*Innovations in Environmental Legislation and Justice: Environmental and Water-Energy-Food Nexus Laws* Norouzi, Nima,Movahedian, Hussein,2023-04-12 Human health has been protected from environmental contamination by national laws throughout history but there are still many areas of international environmental law that are underdeveloped Even though numerous international environmental treaties have been established effective agreements remain difficult to achieve for a variety of reasons Because environmental problems disregard political boundaries they can only be adequately addressed by a wide range of governments some of which may have serious disagreements on important points of policy The knowledge gap between legal developments designed to achieve environmental objectives and the practical scientific and technical applications must be bridged Environmental and energy law should be explored from a wide range of perspectives and approaches to gain insight into how the law is designed to tackle particular environmental problems *Innovations in Environmental Legislation and Justice Environmental and Water Energy Food Nexus Laws* examines the development and application of international environmental laws and regulations dealing with global air water and land pollution By adopting

a multi disciplinary approach to environmental and energy law the book embraces all readerships and goes a step further to address the often thorny problem of improving communication between scientists and engineers and law and policymakers Covering topics such as environmental justice green constitutions and climate change this book is ideal for policymakers government officials legal professionals environmentalists students academicians researchers and more The English Legal System Alisdair Gillespie, Siobhan Weare, 2017 The English Legal System combines comprehensive and thorough coverage of the main topics covered on English legal system courses with a lively and engaging style to capture students attention and provide them with a firm foundation for their study of law This book enables students to first understand all of the key areas of the English legal system and then to engage with the subject fully for themselves The law is not just presented but critiqued with a range of learning features which encourage students to actively engage with contentious issues and difficult questions Everyday examples help students to apply their knowledge of the law in a practical way while questions for reflection help students to analyse evaluate and think critically Aided by a clear structure arranged in five parts students will be able to fully grasp the processes involving in making and reforming the law The English Legal System is accompanied by a wide range of online resources to help students to take their learning further For Students Introductory podcasts an invaluable guide through the book and its features Web links provide opportunities to take learning further Activities help students to put their knowledge into practice Glossary outlining the key terms related to the English legal system Podcasts accompany the questions for reflection in the textbook For Lecturers Test bank a customizable electronic testing resource *International Law and Business* Bart Wernaart, 2024-07-22 This book introduces law in the context of international business The basics of law are explored using a clear comparative methodology International and regional economic institutions are discussed next to the fundamentals of private law These include contract law liability law labour law company law privacy law intellectual property law and international private law The book goes beyond the usual focus on Western legal systems and uses examples from all over the world to provide students with comprehensive knowledge of business law It is set up rather broadly so that it can be used by teachers throughout their entire curriculum Each chapter ends with a clear summary With its colourful cases this book is accessible and fun to read **The Burden of Proof in Comparative and International Human Rights Law** Juliane Kokott, 2023-12-28 This book explores how courts decide or ought to decide in situations of uncertainty A Court must always decide the case before it even if the relevant facts remain unclear The question then arises which party benefits and which party is burdened by that uncertainty In these cases the Court must apply the rules on the burden of proof or more precisely the burden of persuasion Their importance for the individual claimant is obvious The comparison of two domestic systems one based on common law and the other a traditional code based legal order with regard to the issue of burden of proof helps to clarify the terminology and lays the ground for dealing with the burden of proof in international human rights law Without knowing what can be understood by the term

burden of proof under domestic law international lawyers with different domestic law backgrounds are in danger of misunderstanding each other This may lead to obscuring the problems connected with court decisions involving uncertainty The study also deals with uncertainties with regard to legislative general in contrast to adjudicative individual facts and with uncertainties in the framework of predictions in contrast to uncertainties relating to historic facts It attempts to prepare the ground for dealing more consciously and more consistently with problems of uncertainty in international human rights law International courts due to their geographical and cultural distance from the case usually have less access to the underlying facts Nevertheless in order to protect human rights effectively international courts and tribunals cannot always restrict themselves to reviewing the law but may also have to decide on the facts Thus issues relating to decision making on the basis of uncertain facts including the burden of persuasion are even more important in international than in domestic human rights law

**The Politics of International Law** Nicole Scicluna, 2021 The Politics of International Law offers an introduction to the role of law in contemporary international affairs Through a case study driven analysis of topics such as human rights the use of force international environmental law international trade law international criminal justice and the right to self determination the book explains the interaction between law and politics in the world today demonstrating that one cannot be understood without the other The book is divided into two parts Part I introduces contemporary international law with a focus on constitutive legal principles such as sovereignty territorial integrity and the legal equality of states Through these introductory chapters students are encouraged to take a holistic view of the processes and actors that drive international affairs and explore the fascinating paradox that while international law is largely created through political processes it also constitutes the environment in which international politics is practiced Part II builds on the foundations laid in Part I to analyze contemporary controversies in international law and politics Chapters focus on a number of substantive issue areas including international environmental law international economic law human rights law self determination and secession the law governing the use of force and international criminal justice This book is written to impart on readers a deepened understanding of both the possibilities and limits of international law as a tool for structuring relations in the world Digital Formats and Resources Also available as an e book with functionality navigation features and links that offer extra learning support
