Intersections: Philosophy and Critical Theory

Rodolphe Gasché, **Dilemmas of Truth in Alain Badiou's Philosophy** Giosuè Ghisalberti,2023-01-25 This book on Alain

Badiou's philosophy begins with a central theme: the attempt to trace how Badiou has replaced the tradition of critical theory and negation with an affirmative support of his four generic procedures: art, science, love, and art as inseparable from his revitalization of both the subject and the concept of truth. By defining four procedures as conditions of philosophy, Badiou makes the attempt to establish each as inter-related and systematically necessary to make a new proposal for thought. The fidelity to Badiou's project for the 21st century, however, requires a fundamental examination: are his four truths complicated by an inescapable dilemma? And if so, can the four truths be retained as a whole, or does the individual reader have to make a decision that will alter Badiou's project and conclusions? By presenting the dilemmas of his thought, the scholarly reader will be in a position to then pursue the necessary study to come to their own conclusions and by doing so become sufficiently free to resist the many coercions of social and political life in liberal democracies today. *Badiou and Philosophy* Sean

Bowden, 2012-06-27 The first reassessment of Alain Badiou's work since the English translation of his *Logics of Worlds* in 2009. From Cantor to category theory, from Lacan to Lautman and from Sartre to the subject, these 13 essays engage directly with the work of Alain Badiou. They focus on the philosophical content of Badiou's work and show how he connects both with his contemporaries and his philosophical heritage. This is an important collection for anyone interested in the work of Badiou and contemporary Continental philosophy. **Alain Badiou** A. J. Bartlett, Justin Clemens, 2014-12-05 Alain Badiou is one of the world's most influential living philosophers. Few contemporary thinkers display his breadth of argument and reference, or his ability to intervene in debates critical to both analytic and continental philosophy. *Alain Badiou: Key Concepts* presents an overview of and introduction to the full range of Badiou's thinking. Essays focus on the foundations of Badiou's thought: his key concepts, truth, being, ontology, the subject, and conditions, and on his engagement with a range of thinkers central to his philosophy, including Plato, Descartes, Spinoza, Heidegger, and Deleuze. *Badiou and His Interlocutors* Alain Badiou, 2018-01-25 This is a unique collection presenting work by Alain Badiou and commentaries on his philosophical theories. It includes three lectures by Badiou on contemporary politics, the infinite, cinema, and theatre, and two extensive interviews with Badiou: one concerning the state of the contemporary situation and one wide-ranging interview on all facets of his work and engagements. It also includes six interventions on aspects of Badiou's work by established scholars in the field, addressing his concept of history, Lacan, Cinema, poetry, and feminism, and four original essays by young and established scholars in Australia and New Zealand, addressing the key concerns of Badiou's 2015 visit to the Antipodal region and the work he presented there. With new material by Badiou previously unpublished in English, this volume is a valuable overview of his recent thinking. Critical responses by distinguished and gifted Badiou scholars, writing outside of the European context, make this text essential reading for anyone interested in the development and contemporary reception of Badiou's thought.

Theoretical Writings Alain Badiou, 2004-06-03 Alain Badiou is arguably the most important and original philosopher working in France today. Swimming against the tide of postmodern orthodoxy, Badiou's work revitalizes philosophy's

perennial attempt to provide a systematic theory of truth This volume presents for the first time in English a comprehensive overview of Badiou's ambitious system Beginning with Badiou's controversial assertion that ontology is mathematics this volume sets out his theory of the emergence of truths from the singular relationship between a subject and an event Also included is a substantial extract from Badiou's forthcoming work on the logics of appearance and the concept of world presented here in advance of its French publication Ranging from startling re-readings of canonical figures Spinoza Kant and Hegel to decisive engagements with poetry psychoanalysis and radical politics *Theoretical Writings* is an indispensable introduction to one of the great thinkers of our time The volume also features a preface written by the author especially for this collection

Alain Badiou Jason Barker, 2002 Alain Badiou is rapidly emerging as one of the most radical and influential philosophers of our time Badiou opposes the contemporary reduction of philosophy to nothing but a matter of language and premature announcements of the end of philosophy and thus sets himself against both analytic and continental modes of philosophy Setting the traditional platonic concerns of philosophy truth and being against the modern sophists of postmodernism Badiou has articulated a powerful systematic philosophy with profound ethical and political consequences

Badiou and the Philosophers, 2013-03-14 Between 1965 and 1968 the celebrated French philosopher Alain Badiou hosted a televised series in which he interviewed some of the most influential contemporary philosophers of the period including Michel Foucault Paul Ricoeur Michel Henry and Michel Serres This book presents the first English language translation of those interviews Although Badiou had yet to publish the books that would go on to mark him out as the leading thinker of his generation *Being and Event* and *Logics of Worlds* his unique approach and highly original ideas are present in each discussion and the interviews present his philosophical origins in a lively and engaging context More importantly these highly accessible and entertaining interviews provide a snapshot of French philosophy in the 1960s setting the scene for the very public and political context of philosophy in the period immediately preceding the events of May 68 where philosophy played a crucial role The book includes a new essay by Badiou in which he reflects on the project 30 years on

Thinking Education Through Alain Badiou Kent den Heyer, 2011-07-13 *Thinking Education Through Alain Badiou* represents the first collection to explore the educational implications of French philosopher Alain Badiou's challenge to contemporary philosophical orthodoxy put forth in his 1993 work *Ethics: An Essay on the Understanding of Evil* Represents the first collection of work in education to grapple with what Alain Badiou might mean for the enterprise of schooling Takes up Badiou's challenge to contemporary and conventional Anglo-American doxa Includes original essays by experts in several different educational fields

Badiou by Badiou Alain Badiou, 2022-05-31 An accessible introduction to Badiou's key ideas In this short and accessible book the French philosopher Alain Badiou provides readers with a unique introduction to his system of thought summed up in the trilogy of *Being and Event* *Logics of Worlds* and *The Immanence of Truths* Taking the form of an interview and two talks and keeping in mind a broad audience without any prior knowledge of his work the book

touches upon the central concepts and major preoccupations of Badiou's philosophy: fundamental ontology, mathematics, politics, poetry, and love. Well-chosen examples illuminate his thinking in regards to being and universality, worlds and singularity, and the infinite and the absolute among other topics. A veritable tour de force of pedagogical clarity, this new student-friendly work is perhaps the single best general introduction to the work of this prolific and committed thinker. If for Badiou, the task of philosophy consists in thinking through the truths of our time, the texts collected in this small volume could not be timelier.

Badiou and the German Tradition of Philosophy Jan Völker, 2019-02-07

The oeuvre of Alain Badiou has gained international success and recognition, but most of the secondary literature focuses on internal problems of Badiou's philosophy rather than its position within a broader philosophical genealogy. This book unites philosophers from Germany, Slovenia, the UK, Australia, and France to trace the relation between elements of Badiou's philosophy and the German philosophical tradition, namely the three significant movements of German Idealism, Phenomenology, Marxism, and the Frankfurt School. This is a discussion that has not yet been established, although the parallels and decisive differences between poststructuralist French philosophy and German philosophy are apparent. Through these paradigms, Badiou's reception of German Idealism, Marxism, Adorno and the Critical Theory, and Heideggerian phenomenology, the authors shed light onto Badiou's inheritance of and engagement with these specific traditions, but also highlight the links between these philosophies to open up new questions for contemporary continental thought. With an original chapter from Alain Badiou himself looking back at his influences and antagonisms within the German tradition, this book is essential for readers interested in the exploration of Badiou's legacy. It illustrates the continuation of poststructuralist philosophy, Critical Theory, and the Frankfurt School, assessing the place of classic continental philosophy to tackle how we might benefit from these intellectual exchanges today.
