readily observable during an airplane ride and relates them to the appropriate scientific principles **Radiance and Symbolism in Modern Stained Glass** Liana De Girolami Cheney,2016-02-08 This book focuses on the aesthetic symbolic and cultural concepts of radiance and beauty in stained glass in modern art global exchanges between stained glass artists in Europe and the Americas and the transformation of stained glass from religious decoration to secular material culture Unique features of the book include its

geographic breadth encompassing England France Italy USA and Mexico and its inclusion of American female glassmakers Essays consider how stained glass became an art form during this time and show how the narrative for the figurative design drew from the Bible mythology history literature and the symbolism of the time including popular culture such as ecology and materiality Written for students and the general public interested in the humanities literature history art history and new media and popular culture this book examines the visual beauty and symbolism of stained glass windows in Europe and American cultures during the late nineteenth and early twentieth centuries the modern era *Ideas That Shaped Buildings* M. Fil Hearn, 2003-10-10 Identifying the operative ideas in architectural theory from ancient Rome to the present and codifying them into coherent theoretical systems for students practitioners and the general reader In *Ideas That Shaped Buildings* Fil Hearn identifies and codifies into theoretical systems the operative tenets of architectural theory from ancient Rome to the present With this strikingly original synthesis of architectural history and theory he constructs an intellectual armature on which virtually any architectural concept past or present can be positioned Dealing mainly with the treatises that have been highly influential historically he organizes their concepts thematically and analyzes their development through time Straightforward and concise *Ideas That Shaped Buildings* is readily accessible to architecture students practicing architects and the general public indeed anyone interested in understanding the design rationale of buildings Its overarching message is that far from being constricting proper knowledge and application of architectural theory is enabling and inspiring and makes creative freedom possible by providing the conceptual awareness needed to devise a design After an introductory history of the development of architectural theory the text is divided into four parts The first deals with issues relevant to all theories of architecture The second treating theory from antiquity to 1800 focuses on the prescriptive conventions inherent in the classical tradition The third treating theory after 1800 focuses on the inspirational principles prompted by rationalist perceptions of the Gothic tradition The fourth treating theory since 1965 deals with rationales beyond rationalism and the influence of computers on design method and design formulation The concepts discussed are illustrated with theoretical drawings and images of actual buildings **American Bookseller**, 1993 **A Many-Colored Glass** Freeman J. Dyson, 2010-02-03 Freeman Dyson's latest book does not attempt to bring together all of the celebrated physicist's thoughts on science and technology into a unified theory The emphasis is instead on the myriad ways in which the universe presents itself to us and how as observers and participants in its processes we respond to it Life like a dome of many colored glass wrote Percy Bysshe Shelley stains the white radiance of eternity The author seeks here to explore the variety that gives life its beauty Taken from Dyson's recent public lectures delivered to audiences with no specialized knowledge in hard sciences the book begins with a consideration of the practical and political questions surrounding biotechnology As he seeks how best to explain the place of life in the universe Dyson then moves from the ethical to the purely scientific The book concludes with an attempt to understand the implications of biology for philosophy and religion The pieces in this collection

touch on numerous disciplines from astronomy and ecology to neurology and theology speaking to the lay reader as well as to the scientist As always Dyson s view of human nature and behavior is balanced and his predictions of a world to come serve primarily as a means for thinking about the world as it is today **Complete Catalog of Books in All Fields** Dover Publications, Inc,1997
